Full analysis

Overview

impcc.edu.pk presents itself as the official website of Islamabad Model Postgraduate College of Commerce H-8/4, Islamabad. It provides institutional information on admissions, intermediate and BS programmes, examinations, faculty, facilities, news, and contact channels, consistent with an educational institution funded through tuition or college fees and institutional support.

Scam/Impersonation Risk

No contradictions were observed. The homepage and navigation describe a coherent college purpose rather than investment, cryptocurrency, high-yield, gambling, or other high-risk commercial activity. The site has no observed login form, hidden form, credential-harvesting mechanism, wallet connection, suspicious script behavior, or detected brand-impersonation pattern. Available external reputation checks returned no malicious or suspicious detections, and no abuse reports or third-party broker match were recorded. This supports an apparently legitimate, low-risk website, while the real-world operator identity remains likely rather than independently proven.

EVIDENCE

- The homepage identifies Islamabad Model Postgraduate College of Commerce H-8/4 Islamabad and presents admissions, courses, faculty, facilities, news, and contact functions.
- Browser testing recorded no login form, hidden form, password submission to an external destination, wallet interaction, clipboard manipulation, cloaking, or suspicious inline script.
- The domain registration record shows creation on 2019-06-27, an age of 7.15 years, and expiry on 2027-06-27.
- Historical records show 44 archive snapshots from 2017-10-09 through 2026-03-11, covering 10 years.

Regulatory Verification Notes

The About, admissions, faculty, and contact materials provide a consistent institutional presentation, and the site links to Facebook, Instagram, LinkedIn, Twitter, and YouTube profiles. The supplied pages do not display a licensing number or formal registration reference for the college; this is a verification and disclosure gap rather than evidence of deception. The available third-party reputation context contains no broker match, and the site's academic-domain presentation is consistent with its stated educational purpose. Operator identity should therefore be described as apparently legitimate and evidence-consistent, not independently verified.

EVIDENCE

- The site's About, Faculty, Admissions, and Contact areas present the same college identity and educational purpose.
- Five social-platform links are exposed in the site navigation: Facebook, Instagram, LinkedIn, Twitter, and YouTube.
- Hosting infrastructure is served from AS24940 (Hetzner Online GmbH, DE).
- TLS uses issuer YR2 with DV validation and is valid to 2026-10-27T13:16:00+00:00.

What to Verify Next

Before submitting personal information or making an education-related payment, an institution or payment provider should independently confirm the college's legal and academic standing through the relevant Pakistani education authority or an offline institutional contact route. The admissions and college-dues processes should be checked for the named fee recipient, official payment account, refund terms, and receipt process. Contact details should also be validated through an independently sourced institutional directory rather than relying solely on the website.

EVIDENCE

- The Admissions area includes an admission-form link, indicating an online application workflow.
- The Courses area lists Intermediate and BS programmes, including a BS admission pathway.
- The College dues area indicates that fee-related information is presented on the site.
- The Contact area provides a direct institutional communication channel for independent confirmation.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate educational website with a high-trust, low-risk posture. No scam, phishing, impersonation, or identity-contradiction indicators were observed, although the operator’s real-world identity is not independently verified.

Infrastructure Integrity

The site is protected by a CDN/WAF layer, and the observed address belongs to AS24940, Hetzner Online GmbH, Germany. This protective network arrangement reduces direct exposure of the web service and is a mitigating technical control, but it is not by itself proof of institutional legitimacy.

Closing Assessment

Ordinary informational use is proportionate to the evidence; credential submission or payment should proceed after the institution, fee recipient, refund terms, and payment protections have been independently confirmed.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about impcc.edu.pk at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
