Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2012.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

hrweb99.com is a commercial web-services agency site presenting H.R. Web99 as a provider of website design and development, hosting, SEO and digital-marketing services, with package-based and custom-project offerings for business clients.

Scam/Impersonation Risk

No contradictions were observed. The site's stated business model is conventional for a web-development agency, and its pages contain no investment, cryptocurrency, gambling, credential-harvesting, or brand-impersonation indicators. Available external reputation checks found no malicious or blacklist indicators, although reputation coverage was partial. Behavioral testing did identify hidden forms, but no password-external submissions, wallet activity, cloaking, or sensitive-form behavior was observed; this is a minor implementation concern rather than evidence of impersonation or fraud.

EVIDENCE

- The homepage presents H.R. Web99 services including web development, hosting, SEO, digital marketing, e-commerce development, and mobile-app development.
- Domain registration continuity records show registration on 2012-04-28, with an age of 14.32 years and expiry on 2027-04-28.
- Historical web records show 118 snapshots spanning 2012–2026, covering 15 years.
- The site's behavioral testing recorded 2 hidden forms across 2 successful runs, with 0 password submissions to external forms and 0 wallet-drainer runs.

Regulatory Verification Notes

The available evidence is consistent with an established, apparently legitimate service business, but it does not independently verify the real-world operator behind the site. The website presents commercial services, package pricing, telephone contact details, and a New Delhi office address; its regulatory relevance is therefore principally one of merchant identity, contracting, invoicing, and service-disclosure transparency rather than financial licensing. No regulatory license or registration number is claimed in the supplied site content, so the legal entity responsible for contracting remains a verification point rather than a confirmed identity. The external broker-reputation dataset produced no match and should be treated only as contextual support, not as a licensing determination.

EVIDENCE

- The site's commercial pages identify the business as H.R. Web99 and provide package-based services rather than regulated financial products.
- The contact material lists telephone numbers and an office address in New Delhi.
- Registration is through HOSTINGER operations, UAB; the domain has a long registration history.
- TLS is provided by issuer YE1 at DV validation level and is valid to 2026-11-12T17:29:27+00:00.

What to Verify Next

Before a credential or payment interaction, an enterprise or consumer counterparty should obtain the contracting legal name, invoice details, service terms, refund or cancellation provisions, and the identity of the account receiving payment. Payment should use a method with appropriate dispute or chargeback protection, and contact details should be confirmed through an independently sourced business channel. Any claimed corporate registration or sector-specific authorization should be checked with the relevant official registry where the proposed service requires one.

EVIDENCE

- The homepage and packages material provide a basis for reconciling the proposed statement of work with the services being purchased.
- The contact page provides channels that can be compared with independently sourced business records.
- The site does not present a login form or sensitive data-collection form in the observed page content, so credential handling should be assessed separately if an account workflow is later introduced.

Summary Verdict

The overall posture is **high trust and low risk**, with strong evidence of an established, operational commercial website and no observed scam or impersonation contradiction. Legitimacy is apparent and evidence-consistent, but the operator’s real-world identity is not independently verified.

Infrastructure Integrity

The site is hosted through Hostinger International Limited, with infrastructure resolving directly to likely origin addresses rather than a detected CDN or WAF edge network. This is a conventional hosting arrangement and does not itself indicate abuse, although it provides less intermediary shielding than a dedicated edge-protection deployment.

Closing Assessment

Normal browsing and ordinary service evaluation are proportionate; independent merchant-identity, contractual, return-policy, and payment-protection checks should be completed before submitting credentials or making payments.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of hrweb99.com.

- The request stayed on hrweb99.com. It was not redirected to another domain. CLEAR
- Registration is published under HOSTINGER operations, UAB. CLEAR
- DNS for this domain is served by dns-parking.com, across 2 name servers. NOTED
- The registration is paid up to 2027-04-28. NOTED
- The earliest public archive of this site is from 2012-11-27. CLEAR
- It is hosted on AS-HOSTINGER, from a server in UA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about hrweb99.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
