

Is idevstudio.com safe? TrustSniffer's low-trust assessment: 36/100

idevstudio.com

Verdict

36

OUT OF 100

LOW TRUST

idevstudio.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 75%.

What this site appears to be

I DEV STUDIO is a portfolio site for a full-stack developer offering frontend and backend development services (React, Next.js, Node.js, Express) with contact call-to-action for hiring.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

I DEV STUDIO

What idevstudio.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2004.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

I DEV STUDIO is a portfolio website for a freelance or small-studio full-stack developer, presenting React, Next.js, Node.js, and Express development services with calls to contact the developer for project work, consulting, and collaboration.

Scam/Impersonation Risk

The site's homepage presents a coherent, informational portfolio and does not display login forms, hidden forms, wallet functionality, or other page-level phishing mechanisms. However, this benign presentation is materially outweighed by confirmed external reputation contradictions, including a blacklist hit and multiple malicious detections. A separate abuse report relates to shared Amazon content-delivery infrastructure, has no meaningful attribution confidence, and is not treated as evidence specific to the site. The available evidence does not establish an identity contradiction or brand impersonation, but the operator's real-world identity remains unverified and the site should be treated as unsuitable for sensitive interaction pending independent validation.

EVIDENCE

- Homepage: presents “I DEV STUDIO” as a full-stack development portfolio with React, Next.js, Node.js, and Express services; no login or sensitive data form was observed.
- External reputation artifact: recorded 4 malicious detections and a confirmed blacklist hit.
- Hosting-IP artifact: recorded 1 abuse report against shared CDN infrastructure, attributed to Amazon.com, Inc. with confidence score 0.
- Domain registration artifact: registered 2024-11-21 and approximately 1.75 years old.

Regulatory Verification Notes

The business model is a conventional freelance development service rather than a visibly regulated financial activity. The homepage does not state a licensing claim or license number, so no regulatory authorization can be inferred; this is a disclosure point for verification rather than standalone evidence of fraud. The site identifies itself as I DEV STUDIO, but independent connection to a specific real-world person or legal entity has not been verified. The available broker-reputation context contains no matching result.

EVIDENCE

- Homepage: identifies the service as “I DEV STUDIO” and describes frontend, backend, and full-stack development offerings.
- Registration artifact: registrar listed as Amazon Registrar, Inc.; registrant information is recorded as “On behalf of idevstudio.com OWNER,” with organization “c/o whoisproxy.com.”
- Archive record: 491 snapshots spanning 2004-10-15 through 2026-03-09, across 23 tracked years.
- Transport and hosting artifacts: served from AS16509, Amazon.com, Inc.; TLS uses Amazon RSA 2048 M01, DV validation, valid through 2026-11-21.

What to Verify Next

Before any engagement, independently establish the operator’s legal or professional identity through an authoritative profile or an offline contact route, and obtain client references or verifiable examples of completed work. Confirm the contracting entity, invoice details, refund or dispute terms, and payment destination before committing funds. If the proposed engagement involves regulated services or the handling of sensitive client data, confirm the applicable registration, contractual safeguards, and compliance responsibilities with the relevant authority or procurement function.

EVIDENCE

- Homepage: provides service descriptions and a “Contact Me” hiring call-to-action but no independently verifiable professional profile or external portfolio links.
- Homepage metadata: contains no structured business identity data and no substantive meta description.
- Engagement model: described as client contracts, project fees, and consulting rather than a clearly documented corporate service structure.

Summary Verdict

The overall posture is **low trust with elevated risk for sensitive interaction**. The site appears to be a professionally presented development portfolio, but that surface-level quality does not reconcile the confirmed external reputation contradictions or the absence of independently verified operator identity. Passive review may be reasonable, while credentials, confidential information, financial commitments, and consequential contractual actions require a materially higher level of assurance.

Infrastructure Integrity

The site is protected by AWS CloudFront CDN/WAF infrastructure and resolves through Amazon-hosted edge services. This provides a legitimate technical mitigation against direct exposure and common delivery-layer abuse, but it is a shared protective service and does not establish that the website operator is legitimate.

Closing Assessment

Until independent identity, contracting, and reputation checks are completed, limit activity to non-sensitive review and do not proceed with credential submission, confidential-data exchange, or financial commitment.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by analysis engine.

- 01 Sensitive Interaction Risk
- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat

Signals weighed against the site

- AbuseIPDB: 1 report on hosting IP 18.165.122.100 (Amazon.com, Inc., Content Delivery Network), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of idevstudio.com.

- The request stayed on idevstudio.com. It was not redirected to another domain. CLEAR
- Registration is published under Amazon Registrar, Inc.. CLEAR
- DNS for this domain is served by awsdns-14.org, across 4 name servers. NOTED

- The registration is paid up to 2026-11-21. NOTED
- The earliest public archive of this site is from 2004-10-15. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about idevstudio.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
