

Is idiskitimes.co.za legit? TrustSniffer's high-trust assessment: 100/100

idiskitimes.co.za

Verdict

100

OUT OF 100

HIGH TRUST

idiskitimes.co.za appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 55%.

What this site appears to be

iDiski Times home page — a South African football news portal with articles, live scores, fixtures, an e-paper, advertising and contact details. Appears to be a standard publisher site with social links and newsroom content.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

iDiski Times is a South African football news portal presenting local and international football coverage, live scores, fixtures, tables, match reporting, an e-paper, advertising, sponsored content, and contact details. Its apparent business model is an advertising-supported sports publisher that may also generate revenue through paid digital content or subscriptions.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence: there were no phishing, impersonation, malicious-content, or brand-misuse findings. The homepage presents a coherent newsroom and sports-media function, with no login form, credential-harvesting form, wallet connection, or other sensitive transaction mechanism detected. A limited abuse signal exists at the shared hosting-IP level, but it was attributed to shared provider infrastructure, carried no meaningful confidence, and was discounted as non-specific to this website.

EVIDENCE

- Homepage: football-news sections, live scores, fixtures, tables, and newsroom content are present, with no observed phishing or impersonation indicators.
- Homepage behavior: no login form, hidden form, password submission, wallet interaction, clipboard hijack, or sensitive external form was detected.
- Hosting-IP reputation: one abuse report was associated with the shared provider IP; attribution was to shared infrastructure rather than specifically to the website, with confidence score 0.
- External reputation checks: no malicious or suspicious detections and no phishing-related finding were recorded for the domain.

Regulatory Verification Notes

The available evidence is consistent with an established, apparently legitimate media publisher, but it does not independently verify the real-world operator identity. The observed activity is publishing and advertising rather than an identified financial-services offering; no financial license claim or license number is presented in the supplied site content. This is a transparency item for ordinary due diligence, not evidence of scam activity. A third-party broker-dataset lookup produced no match, which provides contextual support but is not a licensing or regulatory determination.

EVIDENCE

- Registration record: domain created 2020-10-13 and listed as approximately 5.83 years old; registrar is GoDaddy.com, LLC.
- Registration record: organization field is listed as Podamedia.
- Homepage: the site identifies itself through a defined sports-news publishing structure, advertising activity, social links, and contact navigation.
- Page authority: the site records a mid-range external authority profile, consistent with an operating publisher but not proof of legal ownership.

What to Verify Next

Before any credential or payment interaction, independently compare the publisher identity shown on the site with applicable corporate or media-business records, confirm the official contact channels through an independent route, and review the terms, refund arrangements, and payment protections attached to any paid service. Social profiles linked from the site can also be cross-checked for continuity of branding and publication activity.

EVIDENCE

- Contact navigation: a dedicated contact path is linked from the site.
- Homepage: social links extend across Facebook, X, WhatsApp, YouTube, Instagram, and TikTok, providing channels for independent continuity checks.
- E-paper and commercial content: any payment, subscription, or account terms should be reviewed at the point of transaction.
- Regulatory disclosure: no license claim or license number is evidenced in the supplied page content.

Summary Verdict

The overall posture is **high trust and low risk**, with the available evidence consistent with an established, apparently legitimate website. The conclusion supports normal browsing and ordinary site interaction, while the real-world operator identity remains likely rather than independently verified.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, which is a meaningful exposure-mitigation measure but not proof of legitimacy. Observed traffic resolved through the Gardale Solutions infrastructure in South Africa, and the origin server was not observable in this analysis.

EVIDENCE

- Hosting infrastructure: served from AS328020, Gardale Solutions - Gardale Solutions, ZA.
- Edge protection: Cloudflare CDN/WAF detected; 1 edge IP observed and 0 likely origin candidates identified.
- Transport encryption: TLS certificate issued by YR2 with DV validation, valid to 2026-11-04.

Closing Assessment

The site is suitable for ordinary use on the strength of the current evidence; credential or payment actions should follow the independent identity, policy, and payment-protection checks described above.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 1 report on hosting IP 164.160.25.89 (GSOL Cloud VPS Hosting, Fixed Line ISP), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	78%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of idiskitimes.co.za.

- The request stayed on idiskitimes.co.za. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-10-13. NOTED
- It is hosted on Gardale Solutions, from a server in ZA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about idiskitimes.co.za at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
