

Is ilec.es safe? TrustSniffer's low-trust assessment: 40/100

ilec.es

Verdict

40

OUT OF 100

LOW TRUST

ilec.es is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-22 by automated analysis. Classification confidence 55%.

What this site appears to be

Small Spanish-language local electrician and climate control business site describing residential, commercial and industrial services, contact information, and cookie/privacy notices.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What ilec.es served when TrustSniffer captured it on 2026-08-22. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2019.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

ilec.es is a Spanish-language local services website for “ilec – Electricidad y Climatización,” presenting residential, commercial, and industrial electrical, air-conditioning, extraction, cooling, repair, installation, maintenance, and electrical-certificate services. Its apparent business model is local contracting and paid service work for customers in Murcia and the surrounding area.

Scam/Impersonation Risk

The site’s content presents as a conventional small-business electrician and HVAC service website, with no observed login page, sensitive form, wallet connection, cryptocurrency feature, investment offer, or obvious brand-impersonation mechanism. However, this benign presentation conflicts with external threat intelligence that records malicious detections and a confirmed blacklist status from multiple sources. Historical records show continuity from 2019 through 2025 and no suspicious category repurposing, but that provenance signal does not offset the confirmed external reputation concern. No conflicting legal-entity names or direct impersonation indicators were observed on the reviewed pages.

EVIDENCE

- External reputation checks recorded 2 malicious detections and a confirmed blacklist status.
- Archive records contain 37 snapshots spanning 2019–2025, covering 7 years of tracked history.
- The homepage describes electrical and climate-control services and was assessed without phishing indicators, login forms, or sensitive submission forms.

Regulatory Verification Notes

The homepage links to an Aviso Legal, privacy policy, and cookie policy, but the supplied page content does not establish a verified real-world operator identity or disclose a licensing authority and license number. That is a regulatory and transparency matter rather than, by itself, proof of fraud. The site's apparent local-trades business model is consistent with paid service calls, installations, repairs, and maintenance contracts. No broker match was identified in the available third-party reputational context.

EVIDENCE

- Legal and compliance links are visible in the site navigation as “Políticas de Privacidad,” “Aviso Legal,” and “Política de cookies.”
- The supplied business disclosures contain no license authority or license number.
- Hosting resolves through AS12338, EUSKALTEL - Euskaltel S.A., ES; the transport certificate is issued by YR2, uses DV validation, and expires on 2026-11-14.
- Registration continuity is approximately 7.0 years, with the first recorded archive date of 2019-08-22.

What to Verify Next

Before any sensitive engagement, the prospective counterparty should confirm the business's legal name, address, and applicable Spanish or regional trade authorisations through an official registry or an independently sourced offline contact route. Payment arrangements, quotations, warranty terms, and any request for customer information should be checked against independently obtained business details rather than relying solely on the website. Official social profiles and contact channels should also be confirmed through an independent route.

EVIDENCE

- The homepage identifies the business as “ilec – Electricidad y Climatización” and references work in Murcia, Bullas, and local or regional areas.
- The site links to Twitter and Facebook but the supplied material does not independently verify those profiles.
- No sensitive form or external payment destination was observed during the reviewed site interaction.

Summary Verdict

The overall posture is **low trust with elevated risk for sensitive interaction**. The site appears substantively consistent with a small local electrical and HVAC business, but the confirmed external reputation contradiction materially outweighs the otherwise ordinary content and stable technical presentation. Identity linkage is likely rather than independently verified, so the website should not be treated as a proven representation of the purported operator.

Infrastructure Integrity

The site uses CDN/WAF protection, with observed edge servers in AS8560 and resolved hosting associated with EUSKALTEL in Spain. The infrastructure was stable and provides a mitigating layer against routine network exposure, but protective hosting controls do not validate the site's legitimacy or resolve the external reputation concern.

Closing Assessment

Pending independent resolution of the external detections and confirmation of the operating business, engagement should remain limited to non-sensitive informational review; credentials, payments, and contractual commitments should require independent counterparty validation.

Written analysis generated 2026-08-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

- 01

Governance Risk
 - The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02

Sensitive Interaction Risk
 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ilec.es.

- The request stayed on ilec.es. It was not redirected to another domain.

CLEAR
- The earliest public archive of this site is from 2019-08-22.

CLEAR
- It is hosted on EUSKALTEL, from a server in ES.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ilec.es at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
