

# Is ihost.cl legit? TrustSniffer's high-trust assessment: 80/100

ihost.cl

## Verdict

80

OUT OF 100

HIGH TRUST

ihost.cl appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

Marketing and product landing page for a Chile-based web hosting provider (iHost). Describes plans, pricing, datacenter location, security features, support, migration and payment options. Clear commercial call-to-action to purchase hosting or contact sales.

## Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
  - Module-level completeness metadata is unavailable for this legacy report.

## At a glance

## Key findings

---

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2007.
- No flags from the reputation services TrustSniffer consulted at assessment time.

## Full analysis

---

### Overview

iHost is a Chile-focused commercial web-hosting provider offering subscription hosting plans and related services such as domain support, migration, backups, technical assistance, and online payment. Its homepage presents Santiago-based datacenter hosting using NVMe storage and LiteSpeed, alongside claims including 99.9% uptime, 24/7 support, more than 10,000 active customers, and over 25 years of experience.

### Scam/Impersonation Risk

No contradictions were observed. The site's commercial purpose, product presentation, payment options, support pathways, and customer login flow are consistent with an established hosting business, and the supplied analysis found no phishing, brand-impersonation, malicious-content, or blacklist indicators. The marketing counters and service claims are not independently substantiated by the supplied evidence, but they do not create an identity conflict or a scam pattern. The available evidence therefore supports an apparently legitimate, low-risk website while leaving the real-world operator identity short of independent verification.

#### EVIDENCE

- The homepage presents a coherent hosting-provider business model with plans, support, migration, payment, and customer-account pathways.
- Historical records show 805 archive snapshots spanning 2007–2026, covering 20 tracked years, with no suspicious repurposing or semantic drift detected.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no blacklist or phishing result for the domain.

### Regulatory Verification Notes

iHost appears to operate as a conventional hosting and ecommerce provider rather than a business presenting regulated financial services. The supplied pages describe pricing, service features, support, and payment arrangements, but the available evidence does not establish a licensing number, regulator, or independently verified corporate authorization; this is a transparency point for ordinary merchant due diligence, not evidence of impersonation or fraud. The domain registration record identifies CASAMAYOR Y MIRALLES LIMITADA and NIC Chile, which is useful registration context, although it does not independently prove that the current website operator is that legal entity. Transport security is present at the domain level through a valid domain-validated certificate.

#### EVIDENCE

- The domain was registered in 2009; the reconciled domain age is 19.17864476386037 years.
- The domain registration record lists NIC Chile as registrar and CASAMAYOR Y MIRALLES LIMITADA as registrant.
- The site is served from AS396982, Google Cloud Platform / Google LLC, US.
- The TLS certificate is issued by WR3, uses DV validation, and is valid to 2026-09-13T21:58:23+00:00.

#### What to Verify Next

Before credential or payment interaction, an organization should independently confirm that the contracting entity named in the order or terms process corresponds to the business intended for engagement. It should also review renewal, cancellation, refund, service-level, backup, and data-handling terms, confirm payment-protection arrangements for the selected method, and validate official support channels through an independent route. If a local registration or sector-specific authorization is relevant to the procurement decision, that status should be checked directly with the appropriate Chilean registry or authority.

#### EVIDENCE

- The homepage provides commercial calls to action for purchasing hosting and contacting sales.
- The site exposes separate internal paths for plans, contracting, login, contact, frequently asked questions, and client areas.
- Payment references include WebPay, PayPal, card payment, and bank transfer, creating identifiable points for transaction and merchant verification.

#### Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a **high-trust, low-risk posture**. The site's identity connection is likely but not independently verified, so legitimacy should be understood as evidence-consistent rather than proven beyond the website and registration record.

#### Infrastructure Integrity

The site resolves to two likely origin IPs in Google Cloud Platform, with no CDN detected and no edge-IP layer identified. This is a conventional cloud-hosting arrangement and provides some infrastructure stability, but hosting architecture alone is only a mitigating technical signal and does not establish operator legitimacy.

#### Closing Assessment

Ordinary browsing is proportionate to the assessed posture; before entering credentials or making payments, standard independent merchant-identity, contractual, and payment-protection checks should be completed.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

#### What the analysis found

No rule findings contributed to this verdict.

## Identity verification

|                                  |        |
|----------------------------------|--------|
| Status                           | LIKELY |
| Identity score                   | 76/100 |
| Identity verification confidence | 76%    |

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

## What TrustSniffer observed

First-party facts recorded during the assessment of ihost.cl.

- The request stayed on ihost.cl. It was not redirected to another domain. CLEAR
- Registration is published under NIC Chile. CLEAR
- DNS for this domain is served by 104.64), across 6 name servers. NOTED
- The registration is paid up to 2031-09-17. CLEAR
- The earliest public archive of this site is from 2007-06-07. CLEAR
- It is hosted on GOOGLE-CLOUD-PLATFORM, from a server in US. NOTED

## About this assessment

---

A trust score summarises the evidence TrustSniffer could collect about ihost.cl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
