Full analysis

Overview

A Serbian-language ecommerce storefront, igricekonzole.com presents a catalogue of Sony PlayStation, Xbox, Nintendo, PC games, consoles, controllers, and related accessories with prices in Serbian dinars; its apparent business model is direct retail sales of physical gaming products supported by advertising and consent-management integrations.

Scam/Impersonation Risk

No contradictions were observed. The available evidence contains no confirmed blacklist, phishing, impersonation, or conflicting-identity signal, and the site's presentation is consistent with an ordinary gaming-retail storefront rather than a credential-harvesting page. The evidence therefore supports a low scam/impersonation concern, while not independently proving the real-world operator's identity.

EVIDENCE

- The homepage displays a substantive product catalogue covering consoles, games, and accessories, with visible pricing and no login or password-collection form.
- External checks recorded no malicious blacklist or abuse-report finding, and no broker-dataset match was identified.
- The domain is recorded as registered on 2016-11-17 and approximately 9.76 years old.
- Historical records show 115 snapshots spanning 2016-12-26 through 2026-05-21 across 11 tracked years.

Regulatory Verification Notes

The site appears to operate as a conventional online retailer, and the available content does not present a claimed financial, investment, or other regulated service. However, the supplied storefront evidence does not independently establish the merchant's legal identity, and no license or registration number is presented. This is a transparency and consumer-verification matter rather than evidence of a scam. The overall legitimacy assessment is nevertheless supported by the domain's long-established registration, sustained historical presence, known registrar, valid transport encryption, substantive commercial content, and clean available reputation signals.

EVIDENCE

- Domain registration is through GoDaddy.com, LLC; the recorded creation date is 2016-11-17 and the expiry date is 2026-11-17.
- The site is served from AS212531, Interneto-vizija - UAB _Interneto vizija_, LT.
- TLS uses issuer YR1 with DV validation and is valid to 2026-10-18.
- The homepage contains approximately 67,399 characters of substantive Serbian-language catalogue content and two non-sensitive forms: contact and newsletter.

What to Verify Next

Before credential or payment interaction, an independent merchant-identity check should connect the storefront to a legal business and a reachable physical or commercial presence. The applicable consumer protections should also be confirmed, including written return and warranty terms, delivery conditions, payment-provider protection, and an independently validated official contact route. If local law requires retail registration or consumer-facing disclosures, those details should be checked against the relevant registry or authority.

EVIDENCE

- The homepage provides product listings and prices but does not independently establish the operator's legal identity.
- The available contact functionality supports follow-up verification of merchant details, fulfilment terms, and after-sales support.
- The site uses a privacy and consent-management interface with numerous advertising vendors, so consent and marketing preferences should be reviewed before submission.

Summary Verdict

Available evidence supports an established, apparently legitimate, low-risk ecommerce site. The high-trust posture is grounded in converging domain, historical, technical, content, and reputation signals, while the real-world operator remains unverified; legitimacy should therefore be treated as evidence-consistent rather than proven.

Infrastructure Integrity

The site resolves to one identified hosting address operated by Interneto-vizija - UAB _Interneto vizija_, in Lithuania, with no CDN or edge-IP layer detected. This provides clear hosting attribution, although the infrastructure does not supply an additional CDN/WAF mitigation layer.

Closing Assessment

Normal browsing is proportionate to the assessed posture; before entering credentials or making a purchase, ordinary independent checks of merchant identity, return protections, and payment safeguards should be completed.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about igricekonzole.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
