

Is iconsoft.ru legit? TrustSniffer's high-trust assessment: 99/100

iconsoft.ru

Verdict

99

OUT OF 100

HIGH TRUST

iconsoft.ru appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 70%.

What this site appears to be

Corporate website for IconSoft, a Russian IT solutions provider offering enterprise platforms and services (IconTeam, IconRPA, IconPrint, IconNav). Provides product descriptions, pricing samples, documentation downloads, portfolio/case studies, contact details and a lead capture form.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

IconSoft is a corporate B2B website for a Russian IT solutions provider, presenting enterprise software, navigation and information systems, business-process automation, document-printing services, project-management tools, portfolio materials, and sales-contact options.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent corporate profile rather than a phishing, credential-harvesting, financial-solicitation, or brand-impersonation operation, and external reputation checks found no malicious or suspicious detections. Automated interaction produced dynamic network activity and post-interaction page changes, but no cloaking, hidden forms, password-exfiltration forms, wallet-drainer behavior, or clipboard manipulation was detected; these observations do not establish an abuse pattern. The available evidence is therefore consistent with an established, apparently legitimate website, while the real-world operator identity remains independently unverified.

EVIDENCE

- The homepage identifies the business as IconSoft and describes enterprise IT services, with no phishing or impersonation indicators detected.
- External reputation checks recorded 0 malicious detections and 0 suspicious detections; no brand-impersonation match was identified.
- Domain registration evidence: registered 2019-08-07 (~7.02 years old).
- Web-archive evidence: 59 snapshots spanning 2021–2026 (6 years tracked), with continuous historical coverage and no suspicious repurposing identified.

Regulatory Verification Notes

The site presents the legal name ООО «Айкон софт» and describes an enterprise software business monetized through licensing, subscriptions, demonstrations, and corporate engagements. Its product pages provide concrete commercial information, including IconTeam at 380 rubles per user per month and IconRPA pricing of 1,000 rubles per robot per month for up to 10 robots. No regulated financial service is being offered in the supplied content, and no regulated-service license or registration number is claimed; this is a transparency point for ordinary corporate due diligence, not evidence of a scam. Independent verification does not establish that the on-site legal name is the real-world operator of the domain.

EVIDENCE

- The homepage and corporate information identify ООО «Айкон софт», describe a 70-plus-person core team, and reference work for telecommunications, banking, and government organizations.
- Product pages describe IconTeam, IconRPA, IconPrint, and IconNav, supported by pricing samples, documentation, portfolio material, and a sales lead form.
- The site does not present a regulated-service license claim or license number in the supplied corporate and product content.

What to Verify Next

Before a credential or payment interaction, an enterprise counterparty should independently confirm that ООО «Айкон софт» is the contracting entity, validate its corporate registration and authority through the relevant official registry, and ensure that quotations, software terms, support obligations, and any refund or termination provisions identify the same entity. Contact and support channels should be confirmed through an independent corporate source, and payment arrangements should preserve normal contractual and payment-protection recourse.

EVIDENCE

- The corporate pages provide the entity name, team information, product descriptions, and contact/lead-capture functions to support independent counterparty checks.
- The product pages expose commercial pricing and documentation that can be reconciled against a formal quotation or contract.
- The supplied analysis identifies one contact/lead form and no login form or hidden sensitive form.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate corporate website. This classification supports ordinary business engagement, but it does not independently prove the identity of the real-world operator.

Infrastructure Integrity

The site resolves directly to infrastructure operated by DDOS-GUARD - DDOS-GUARD LTD in Russia, without a detected CDN or WAF edge layer; this provides hosting continuity but limited intermediary shielding. Transport encryption is provided by a valid domain-validated certificate, which is a positive technical control but not proof of corporate identity.

EVIDENCE

- Hosting infrastructure: AS57724, DDOS-GUARD - DDOS-GUARD LTD, RU; server IP 176.57.67.113.
- TLS certificate: issuer YR1, validation level DV, valid to 2026-09-29.
- Network resolution identified 1 unique IP, 0 edge IPs, and 1 likely origin IP.

Closing Assessment

Engagement is proportionate for routine enterprise evaluation, subject to the ordinary independent counterparty, contractual, and payment-protection checks appropriate before submitting credentials or committing funds.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of iconsoft.ru.

- The request stayed on iconsoft.ru. It was not redirected to another domain. CLEAR
- Registration is published under REGRU-RU. CLEAR
- DNS for this domain is served by ru., across 2 name servers. NOTED
- The registration is paid up to 2027-08-07. NOTED
- The earliest public archive of this site is from 2021-08-15. CLEAR
- It is hosted on DDOS-GUARD, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about iconsoft.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
