

Is icici.bank.in legit? TrustSniffer's high-trust assessment: 100/100

icici.bank.in

Verdict

100

OUT OF 100

HIGH TRUST

icici.bank.in appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 70%.

What this site appears to be

Comprehensive corporate banking homepage presenting retail, NRI, business and corporate products (accounts, deposits, loans, cards, investments) with login access and customer support resources. Content and calls-to-action are consistent with an established bank site.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2025.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is an ICICI Bank online banking portal presenting personal, NRI, business, and corporate banking services, including accounts, deposits, loans, cards, investments, payments, customer support, and secure account-login functionality. Its apparent business model is that of a full-service commercial bank monetizing financial products through interest income, fees, and related services.

Scam/Impersonation Risk

No contradictions were observed: the available evidence contains no phishing, impersonation, blacklist, or malicious-reputation finding. The homepage content, branded navigation, customer-support resources, and links to established social-media profiles are consistent with the represented banking purpose. An interaction assessment did identify implementation-level anomalies involving inline scripts and substantial page changes, but these were not accompanied by hidden forms, external password-post destinations, wallet activity, clipboard manipulation, or cloaking; they therefore do not constitute evidence of impersonation in this assessment. The operator's real-world identity remains likely rather than independently verified.

EVIDENCE

- The registration record shows a creation date of 2005-02-17 and an age of 21.49 years, with National Internet Exchange of India listed as registrar and NIXI as the organization.
- Available archive records contain 378 snapshots across 2 years, from 2025-10-28 to 2026-08-07, with a maximum recorded gap of 1 year.
- External reputation checks recorded 0 malicious and 0 suspicious detections, with no Google Safe Browsing malicious finding, no external blacklist finding, and 0 abuse reports.
- The interaction assessment recorded 4 suspicious inline scripts and a maximum DOM difference of 20,374, while recording 0 hidden forms, 0 external password forms, 0 wallet-connect runs, and no cloaking.

Regulatory Verification Notes

The site presents a mature commercial-banking service and its public content includes customer-support, KYC, and service-request pathways. However, the captured content does not state a licensing authority or license number, so regulatory authorization is not independently established by the supplied page evidence; this is a disclosure point for verification, not evidence of a scam. The transport certificate is technically strong and names ICICI Bank Limited as the subject organization, but a certificate subject is supportive infrastructure evidence

rather than conclusive proof of the operating legal entity. No separate broker-reputation match was identified in the supplied third-party context.

EVIDENCE

- The site's transport encryption uses an OV certificate issued by Sectigo Public Server Authentication CA OV R36, valid to 2026-10-07.
- The captured homepage is categorized as a corporate/banking website and contains a login form without an untrusted destination.
- The available public page evidence does not display a licensing authority or license number.

What to Verify Next

Before credential or payment interactions, an independent source should confirm that the portal and its published support channels correspond to the intended ICICI Bank entity. The applicable banking authorization should be checked against the relevant official registry, and the site's terms, privacy, service, and payment-protection provisions should be reviewed before material transactions.

EVIDENCE

- The homepage provides dedicated help, contact-us, and login pathways within the site's internal navigation.
- The site links to Facebook, LinkedIn, X, Instagram, and YouTube profiles presented under the ICICI Bank brand.
- The page title identifies the service as "ICICI Bank - Personal, Business, Corporate and NRI Banking Online."

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website. The overall posture is high trust and low risk, with no observed contradiction to the site's stated purpose. The real-world operator identity is likely but not independently verified.

Infrastructure Integrity

The website is protected by a CDN/WAF, and the observed address functions as an edge endpoint rather than an exposed origin. The site is served through AS8075, operated by Microsoft Corporation in the United States; this mainstream protective infrastructure is a mitigating control, not proof of legitimacy by itself.

Closing Assessment

Ordinary use is proportionate to the assessed posture, provided standard independent identity, service-terms, and payment-protection checks are completed before credential or payment interactions.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of [icici.bank.in](#).

- The request stayed on [icici.bank.in](#). It was not redirected to another domain. [CLEAR](#)
- Registration is published under National Internet Exchange of India. [CLEAR](#)
- DNS for this domain is served by registry.in, across 4 name servers. [NOTED](#)
- The registration is paid up to 2027-02-17. [NOTED](#)
- The earliest public archive of this site is from 2025-10-28. [CLEAR](#)
- It is hosted on MICROSOFT-CORP-MSN-AS-BLOCK, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [icici.bank.in](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
