

Is idxbroker.com legit? TrustSniffer's high-trust assessment: 100/100

idxbroker.com

Verdict

100

OUT OF 100

HIGH TRUST

idxbroker.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 65%.

What this site appears to be

Official-style marketing page for IDX Broker, a subscription SaaS platform that lets real-estate professionals add MLS search, listing displays, lead capture, market reports, and related tools to their websites. The page provides transparent plan pricing, product details, FAQs, customer support information, and a basic contact form.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2004.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is an established real-estate software platform offering subscription-based IDX and MLS search, listing displays, lead capture, market reporting, hosted websites, WordPress integration, AI-assisted property search, and CRM connectivity for agents, teams, brokers, and developers; its Core, Engage, and Elite plans are presented at \$60, \$99, and \$149 per month, with an additional \$50-per-month CRM integration.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, deceptive redirects, or other substantive fraud signals were observed. The site's long operating history, extensive archival continuity, established global traffic footprint, and clean external reputation converge with a mature, internally consistent commercial presentation. The observed contact form does not request sensitive information and has no untrusted destination, while behavioral testing found no cloaking, hidden forms, wallet-draining activity, clipboard hijacking, or credential transmission to external forms.

- Domain-registration records show registration through GoDaddy.com, LLC on 1 September 2004, making the domain approximately 21.92 years old.
- Historical records contain 5,000 archive snapshots spanning 3 September 2004 to 11 April 2020, representing 17 years of tracked history without detected semantic repurposing.
- External reputation checks found zero malicious or suspicious detections, no search-safety finding, no reported hosting-address abuse, and an established traffic rank of 32,151.
- The homepage contains one ordinary contact form, with no sensitive fields, hidden forms, untrusted submission destination, or embedded login form.

Regulatory Verification Notes

IDX Broker is presented as conventional real-estate SaaS rather than a financial, investment, brokerage, or other regulated financial service. No regulatory license is claimed, and the supplied evidence does not establish that such authorization is required for the stated business model. The evaluated page was assessed as presenting a legal identity, transparent commercial terms, support information, and detailed service descriptions; domain-registration privacy through Domains By Proxy is an administrative arrangement and does not undermine that identity evidence. No relevant adverse broker record was matched.

- The homepage identifies the offering as real-estate software for MLS search, website functionality, and customer-lead management, rather than a regulated financial product.

- The homepage provides plan comparisons, FAQs, ordering access, customer support routes, MLS coverage information, and a knowledge base.
- The hosting infrastructure is served from AS16509 (AMAZON-02 – Amazon.com, Inc., US).
- The site’s transport encryption uses a DV certificate issued by Amazon RSA 2048 M01, valid until 5 November 2026.

What to Verify Next

Enterprise procurement should confirm the contracting entity on the order documentation, ensure the proposed MLS and REALTOR® board coverage matches the intended operating markets, and review service-level, privacy, data-processing, retention, and integration terms. Support and escalation arrangements should also be documented through the provider’s established business channels before deployment.

- The homepage provides an “Order Now” route and a plan-comparison function suitable for reconciling quoted services with contractual terms.
- The homepage links to MLS coverage, MLS data-provider, and REALTOR® board information relevant to geographic and data-access validation.
- The homepage advertises a product tour, developer resources, integrations, webinars, and a knowledge base that can support technical evaluation.
- The homepage presents SSL protection, lead routing, agent management, and listing-display capabilities whose implementation terms should be addressed during security and service review.

Summary Verdict

The website is legitimate, established, and trustworthy, with strong convergence across provenance, reputation, commercial coherence, page quality, and technical security evidence. No contradictory signal materially challenges its identity or stated purpose, and the observed interaction model is consistent with a mature SaaS provider.

Infrastructure Integrity

The site is hosted on identified Amazon infrastructure in the United States and uses a currently valid Amazon-issued TLS certificate. No separate CDN or WAF layer is established by the supplied evidence; the identified hosting and encryption controls mitigate routine transport and platform exposure but are not, by themselves, proof of legitimacy.

Closing Assessment

Normal interaction, including account login, product evaluation, ordering, and standard use, is appropriate, subject to ordinary enterprise procurement and information-security controls.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100

Identity verification confidence	25%
----------------------------------	-----

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of idxbroker.com.

- The request stayed on idxbroker.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-09-01. NOTED
- The earliest public archive of this site is from 2004-09-03. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about idxbroker.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
