

Is impressds.com safe? TrustSniffer's low-trust assessment: 40/100

impressds.com

Verdict

40

OUT OF 100

LOW TRUST

impressds.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-22 by automated analysis. Classification confidence 75%.

What this site appears to be

Company website for Impress Digital Solutions and Consultancy describing services (web, mobile, software, branding, marketing), listing regional offices and contact details. No ecommerce, login, or financial product offerings present.

Evidence status and limitations

Evidence completeness:

UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What impressds.com served when TrustSniffer captured it on 2026-08-22. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2007.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

This website presents itself as Impress Digital Solutions and Consultancy, a regional business-to-business digital-services agency offering web and mobile development, software development, technical consulting, branding, online marketing, video production, and network and security services for government entities, companies, and individuals. Its apparent business model is based on project work, service contracts, and consultancy engagements rather than ecommerce, financial products, or consumer account services.

Scam/Impersonation Risk

The principal risk is external rather than a deceptive mechanism visible in the reviewed pages. Four malicious detections were recorded, and the domain is blacklisted by the evaluated threat-intelligence and blacklist sources; this is a material contradiction that outweighs the otherwise conventional corporate presentation. The website itself showed no login form, sensitive submission form, wallet connection, cloaking, or brand-impersonation indicator, and its published content contained no identified red flags. Historical records show sustained domain activity, but that continuity does not invalidate the current external threat findings. The appropriate posture is therefore to treat sensitive interaction as unsafe pending independent resolution of the reputation issue.

EVIDENCE

- External reputation telemetry recorded 4 malicious detections, with the domain marked blacklisted by two evaluated sources.
- Web-archive records contain 555 snapshots spanning 2007–2026, covering 20 tracked years.
- The homepage rendered successfully and showed no login form, hidden sensitive form, wallet connection, or cloaking behavior.

Regulatory Verification Notes

The homepage and navigation identify the business as Impress Digital Solutions and Consultancy and describe a conventional technology-services operation. The reviewed content does not claim a financial-services license or provide a license number; for the stated consultancy model, this is a disclosure gap requiring confirmation rather than independent evidence of fraud. Real-world operator identity remains unverified, and the private registration record is an administrative limitation rather than an identity contradiction. The domain was registered through GoDaddy.com, LLC, while the transport certificate is domain-validated, so neither registration administration nor TLS validation independently establishes the legal entity behind the site.

EVIDENCE

- Domain registration telemetry: registered 2017-01-18; age 9.59 years; registrar GoDaddy.com, LLC.
- The homepage identifies “Impress Digital Solutions and Consultancy” and lists service categories including web, mobile, software, branding, and marketing work.
- TLS telemetry: certificate issuer YR1; validation level DV; valid to 2026-11-07T07:12:39+00:00.
- Reviewed corporate content contains no stated license authority or license number.

What to Verify Next

Before any contractual, payment, credential, or other sensitive engagement, an independent corporate-registry search should confirm the legal entity corresponding to the name used on the About and Contact pages. Listed regional offices and contact channels should be validated through an independently sourced telephone number or business directory, and client references should be confirmed outside the website. The blacklist and malicious-detection findings should also be resolved with the relevant security or hosting contacts before the domain is permitted in enterprise workflows.

EVIDENCE

- About and Contact pages: reconcile the displayed company name, office details, and responsible legal entity against an authoritative registry.
- Contact page: validate the published business channels through an independently obtained route rather than relying solely on the website.
- Portfolio and client references: confirm representative engagements directly with the named organizations.
- Domain reputation records: obtain a current remediation explanation and confirmation of resolution for the recorded threat detections.

Summary Verdict

The website has a conventional corporate-services presentation and some technically stable characteristics, but the confirmed external reputation contradictions produce a low-trust assessment with elevated risk for sensitive interaction. Apparent business legitimacy is not sufficient to support credential use, financial engagement, or other actions requiring confidence in the site’s current integrity.

Infrastructure Integrity

The site is protected by CDN/WAF infrastructure, which is a mitigating control against direct exposure and can improve resilience, but it is not proof of legitimacy and does not offset the external reputation findings. The observed serving infrastructure is associated with Hetzner Online GmbH in Germany; origin-server verification was not available because only the protected edge was observed.

EVIDENCE

- Hosting telemetry: served from AS24940, HETZNER-AS – Hetzner Online GmbH, DE.
- Infrastructure observation: 1 edge IP was observed, with 0 likely origin IP candidates.

Closing Assessment

Enterprise security controls should restrict the domain to passive, read-only observation until the reputation findings and operator identity have been independently resolved; sensitive interaction should remain disabled in the interim.

Written analysis generated 2026-08-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of impressds.com.

- The request stayed on impressds.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by enghosting.com, across 2 name servers. NOTED
- The registration is paid up to 2027-01-18. NOTED
- The earliest public archive of this site is from 2007-09-05. CLEAR
- It is hosted on HETZNER-AS, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about impressds.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
