Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1997.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is an established Turkish e-commerce marketplace offering physical and digital goods from multiple brands and sellers, with Turkish-lira pricing, sponsored placements, timed promotions, coupons, seller indicators, account facilities, order tracking, favourites, and a shopping cart.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, malicious redirects, credential-harvesting behaviour, or other fraud signals were observed. The domain's long operating history, extensive archival record, established traffic footprint, and clean external reputation converge with the ordinary marketplace content to support the site's legitimacy.

- Domain records identify registration through Squarespace Domains II LLC on 9 December 2002 (~23.66 years old), with expiration on 9 December 2026.
- The web archive contains 3,625 snapshots spanning 31 March 1997–22 July 2026 (30 years tracked), with no suspicious repurposing or semantic drift identified.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing classification, no external blacklist finding, and no reported infrastructure abuse.
- The homepage presented conventional retail navigation and no hidden forms, sensitive-form redirection, wallet interaction, clipboard manipulation, cloaking, or suspicious inline scripts.

Regulatory Verification Notes

The available identity evidence is coherent: domain registration records associate the site with Turkuvaz Haberlesme ve Yayincilik A.S., while the extended-validation certificate names TURKUVAZ MUZIK KITAP MAGAZACILIK PAZARLAMA ANONIM SIRKET. These are distinct corporate names, but they arise from different administrative and certificate artifacts rather than conflicting legal or identity pages; the supplied evidence therefore does not establish an identity contradiction. No sector-specific licence claim appears in the assessed homepage material, which is not inherently adverse for a general retail marketplace. The privacy-protected registrant entry is an administrative detail and does not outweigh the named organisational evidence.

- The domain-registration artifact identifies the registrant organization as Turkuvaz Haberlesme ve Yayincilik A.S.; the individual registrant field is privacy-protected.
- The site's transport encryption uses an EV certificate issued by Sectigo Public Server Authentication CA EV R36 to TURKUVAZ MUZIK KITAP MAGAZACILIK PAZARLAMA ANONIM SIRKET, valid until 18 October 2026.

- The assessed homepage contains no investment, brokerage, crypto-asset, or financial-return proposition that would itself imply a specialist financial-services licensing requirement.
- The available third-party broker dataset produced no matching broker profile; this is contextual only and does not determine legal or regulatory status.

What to Verify Next

For procurement, merchant onboarding, or material-value transactions, standard counterparty due diligence should confirm the contracting entity shown at checkout, the applicable seller-of-record terms, return and refund arrangements, and the official customer-service channels. Payment-page identity and transaction details should also be reviewed before authorising a purchase, as would be appropriate for any multi-seller marketplace.

- The homepage displays multiple sellers, seller badges, sponsored listings, coupons, and timed deals, making seller-of-record attribution relevant to each purchase.
- Account navigation includes login, order tracking, loyalty points, favourites, and cart functions, indicating ordinary customer-account and transaction workflows.
- The marketplace covers a broad catalogue that includes electronics, appliances, fashion, books, software, digital products, precious metals, and other consumer categories.
- The homepage analysis found no sensitive form or form submission to an untrusted destination.

Summary Verdict

The website is legitimate, established, and trustworthy. Its identity, historical presence, marketplace content, traffic footprint, external reputation, and technical controls converge without contradictory risk signals, supporting normal customer engagement.

Infrastructure Integrity

The site is served from AS16509, operated by AMAZON-02 – Amazon.com, Inc., US, and the observed address is categorized as content-delivery infrastructure. This mainstream hosting posture and valid extended-validation transport security reduce direct infrastructure exposure, although protective hosting alone is not proof of legitimacy.

Closing Assessment

Normal interaction—including account login, account management, and standard purchases—is appropriate, subject to routine transaction-level checks customary for a multi-seller marketplace.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of idefix.com.

- The request stayed on idefix.com. It was not redirected to another domain. CLEAR
- Registration is published under Squarespace Domains II LLC. CLEAR
- DNS for this domain is served by awsdns-58.org, across 4 name servers. NOTED
- The registration is paid up to 2026-12-09. NOTED
- The earliest public archive of this site is from 1997-03-31. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about idefix.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
