## Key findings

---

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2017.
- No flags from the reputation services TrustSniffer consulted at assessment time.

## Full analysis

---

### Overview

iMarketers Hosting is a commercial web-hosting service presenting annual shared-hosting plans, setup assistance, WordPress installation, control-panel access, and customer support for individuals and businesses managing websites.

### Scam/Impersonation Risk

No brand-impersonation, phishing, blacklist, or other contradictory signals were observed. The homepage presents a coherent hosting business model with annual Single and Unlimited plans priced at \$49.95 and \$69.95, supported by concrete services including WordPress installation, Softaculous, cPanel access, free setup, and personal support. The absence of sensitive forms, wallet activity, cloaking, or hidden forms further supports the assessment that the site is suitable for normal interaction.

- The homepage describes the hosting plans, pricing, service features, and support model.
- Behavioral testing recorded no login form, hidden form, wallet connection, clipboard hijacking, or cloaking.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no blacklist hit.
- The domain was registered in 2018 and is approximately 7.91 years old.

### Regulatory Verification Notes

The site operates as a commercial hosting provider rather than presenting a regulated financial service, and no licensing claim is made. Its legal and regulatory disclosure position is therefore a minor transparency matter rather than an indication of deception. The domain has sustained historical continuity, and its technical identity is consistent with an established operating website. Registration privacy is an administrative detail.

- The homepage identifies the business as iMarketers Hosting and links its service and policy content.
- The domain has 305 archive snapshots spanning 2017–2026, with 10 years tracked.
- Hosting is provided through AS22612 (Namecheap, Inc., US).
- TLS uses Sectigo Public Server Authentication CA DV R36, with DV validation and validity through 2026-10-15.

### What to Verify Next

Before entering into a larger commercial commitment, the prospective customer should confirm the provider's current legal entity and service terms through the site's policy pages, and independently confirm any business or consumer-protection requirements applicable to the customer's jurisdiction.

- The homepage provides annual subscription pricing and distinguishes between Single and Unlimited packages.
- The site presents refund, privacy, and service-policy topics among its published content.

- The hosting offer is a recurring SaaS-style subscription rather than a financial product.

Summary Verdict

The site presents as a legitimate, established, and trustworthy web-hosting provider with no observed contradiction or impersonation signal. Normal interaction, including account login and standard account use, is appropriate.

Infrastructure Integrity

The site resolves directly to a Namecheap-hosted origin rather than a detected CDN edge, with infrastructure identified in the United States. This provides a clear technical hosting posture; the presence of standard TLS protection is a mitigating security control, not independent proof of legitimacy.

Closing Assessment

Standard customer onboarding and routine hosting use are appropriate, subject to ordinary review of the applicable service terms before significant commitments.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 25%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of imarketers.co.

- The request stayed on imarketers.co. It was not redirected to another domain. CLEAR
- Registration is published under NAMECHEAP INC. CLEAR
- DNS for this domain is served by imarketers.co, across 2 name servers. NOTED
- The registration is paid up to 2026-09-06. NOTED
- The earliest public archive of this site is from 2017-08-23. CLEAR
- It is hosted on NAMECHEAP-NET, from a server in US. NOTED

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about imarketers.co at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
