

Is iglesiaspentecostescentralpandevida.com a scam? TrustSniffer's high-risk assessment: 0/100

iglesiaspentecostescentralpandevida.com

Verdict

0

OUT OF 100

CRITICAL RISK

iglesiaspentecostescentralpandevida.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

The page contains verbose PHP/WordPress plugin error and deprecation messages (Elfsight plugins, Yoast translation notice), indicating a misconfigured or debug-enabled WordPress instance. No forms, CTAs, payment flows, or impersonation evidence in the captured content.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	10 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	0 reports AbuseIPDB; shared hosting inflates this count	NOTED
Domain age	6.8 years old Registered history	CLEAR

What iglesiapentecostescentralpandevida.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2020.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is a WordPress-based site that presents visitors with exposed PHP and plugin deprecation messages rather than a coherent public-facing service, with no clear business model, monetization flow, or defined purpose visible in the captured content.

Scam/Impersonation Risk

No on-page brand impersonation, phishing form, login flow, payment process, or other direct impersonation mechanism was observed. However, the site is **blacklisted** by external reputation sources, with malicious detections recorded across the assessed security ecosystem; this is a material contradiction that outweighs the otherwise limited and largely non-transactional page content. The homepage's visible WordPress debug output

indicates poor configuration and may expose server-path information, although that condition alone does not establish malicious intent. The site's independently verified identity also remains unconfirmed, so the apparent purpose of the website cannot be treated as proof of the real-world operator.

EVIDENCE

- Homepage: exposed PHP deprecation notices identify Elfsight contact-form and PayPal-button plugin paths under the WordPress installation.
- External reputation telemetry: 10 malicious detections and 1 suspicious detection were recorded for the assessed domain.
- Domain registration: Registered 2019-10-25 (~6.83 years old) through NameCheap, Inc.

Regulatory Verification Notes

The captured page does not present a clear legal entity, licensing claim, registration number, or regulated-service disclosure. This is a verification and transparency gap rather than independent proof of fraud. Public ownership information is limited, and the operator has not been independently connected to a verified real-world entity. The site does possess ordinary technical hosting and transport-encryption characteristics, but those controls do not validate its ownership, authorization, or regulatory standing.

EVIDENCE

- Registration record: Registrar identified as NameCheap, Inc.; expiration recorded as 2026-10-25.
- Hosting telemetry: Served from AS22611, InMotion Hosting, Inc., US.
- Transport encryption: TLS certificate issued by YR1 at DV validation level, valid to 2026-10-22T02:01:17+00:00.

What to Verify Next

Before any sensitive interaction, an institution should independently identify the operating entity and confirm that the domain is formally associated with it through an authoritative corporate or organizational record. Any claimed regulated activity should be checked directly against the relevant regulator's registry, using independently sourced contact details rather than information supplied solely by the website. Until those checks are resolved, the site should be limited to non-interactive observation and should not receive credentials, personal information, payment details, or other financial data.

EVIDENCE

- Identity status: No independent identity signals connect the website to a verified real-world operator.
- Disclosure review: The captured page provides no clear licensing or registration claim to validate.
- Interaction review: No login, sensitive form, payment flow, or wallet-connection mechanism was observed in the captured content.

Summary Verdict

The overall posture is critical, driven by confirmed external threat contradictions and unresolved operator identity. The available evidence does not support treating the site as a trustworthy destination for sensitive interaction, credentials, or financial activity.

Infrastructure Integrity

The site presents a direct hosting and origin posture on InMotion Hosting, with no CDN or WAF edge detected in the supplied infrastructure facts. This reduces the availability of protective intermediary controls, and the hosting arrangement should be regarded only as an infrastructure characteristic—not as evidence of legitimacy.

EVIDENCE

- Network resolution: 1 unique IP, 0 edge IPs, and 1 likely origin IP were identified.
- Infrastructure: No CDN was detected; the hosting provider is InMotion Hosting, Inc., US.
- Registry and location: Network registration is through ARIN, with the hosting location identified as the US.

Closing Assessment

Sensitive use should be withheld pending independent confirmation of the operator, authorization, and official communication channels; any engagement should remain strictly non-interactive until those checks produce consistent results.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of iglesiaspentecostescentralpandevida.com.

- The request stayed on iglesiaspentecostescentralpandevida.com. It was not redirected to another domain. CLEAR
- Registration is published under NameCheap, Inc.. CLEAR
- DNS for this domain is served by safededicatesserver.com, across 2 name servers. NOTED
- The registration is paid up to 2026-10-25. NOTED
- The earliest public archive of this site is from 2020-08-08. CLEAR
- It is hosted on INMOTION, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about iglesiaspentecostescentralpandevida.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
