

Is hzwdjc.com a scam? TrustSniffer's high-risk assessment: 0/100

hzwdjc.com

Verdict

0

OUT OF 100

CRITICAL RISK

hzwdjc.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 55%.

What this site appears to be

Adult video aggregation site with extensive explicit content categories, user registration/login, and ad-contact information; content includes potentially illegal/underage/rape/incest tags and likely unlicensed material.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	15 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	0 reports AbuseIPDB; shared hosting inflates this count	NOTED
Domain age	29 days old Most scam domains are under a year old	RISK
Web archive	Archived since 2011 Public history exists	CLEAR
Certificate	Encrypted connection Issued by WE1	NOTED

The page as captured

https://hzwajc.com/

What hzwajc.com served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2011.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a Chinese-language adult video aggregation and streaming service presented under the “69堂” brand, offering extensive explicit categories, user-uploaded or indexed videos, search, registration, login, and advertising-related contact functionality. Its apparent business model is ad-supported adult-content distribution, potentially supplemented by premium registration or advertising arrangements.

Scam/Impersonation Risk

Confirmed external reputation contradictions make this a high-risk site for sensitive interaction.

Independent reputation checks recorded a confirmed blacklist status, including 15 malicious detections, and the resulting security assessment cannot be offset by the site’s functioning pages or valid transport encryption. The homepage also contains categories and titles referring to alleged hidden-camera material, incest, sexual assault, and potentially underage subjects, indicating substantial content-integrity, legality, and abuse concerns. No separate conflicting legal-entity names or direct brand-impersonation finding was observed, but the confirmed blacklist status is itself sufficient to establish a serious security concern.

EVIDENCE

- External reputation checks recorded 15 malicious detections and a confirmed blacklist result for the website.
- The homepage presents user-uploaded or indexed adult videos with categories and titles referring to alleged偷拍, incest, sexual assault, and “萝莉” content.
- Archive provenance records the domain from 2011-11-28 through 2025-03-07, with 15 years tracked and a reconciled domain age of 14.72416153319644 years.

Regulatory Verification Notes

The website presents no clear corporate identity, licensing claim, or verifiable legal-status disclosure in the supplied page content. Its commercial purpose is also insufficiently defined beyond adult-content aggregation, advertising, and possible premium registration, creating an unresolved basis for determining content rights, age-verification controls, takedown governance, and applicable jurisdictional compliance. The operator’s real-world identity remains unverified. A valid certificate and mainstream hosting infrastructure confirm technical deployment, not legal authorization or legitimacy.

EVIDENCE

- The homepage is classified as an adult-content and user-uploaded video index and carries the red flags “no clear product,” “opaque value flow,” and “unverifiable legal status.”
- The site is served from AS13335, CLOUDFLARENET — Cloudflare, Inc., US.
- The site’s TLS certificate is issued by WE1 at DV validation level and is valid to 2026-10-19T07:42:56+00:00.
- The homepage provides registration, login, search, upload, and advertising-related functionality without a supplied license number or licensing authority.

What to Verify Next

Before any interaction beyond passive inspection, an institution should independently establish the operator’s legal identity, confirm the applicable content-hosting and age-verification obligations, and obtain evidence of rights to distribute the material. Contact channels should be confirmed through an independently sourced route rather than relying solely on details presented on the site. Any account or payment workflow should be tested only after those checks are complete and after confirming that credentials and payment data are not sent to unrelated destinations.

EVIDENCE

- The homepage contains a login form and a separate registration form, creating an account-security verification requirement.
- Browser observation recorded autoplay media and potential popup advertising.
- Behavioral observation recorded non-whitelisted external requests and substantial DOM changes after interaction.
- The supplied page analysis identifies no clear product, opaque value flow, and unverifiable legal status as business-model concerns.

Summary Verdict

The overall posture is critical and unsuitable for trusted enterprise engagement. The convergence of confirmed malicious reputation findings, severe content and business-model concerns, and an unverified operator identity outweighs the site's basic technical availability and encryption controls.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present, and all observed addresses were CDN edge servers rather than an independently observable origin. This reduces direct origin exposure and may mitigate routine infrastructure attacks, but it does not establish site legitimacy and may limit independent verification of the hosting environment.

EVIDENCE

- Cloudflare CDN/WAF protection was detected across four observed edge addresses.
- No likely origin-server address was identified during the infrastructure assessment.
- The observed edge infrastructure is associated with Cloudflare, Inc., US.

Closing Assessment

Enterprise users should not submit credentials, personal information, payment data, or other sensitive material to this site. Any continued handling should be limited to controlled, passive observation while independent legal, operator, and content-rights verification remains outstanding.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- The page replaced a large part of its own content after loading.
Behaviour in a sandbox rule:BEHAV_DOM_CHANGE_HIGH
- The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.
Behaviour in a sandbox rule:BEHAV_DOM_DIFF_AFTER_INTERACTION
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of hzwdjc.com.

- The request stayed on hzwdjc.com. It was not redirected to another domain. CLEAR
- Registration is published under July Name Limited. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-07-21. NOTED
- The earliest public archive of this site is from 2011-11-28. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about hzwdjc.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
