

Is hurmpf.fr a scam? TrustSniffer's high-risk assessment: 6/100

hurmpf.fr

Verdict

6

OUT OF 100

CRITICAL RISK

hurmpf.fr shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-22 by automated analysis. Classification confidence 75%.

What this site appears to be

Extremely short page containing the text 'Hurmpf' and no other visible content, links, or forms.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://hurmpf.fr/>

What hurmpf.fr served when TrustSniffer captured it on 2026-08-22. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2008.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

The website at hurmpf.fr is an extremely minimal web presence whose homepage displays only the text “Hurmpf.” It presents no identifiable product, service, organisation, or commercial purpose, leaving its apparent business model and intended visitor interaction undefined.

Scam/Impersonation Risk

Confirmed external blacklist detections and multiple malicious classifications create a material risk for sensitive interaction with this domain. The homepage's near-empty presentation provides no credible context to explain or rebut those detections. The domain does have a substantial historical record, but that continuity does not offset the current reputation findings or establish that the present operator is legitimate. No separate brand impersonation or conflicting legal-entity identity was observed. The abuse reports associated with the hosting address are attributed to shared provider infrastructure, so they are contextual rather than conclusive evidence about this domain itself; the confirmed blacklist status remains the decisive concern.

EVIDENCE

- External reputation telemetry recorded 4 malicious detections and a confirmed blacklist status for hurmpf.fr.
- The domain was registered on 2008-06-23 and is approximately 18.17 years old.
- Historical records contain 339 snapshots spanning 2008–2026, covering 19 tracked years.
- The shared hosting address associated with the site has 8 abuse reports, attributed to shared OVH infrastructure rather than exclusively to the domain.

Regulatory Verification Notes

The site does not provide a substantive legal or identity presentation from which an operator, service category, licensing basis, or responsible jurisdiction can be established. No licensing claim or registration number is disclosed, and the available content does not identify a regulated financial activity. This is a disclosure and verification gap rather than, by itself, proof of misconduct. A separate broker-reputation dataset produced no name match, which provides no affirmative regulatory assurance. The domain's transport security is technically valid, but encryption does not validate the operator or its activities.

EVIDENCE

- The homepage contains only "Hurmpf," with no visible legal, corporate, licensing, contact, or service links.
- The site is served through AS16276 operated by OVH - OVH SAS, FR.
- The TLS certificate is issued by YE2, uses Domain Validation (DV), and is valid until 2026-11-19.
- No licensing authority or license number is claimed in the available site content.

What to Verify Next

Before any sensitive interaction, an independent official source should identify the operator and confirm whether the relevant activity is authorised in the applicable jurisdiction. Any proposed payment, account, or credential workflow should be validated through independently obtained contact details and a protected payment process rather than through links or instructions supplied by the site. The domain's current reputation status should also be rechecked immediately before engagement, because the present page does not provide sufficient context for risk resolution.

EVIDENCE

- The available homepage supplies no operator identity against which a regulatory record can be matched.
- No service description is available to determine which licensing regime would apply.
- No login, payment, or sensitive-input form was observed during the available page and behaviour checks.

Summary Verdict

The overall posture is **critical trust risk**, with the domain unsuitable for credentials, financial activity, or other sensitive interaction. Its apparent legitimacy and operator identity remain unverified, and the external reputation

contradictions outweigh the limited technical and historical signals supporting continuity.

Infrastructure Integrity

The site is protected by CDN/WAF infrastructure and was observed on OVH - OVH SAS, France, using AS16276; only an edge address was visible and no origin candidate was identified. This reduces direct exposure of the origin and may mitigate some infrastructure-level risk, but it is only a protective control and does not establish legitimacy.

Closing Assessment

Sensitive engagement should not proceed unless the operator, purpose, and authorisation are independently established through trusted channels and the external reputation concerns are demonstrably resolved.

Written analysis generated 2026-08-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

Signals weighed against the site

- AbuseIPDB: 8 reports on hosting IP 213.186.33.87 (OVH SAS, Content Delivery Network), 17% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of hurmpf.fr.

- The request stayed on hurmpf.fr. It was not redirected to another domain. CLEAR
- Registration is published under OVH. CLEAR

- DNS for this domain is served by ovh.net, across 2 name servers. NOTED
- The registration is paid up to 2027-06-23. NOTED
- The earliest public archive of this site is from 2008-10-27. CLEAR
- It is hosted on OVH, from a server in FR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about hurmpf.fr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
