

Is ikonservices.net legit? TrustSniffer's high-trust assessment: 90/100

ikonservices.net

Verdict

90

OUT OF 100

HIGH TRUST

ikonservices.net appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

Spanish-language corporate landing site for IKON, a software company offering ERP, medical and veterinary management platforms, electronic invoicing and custom development. Presents features, contact channels, phone numbers and an inquiry form.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2007.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

IKONservices.net is a Spanish-language corporate software website presenting IKON as a provider of ERP, medical and veterinary management platforms, electronic invoicing, inventory control, and bespoke software development, with sales inquiries, technical support, and consulting as its apparent business model.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, malware, or identity-contradiction signals were observed. The homepage presents a coherent software-services model rather than financial solicitation, including IKONMedic for clinical records and scheduling, IKONFactura for invoicing and inventory management, IKON ERP for accounting and payroll, and IKON Vet for veterinary administration. The site uses a standard contact form without a login flow, hidden forms, wallet connection, external password submission, or suspicious browser behavior. Historical domain references show continuity without evidence of suspicious repurposing, although the available records reflect a current registration record that is newer than the historical domain references. Overall, the available evidence is consistent with an established, apparently legitimate corporate website, while the real-world operator remains independently unverified.

EVIDENCE

- The homepage identifies IKON as a software provider and presents medical, veterinary, ERP, invoicing, inventory, and custom-development services; no fraud indicators were reported.
- The homepage contains one contact form and no login form, hidden form, external password submission, wallet activity, cloaking, or clipboard-hijacking behavior.
- Historical records show first-seen date 2007-05-04, last-seen date 2019-10-22, 37 snapshots across 13 tracked years, and an archive-reconciled domain age of 19.29637234770705 years; the current registration record shows creation date 2026-02-20 and age 0.5 years.

Regulatory Verification Notes

The website appears to operate as a software vendor rather than a financial or otherwise regulated service. Its privacy-policy and support areas provide ordinary corporate-service disclosures, but the supplied content does not establish the legal entity behind IKON independently. No license claim, licensing authority, or registration number is presented; for this business model, that is a transparency and commercial due-diligence point rather than evidence of misconduct. External reputation checks found no reported abuse indicators, and no broker-dataset match was identified. The available evidence therefore supports a high-trust posture without independently proving the operator's identity.

EVIDENCE

- The homepage and navigation identify "IKON," "Soporte Técnico," and "Política de privacidad," with product and service descriptions focused on software licensing, development, support, and consulting.
- The homepage's technical content was served successfully with stable behavior across two runs and no external network activity or suspicious script indicators.
- The site is hosted on AS51167 (CONTABO - Contabo GmbH, DE); its TLS certificate is issued by YE2, uses DV validation, and is valid to 2026-10-22T07:03:18+00:00.

What to Verify Next

Before credential or payment interactions, an enterprise customer should independently confirm the contracting entity, obtain formal commercial terms, and review applicable privacy, service-level, support, cancellation, and payment-protection provisions. The stated electronic-invoicing functionality should be checked against the relevant local requirements and any applicable authority records. Contact details should be validated through an independent business directory, prior commercial documentation, or an offline channel before material commitments are made.

EVIDENCE

- The contact page presents phone numbers and an inquiry form but does not independently establish the contracting entity.
- The product pages describe electronic invoicing, medical records, payroll, accounting, inventory, and veterinary-management functions that may require contractual clarification regarding support, data handling, and compliance responsibilities.
- The site's privacy-policy and support links provide useful starting points for reviewing service and data-management terms.

Summary Verdict

The overall posture is **high trust and low risk**, with the website's content, behavior, historical continuity, and clean available reputation converging on an apparently legitimate established site. The classification is not equivalent to independent proof of the real-world operator, so legitimacy should be understood as evidence-consistent rather than conclusively verified.

Infrastructure Integrity

The site resolves directly to infrastructure operated by Contabo GmbH in Germany, with no CDN or WAF layer detected and one likely origin address. This is a conventional hosting arrangement and does not itself indicate malicious activity; the absence of an identified protective edge layer simply means that infrastructure-level shielding is not a material mitigating feature here.

EVIDENCE

- Resolved hosting: 1 unique IP, 0 edge IPs, and 1 likely origin IP; CDN detected: false.
- Hosting provider: CONTABO - Contabo GmbH, DE; ASN: AS51167; registry: RIPE NCC; country: DE.

Closing Assessment

Normal business evaluation is proportionate, provided that merchant identity, contractual terms, and payment protections are confirmed through independent channels before credentials or payments are submitted.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ikonservices.net.

- The request stayed on ikonservices.net. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2027-02-20. NOTED
- The earliest public archive of this site is from 2007-05-04. CLEAR
- It is hosted on CONTABO, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ikonservices.net at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
