What icoporesdeoccidentesas.com.co served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

This is the corporate website of Icopores de Occidente S.A.S., a Colombian manufacturer and seller of expanded polystyrene products for refrigeration, construction, packaging, and related projects. It presents product portfolios, sustainability information, company experience, physical and telephone contact details, and direct sales or advisory channels rather than financial services, credentialed accounts, or investment opportunities.

Scam/Impersonation Risk

No contradictions were observed: the reviewed pages contain no phishing, impersonation, malicious-download, payment-harvesting, or investment-related indicators. The site's stated manufacturing purpose is consistent across its corporate, portfolio, sustainability, and contact content. Behavioral inspection did identify hidden forms during two runs, but no password-external forms, wallet activity, clipboard manipulation, cloaking, or sensitive-

form submission was detected; this is therefore a technical implementation anomaly rather than evidence of impersonation. Two abuse reports relate to the hosting IP, and the attribution identifies shared data-center infrastructure rather than the website operator. The contact page also publishes the address `ventas@icoporesdeoccidentesas.com.co`, which is a contact-channel integrity anomaly because the `.com.co` form is syntactically unusual and should be confirmed through another published channel.

EVIDENCE

- The homepage and portfolio pages describe expanded-polystyrene products for refrigeration, construction, and packaging, with no login or financial-service workflow.
- Behavioral inspection recorded hidden forms in 2 of 2 runs, while recording 0 password-external forms, 0 wallet-provider detections, 0 clipboard-write events, and no cloaking.
- The site's domain was registered on 2012-03-23 and is approximately 14.42 years old.
- The hosting-IP reputation record contains 2 reports attributed to shared infrastructure used for data-center, web-hosting, or transit services.

Regulatory Verification Notes

The website presents itself as a local manufacturing business and identifies Icopores de Occidente S.A.S. across its company material. Its apparent business model does not involve a regulated financial product, and no broker or other regulated-entity match was identified in the supplied third-party context. No license or registration number is presented on the reviewed pages; for this type of commercial manufacturer, that is a disclosure point to clarify rather than an indication of deception. Independent connection between the website and the real-world legal entity remains unverified, so the on-site identity claim should be treated as apparent rather than proven. The domain's established registration continuity, valid transport encryption, and stable technical service support an established-site interpretation.

EVIDENCE

- The company and sustainability pages identify "ICOPORES DE OCCIDENTE S.A.S." and describe recycling and expanded-polystyrene manufacturing processes.
- The domain registration record lists PDR Ltd. d/b/a PublicDomainRegistry.com as registrar, with creation date 2012-03-23T16:00:11Z and expiration date 2027-03-22T23:59:59Z.
- The site is served from AS23352, SERVERCENTRAL - DEFT.COM, US.
- The site uses a DV TLS certificate issued by YR1, valid through 2026-11-15T20:08:08+00:00.

What to Verify Next

Before a commercial order or submission of business information, the prospective counterparty should confirm the company's legal existence and current contact details through the relevant Colombian business registry or an independently obtained telephone number. Any applicable local requirements for manufacturing, environmental handling, or product sales should be checked with the relevant authority because the reviewed pages do not provide registration or license identifiers. Payment arrangements should use standard commercial protections, including a written quotation, documented return or delivery terms, and a payment method offering dispute recourse. Independent confirmation of the official contact channels is also appropriate before exchanging sensitive information.

EVIDENCE

- The contact page provides telephone numbers, a physical address, and a WhatsApp contact prompt that can be cross-checked independently.
- The reviewed company and product pages contain business descriptions and sales-contact information but no licensing or registration identifier.
- The site has no account-login form, payment flow, or sensitive-data form in the reviewed page content.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate corporate manufacturing website and supports a high-trust, low-risk posture. No scam or impersonation contradiction was identified, although the real-world operator connection has not been independently verified.

Infrastructure Integrity

The site resolves directly to one identified hosting IP on SERVERCENTRAL - DEFT.COM infrastructure in the United States, without a detected CDN or WAF layer. This provides straightforward technical attribution and avoids treating edge protection as proof of legitimacy; the valid TLS deployment remains a positive transport-security control.

Closing Assessment

Normal browsing is appropriate, while ordinary independent checks of the merchant identity, transaction terms, and payment protections should be completed before credentials or payment details are submitted.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 2 reports on hosting IP 75.102.20.7 (DEFT.COM, Data Center/Web Hosting/Transit), 7% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of icoporesdeoccidentesas.com.co.

- The request stayed on icoporesdeoccidentesas.com.co. It was not redirected to another domain. [CLEAR](#)

- Registration is published under PDR Ltd. d/b/a PublicDomainRegistry.com. CLEAR
- DNS for this domain is served by londonred.com, across 2 name servers. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about icoporesdeoccidentesas.com.co at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
