## The page as captured

<https://immersivetech.sg/>

# Unlock the

What immersivetech.sg served when TrustSniffer captured it on 2026-08-22. The page may look different now.

## Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

## Full analysis

### Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

ImmersiveTech.sg presents itself as the corporate website of Immersive Tech Pte. Ltd., offering enterprise digital-transformation consulting, custom software development, and managed technology services across artificial intelligence, robotic process automation, analytics, cybersecurity, and systems integration.

### Scam/Impersonation Risk

The site's polished corporate presentation and absence of visible login, payment, or overt phishing elements do not resolve the more consequential external findings. The domain is reported as blacklisted by external sources, with 11 malicious detections and threat flags from two major security vendors; the deterministic assessment treats these findings as a confirmed contradiction requiring a security-forward posture. No conflicting legal-entity names or direct brand-impersonation indicators were identified on the reviewed pages, but the external malicious detections remain materially inconsistent with ordinary trusted-site expectations.

#### EVIDENCE

- External reputation assessment recorded 11 malicious detections and flags from two Tier-1 security vendors.
- The domain was identified by external blacklist sources, with the associated protective response activated.
- Registration records show a multi-year domain history: registered 2020-09-23, approximately 5.91 years old, through Key-Systems GmbH.

#### Regulatory Verification Notes

The homepage describes a conventional B2B consultancy and names services including AI, RPA, data analytics, cybersecurity, system integration, and custom development. The site presents the name “Immersive Tech Pte. Ltd.” and contact details, but the available evidence does not independently verify that legal identity, and the site does not state a regulatory license or registration number. This is a disclosure and verification gap rather than, by itself, proof of fraud. The site’s business model appears to involve service contracts, project fees, and retained consulting engagements; the external security findings nevertheless require the corporate claims to be treated as unverified until independently corroborated.

#### EVIDENCE

- The homepage identifies the business as “Immersive Tech Pte. Ltd.” and describes enterprise consulting and managed-service activities.
- The reviewed site contains one contact form and publishes address, telephone, and email contact details; no login or payment flow was visible.
- The site does not present a license authority or license number in the reviewed content.

#### What to Verify Next

Before any sensitive engagement, the proposed counterparty should be independently confirmed through the applicable corporate registry and, where relevant to the contracted service, the appropriate professional or sector regulator. Contact details should be validated through an independently sourced corporate record or offline channel rather than relying solely on the website. Security teams should also obtain a fresh, independent assessment of the domain and any files, redirects, or communications associated with it before allowing corporate access or exchanging confidential material.

#### EVIDENCE

- The site’s stated legal identity is not independently verified by the available evidence.
- External security findings conflict with the otherwise conventional corporate-service presentation.
- The observed site behavior included two non-whitelisted external posts and two non-whitelisted external XHR requests across two successful runs.

#### Summary Verdict

The overall posture is **critical risk for sensitive interaction**. The website appears professionally structured and commercially plausible at the content level, but that presentation is outweighed by confirmed external malicious

and blacklist findings, leaving the site’s legitimacy and safe operational use unresolved.

Infrastructure Integrity

The site is served through CDN/WAF-protected infrastructure, which provides a mitigating layer against direct exposure but does not establish legitimacy or neutralize the external threat findings. The observed infrastructure exposes an edge address rather than an independently verifiable origin, limiting direct hosting attribution.

EVIDENCE

- Served from AS26496, operated by AS-26496-GO-DADDY-COM-LLC / GoDaddy.com, LLC, US.
- The observed edge IP was 118.139.178.23 in Singapore; no origin candidate was observed.
- TLS uses a DV certificate issued by GoDaddy TLS Intermediate CA DV - R1v1, valid to 2026-10-22 06:49:30 UTC.

Closing Assessment

Sensitive actions should remain suspended unless independent corporate, regulatory, and technical checks produce a clear resolution of the adverse security findings. Any future engagement should be limited to a controlled, approved process with monitoring and no access to credentials, confidential information, or financial workflows until that resolution is documented.

Written analysis generated 2026-08-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.  
Registration and ownership rule:KF\_WHOIS\_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.  
Analysis engine signal:direct\_threat
- The page sent data to a destination TrustSniffer does not recognise.  
Behaviour in a sandbox rule:BEHAV\_NONWHITELISTED\_POSTS
- The structure of the page changed sharply while it was loading.  
Behaviour in a sandbox rule:BEHAV\_DOM\_DENSITY\_SPIKE
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.  
External reputation rule:EXT\_BLACKLIST\_CRITICAL

## Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 50%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

## What TrustSniffer observed

First-party facts recorded during the assessment of immersivetechnology.sg.

- The request stayed on immersivetechnology.sg. It was not redirected to another domain. CLEAR
- Registration is published under Key-Systems GmbH. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2026-09-23. NOTED
- The earliest public archive of this site is from 2021-12-08. CLEAR
- It is hosted on AS-26496-GO-DADDY-COM-LLC, from a server in SG. NOTED

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about immersivetechnology.sg at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
