

Is i4digital.com.co a scam? TrustSniffer's high-risk assessment: 0/100

i4digital.com.co

Verdict

0

OUT OF 100

CRITICAL RISK

i4digital.com.co shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

A hosting-expired 'Coming Soon' placeholder page instructing the site owner to renew service; no active content, forms, or commercial activity.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

https://i4digital.com.co/

Hosting plan for this site has expired. **Renew now** to avoid service disruption.

What i4digital.com.co served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2014.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is i4digital.com.co, currently presenting a hosting-expired “Coming Soon” placeholder rather than an operating service. Visitors are told that the hosting plan has expired and that the site owner should renew it; no active products, transactions, user onboarding, or commercial purpose are visible.

Scam/Impersonation Risk

Confirmed external reputation contradictions materially elevate the risk of sensitive interaction. Multiple security-reputation assessments identified the domain as malicious or suspicious, and blacklist status was confirmed across external sources. The homepage itself does not display a brand, login workflow, payment mechanism, or active service that would establish a direct impersonation pattern, but its inactive state provides no legitimate business context to explain or rebut the external detections. Runtime observation recorded non-whitelisted external requests and posts, although no active login form, hidden form, wallet connection, or credential-capture workflow was observed. A current hosting-expiration notice also means the site should not be treated as an operational business channel.

EVIDENCE

- External reputation results recorded 13 malicious detections and 2 suspicious detections from 20 evaluated results; blacklist status was confirmed.
- The homepage displays only a hosting-expired “Coming Soon” notice and contains no active commercial or authentication workflow.
- Browser observation recorded 2 external XHR requests and 2 external POST requests classified as non-whitelisted; no hidden forms or wallet-drainer activity was observed.
- Domain registration records show registration in 2013, with an age of 13.37 years.

Regulatory Verification Notes

The available evidence does not independently verify the real-world operator, and the captured site provides no usable legal, corporate, or licensing disclosure. This is a regulatory and identity-verification gap rather than a standalone finding of fraud. The domain is nevertheless long-established and registered through GoDaddy.com, LLC, while its transport encryption uses a valid domain-validated certificate issued by YR2; these continuity and infrastructure facts are positive technical signals but do not overcome the confirmed external reputation contradictions. No broker-reputation match was identified in the available third-party context.

EVIDENCE

- Archive records identify first observation on 2014-02-09T16:33:28Z and last observation on 2025-12-17T06:59:14Z, covering 12 years tracked.
- The domain registrar is GoDaddy.com, LLC; the recorded creation date is 2013-04-10T13:37:14Z and expiration date is 2027-04-09T23:59:59Z.
- Hosted on AS398101, GoDaddy.com, LLC, US.
- TLS certificate issued by YR2 with DV validation, valid to 2026-11-14T18:54:11+00:00.

What to Verify Next

Before any sensitive interaction, an organization should independently establish the operator’s legal identity and confirm any claimed authorization directly with the relevant corporate or regulatory registry. Any future version of the site should be assessed again after deployment, with particular attention to whether authentication, payment, download, or other user-input functions appear. Official support and contact channels should be confirmed through an independent, offline route rather than relying solely on information presented by the domain.

EVIDENCE

- The captured homepage contains no operator name, legal terms, licensing authority, registration number, or active business description.
- The site currently provides no active forms, account onboarding, transaction flow, or service documentation from which authorization could be assessed.
- Identity connection to a real-world operator remains unverified in the available evidence.

Summary Verdict

The website has a **critical sensitive-interaction risk posture**. The combination of confirmed external blacklist status, multiple malicious detections, an unverified operator, and the absence of an operating business context prevents the domain from being treated as a trustworthy channel for credentials, account access, or financial activity.

Infrastructure Integrity

The site resolves directly to one likely origin address hosted by GoDaddy.com, LLC on AS398101 in the United States, with no CDN detected. This is ordinary hosting infrastructure and offers no independent evidence that the operator or website content is legitimate.

Closing Assessment

Passive observation is the only proportionate current use; credentials, account access, downloads, and financial information should not be submitted unless the external detections are resolved and the operator is independently validated.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

- 01 Governance Risk

 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
 - The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of i4digital.com.co.

- The request stayed on i4digital.com.co. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2027-04-09. NOTED
- The earliest public archive of this site is from 2014-02-09. CLEAR
- It is hosted on GO-DADDY-COM-LLC, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about i4digital.com.co at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
