Key findings

- Automated classification: Not Scam.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is a German-language ecommerce storefront operated under hubauer-shop.de, presenting BMW and MINI original replacement parts, accessories, automotive fluids, manuals, prices, and delivery estimates for direct online retail.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent automotive retail purpose, with no detected phishing, brand-impersonation, malicious-content, or high-risk financial indicators. The site's BMW/MINI product focus is consistent across its shop presentation, and the absence of external reputation alerts supports a legitimate assessment. No anomalous contact-channel issue was identified.

- The homepage identifies the service as a BMW online shop and presents BMW/MINI automotive products.
- The storefront provides product listings, prices, and delivery information.
- External checks recorded zero malicious and zero suspicious detections, with no blacklist hit.
- The site appears within the global top one million traffic-ranked domains, at rank 101189.

Regulatory Verification Notes

The site operates as a direct-sales automotive retailer rather than presenting a regulated financial service. The supplied content contains no claimed license or license number; this is a limited disclosure point for ordinary commercial due diligence, not evidence of deception. Cookie and privacy notices are visibly presented, including consent-management information.

- The homepage describes direct sales of replacement parts, accessories, fluids, manuals, and related merchandise.
- The homepage displays cookie-consent controls and links to privacy information.
- The site is hosted by STRATO - Strato GmbH, DE, on AS6724.
- TLS uses Sectigo Public Server Authentication CA DV R36, with DV validation, valid through 2026-11-24.

What to Verify Next

Before a material purchase, confirm the seller's legal and returns information on the applicable shop pages, ensure that payment and delivery terms match the order, and independently confirm official support channels if transaction assistance is required.

- The storefront publishes product pricing and delivery estimates.
- Customer-login functionality is presented as part of the ecommerce experience.
- The site provides privacy and cookie-management information.

Summary Verdict

The website presents as a legitimate, established ecommerce business with a coherent commercial purpose and no observed scam or impersonation contradictions. Its overall trust posture supports normal interaction, including account login and standard transactions.

Infrastructure Integrity

The site resolves directly to infrastructure associated with STRATO in Germany, with no CDN or WAF detected. The valid Sectigo DV certificate provides transport encryption, while the hosting arrangement should be understood as a protective baseline rather than proof of business legitimacy.

Closing Assessment

Normal browsing, account use, and standard purchasing are appropriate, subject to ordinary commercial checks for the specific order.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about hubauer-shop.de at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
