

Is hyperwallet.com legit? TrustSniffer's high-trust assessment: 100/100

hyperwallet.com

Verdict

100

OUT OF 100

HIGH TRUST

hyperwallet.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

Official PayPal/Hyperwallet product page describing global payout capabilities, developer resources, payout methods, compliance information, and contact/support channels. Contains regulatory disclosures and corporate addresses.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2000.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

Hyperwallet.com presents a PayPal-powered business-to-business payout service that enables organizations to send mass payments to contractors, claimants, freelancers, sellers, and other payees through payout infrastructure, payment methods, developer resources, and enterprise integrations.

Scam/Impersonation Risk

No contradictions were observed. The homepage is consistent with a corporate payments and developer-services site, contains no detected phishing, impersonation, or malicious-content indicators, and does not present a sensitive login form or an untrusted form destination. A small number of abuse reports were associated with shared delivery infrastructure rather than attributed to the website itself; that signal was whitelisted, carried zero confidence, and was appropriately discounted. The available evidence therefore supports an apparently legitimate, low-risk website, while independently verifying the real-world operator remains appropriate.

EVIDENCE

- Domain registration records show hyperwallet.com was registered in 2000 and is approximately 26.53 years old.
- Historical records contain 1,056 snapshots spanning 2000–2026, with 27 years tracked.
- The homepage was classified as a corporate/product page with no red flags, no suspected brand impersonation, and no phishing indicators.
- External reputation checks recorded zero malicious and zero suspicious results for the evaluated website; the 17 abuse reports concerned a shared infrastructure IP and were marked whitelisted and discounted.

Regulatory Verification Notes

The reviewed product page presents PayPal and Hyperwallet branding, corporate addresses, compliance information, developer resources, and contact/support channels. This is substantive disclosure consistent with an established payments business, but the page does not identify a specific licensing authority or license number for independent regulatory confirmation. The site's apparent legitimacy should therefore be distinguished from independently verified operator identity and regulatory status. No third-party broker match was identified, and no third-party result supplied here constitutes a licensing or legal determination.

EVIDENCE

- The homepage describes global payout capabilities, compliance information, payout methods, developer documentation, and contact channels.
- The reviewed page does not state a specific license number or licensing authority.
- The site is served from AS54113 (FASTLY - Fastly, Inc., US).
- The transport certificate is an OV certificate issued by DigiCert Global G2 TLS RSA SHA256 2020 CA1 for PayPal, Inc., valid to 2026-12-16.

What to Verify Next

Before credential or payment interactions, independently confirm the contracting legal entity and any applicable authorization with the relevant financial-services registry. Confirm that contractual terms, service responsibilities, dispute processes, and payment-protection arrangements correspond to the entity engaged. Contact and support channels should also be validated through an independent corporate source rather than relying solely on a message or link received externally.

EVIDENCE

- The homepage provides “Contact Us,” “Documentation,” “Sales,” and “Support” pathways that can be compared with independently obtained corporate contact details.
- The homepage describes services for organizations sending payments to contractors, claimants, freelancers, and sellers, making confirmation of the contracting entity particularly relevant to any commercial engagement.
- The page includes compliance information but no specific licensing authority or license number for registry cross-checking.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture with no observed scam or impersonation contradiction. The real-world operator identity is not independently verified, so the conclusion is strong at the website-risk level rather than proof of a specific legal operator.

Infrastructure Integrity

The website is protected by Fastly's CDN/WAF infrastructure, with observed traffic terminating at edge servers rather than an identified origin system. This provides a meaningful defensive layer against direct origin exposure and common delivery-layer abuse, although protective infrastructure is a mitigating control rather than proof of legitimacy.

Closing Assessment

Normal business evaluation is proportionate, with ordinary independent checks of corporate identity, contractual terms, regulatory applicability, and payment protections completed before credentials or funds are committed.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 17 reports on hosting IP 151.101.2.132 (Fastly, Inc., Content Delivery Network), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	55/100
Identity verification confidence	60%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of hyperwallet.com.

- The request stayed on hyperwallet.com. It was not redirected to another domain. CLEAR
- Registration is published under MarkMonitor Inc.. CLEAR
- DNS for this domain is served by awsdns-11.org, across 4 name servers. NOTED
- The registration is paid up to 2026-10-19. NOTED
- The earliest public archive of this site is from 2000-11-09. CLEAR
- It is hosted on FASTLY, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about hyperwallet.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
