

Is hypovereinsbank.de legit? TrustSniffer's high-trust assessment: 80/100

hypovereinsbank.de

Verdict

hypovereinsbank.de appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not ScamLow Risk

Assessed 2026-08-03 by automated analysis. Classification confidence 75%.

What this site appears to be

German HypoVereinsbank homepage presenting retail and corporate banking, accounts, cards, investments, loans, wealth management, digital banking, sustainability, security resources, company information, and legal disclosures. It includes online-banking and account-opening calls to action plus consent-controlled analytics, advertising, personalization, and mapping services.

Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 1998.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the German HypoVereinsbank banking portal, presenting retail, business, corporate, and private-banking services, including accounts, cards, payments, investments, wealth management, loans, real-estate financing, and digital banking. Its apparent business model is an established banking operation generating revenue through interest margins, service and transaction fees, financing, investment products, and advisory services.

Scam/Impersonation Risk

No phishing, brand impersonation, conflicting legal identity, or other identity contradiction was observed. The site has a long-established and substantially documented historical presence, while reputation checks found no malicious or suspicious classification. Its custody of customer funds is inherent to the banking model and increases the consequence of account compromise, but it is not evidence of fraudulent operation.

- Historical records comprise 1,266 archive snapshots spanning 1998–2024, with 27 years tracked and no evidence of suspicious repurposing or semantic drift.
- The domain dates to 1998 and is approximately 27.66 years old, providing strong provenance for the HypoVereinsbank web presence.
- The assessed homepage showed no hidden forms, external password forms, suspicious inline scripts, cloaking, wallet-drainer behavior, or clipboard hijacking.
- External reputation telemetry recorded 0 malicious and 0 suspicious classifications, no safe-browsing detection, no external threat-list hit, and 0 abuse reports for the observed hosting address.

Regulatory Verification Notes

The homepage provides extensive company, investor, legal, privacy, security, and contact context, but the supplied page content does not establish a specific license number or regulatory authority. A broker-focused third-party dataset separately labels the matched HypoVereinsbank domain “No Regulation” and reports no identified license; that result is a limited reputational signal, not a legal determination, particularly because the source is broker-oriented and contains no customer reviews or elevated exposure reports. The organization-validated transport certificate naming UniCredit Bank GmbH provides strong technical identity binding, though certificate identity is distinct from regulatory authorization.

- The homepage includes company information and legal disclosures, but the assessed content leaves the on-page regulatory disclosure state unclear and supplies no verified license number.
- A domain-exact broker-dataset match assigns HypoVereinsbank a score of 1.55/10, reports “No Regulation,” identifies no license, and contains 0 reviews; no strong exposure keywords were detected.

- The site is served from AS16625 (AKAMAI-AS — Akamai Technologies, Inc., US).
- TLS is organization-validated and issued by Actalis Organization Validated Server CA G3 to UniCredit Bank GmbH, valid until 2026-10-25.

What to Verify Next

For regulated due diligence, the legal entity named in the site's formal disclosures should be matched directly against the relevant official banking registry, including the permitted activities and current authorization status. Institutional onboarding should also confirm official contact channels through an independently sourced corporate directory and reconcile beneficiary details before initiating material transfers.

- The homepage offers banking-login and account-opening pathways, making independent channel validation relevant to onboarding controls.
- The published service scope includes deposit-taking, payments, lending, investments, and wealth management, requiring the registry check to cover the intended service rather than entity existence alone.
- Consent-controlled analytics, advertising, personalization, and mapping services are present on the homepage and should be assessed against institutional privacy requirements.

Summary Verdict

The website is a legitimate, established, and trustworthy banking presence. Its durable provenance, coherent institutional identity, clean threat reputation, substantial public usage, and technically bound organizational certificate converge strongly in support of authenticity, with no contradictory fraud indicators identified.

Infrastructure Integrity

The website uses Akamai CDN/WAF protection, and the single observed address, 23.51.64.18, was an Akamai edge server rather than a confirmed origin host. This architecture reduces direct origin exposure and provides a meaningful security mitigation, although protective infrastructure alone does not establish legitimacy.

Closing Assessment

Normal interaction, including account login and standard banking use, is appropriate; regulated organizations should complete their customary entity, authorization, payment-instruction, and privacy due diligence before institutional onboarding.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of hypovereinsbank.de.

- The request stayed on hypovereinsbank.de. It was not redirected to another domain. CLEAR
- DNS for this domain is served by akamai.net, across 6 name servers. NOTED
- The earliest public archive of this site is from 1998-12-06. CLEAR
- It is hosted on AKAMAI-AS, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about hypovereinsbank.de at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
