

Is impressum-generator.de legit? TrustSniffer's high-trust assessment: 100/100

impressum-generator.de

Verdict

100

OUT OF 100

HIGH TRUST

impressum-generator.de appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-10 by automated analysis. Classification confidence 55%.

What this site appears to be

German-language website offering an Impressum generator and guidance on legal website texts (Impressum, Datenschutz). Monetized through affiliate links and an optional premium service; includes comment form and generator input. Editorial/legal resource with privacy notices and cookie consent.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	None flagged it VirusTotal	CLEAR
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	45% confidence AbuseIPDB, 56 reports; shared hosting inflates reports	CLEAR

Key findings

- Automated classification: Not Scam.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

This German-language website provides a free Impressum generator and editorial guidance on website legal texts, including privacy notices and DSGVO-related content. Its apparent business model combines informational articles and user-entered document-generation tools with affiliate referrals and an optional paid premium service.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence: there is no phishing, brand-impersonation, malicious-content, or conflicting-identity finding. The site's content is consistent with an informational legal-resource service, and its forms comprise a document generator and comment form rather than a login or externally submitted password form. A reputational signal exists at the infrastructure level: 56 abuse reports were associated with the observed address, but the attribution identifies shared provider infrastructure, so the reports do not establish misconduct by this website. The contact-channel evidence also contains one deliverability-breaking address anomaly, "info@impressum-generator.come", which is a contact-channel integrity issue and could reflect a typo or possible typosquat, but it is not a confirmed scam indicator in the absence of contradictory signals.

EVIDENCE

- The homepage presents legal-resource content and a document-generation function; no phishing, brand-impersonation, or other red-flag finding was recorded.
- The observed address 141.193.213.10 is associated with 56 abuse reports, attributed to shared infrastructure rather than specifically to the website.
- Behavioral testing recorded no external network activity, no hidden forms, no password submissions, no wallet activity, and no cloaking.

Regulatory Verification Notes

The site appears to operate as an informational and commercial legal-content service rather than presenting itself as a regulated financial entity. The homepage states that the service is provided by WebsiteWissen.com, references legal texts from Kanzlei Hasselbach in Bonn, and claims use on more than 40,000 websites; these are on-site representations and do not independently prove the operating entity or the referenced relationship. No license or registration number is presented in the supplied content. For this type of service, that is a disclosure and applicability point for verification, not evidence of fraud. The available third-party context produced no broker-reputation match.

EVIDENCE

- The homepage claims “Auf mehr als 40.000 Websites aktiv” and identifies the service as being provided by WebsiteWissen.com.
- The homepage references “Rechtstexte von Kanzlei Hasselbach, Bonn”; the relationship is not independently established by the supplied evidence.
- Hosting telemetry records AS209242, CLOUDFLARESPECTRUM - Cloudflare London, LLC, US.
- The site's TLS certificate is issued by YE2, uses Domain Validation (DV), and is valid to 2026-10-24T14:07:03+00:00.

What to Verify Next

Before a paid engagement or submission of credentials, an organization should confirm the operating entity and any authorization applicable to the specific legal or premium service through an appropriate German business or professional register. Independent confirmation of the stated provider relationships, cancellation and return terms, official support channels, and payment protections should also be completed through sources not controlled solely by the website.

EVIDENCE

- The site's identity verification status is likely rather than independently verified, supporting an external confirmation of the operating entity.
- The optional paid service makes independent review of payment protection, cancellation, and service-delivery terms appropriate.
- The site provides social-presence links across Facebook, WhatsApp, LinkedIn, Twitter, and Pinterest, which can support—but not replace—independent channel validation.

Summary Verdict

The website has a **high-trust, low-risk posture** and the available evidence is consistent with an established, apparently legitimate informational service. No scam or impersonation contradiction was identified. The real-world operator identity remains likely rather than independently verified, so the trust conclusion should not be treated as proof of ownership or affiliation.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, with observed addresses functioning as edge services and no origin candidate identified. This reduces direct exposure of the underlying service and is a mitigating technical control, but it is not by itself proof of legitimacy.

EVIDENCE

- Observed edge IPs are 141.193.213.10 and 141.193.213.11.
- The infrastructure resolved through two CDN edge addresses, with 2 unique IPs, 2 edge IPs, and 0 likely origin IPs.

Closing Assessment

Ordinary browsing is proportionate to the available evidence; before credential or payment interactions, the prospective user should complete independent merchant-identity, service-term, cancellation, and payment-protection checks.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 56 reports on hosting IP 141.193.213.10 (WPEngine, Inc., Content Delivery Network), 45% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	78%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of impressum-generator.de.

- The request stayed on impressum-generator.de. It was not redirected to another domain. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- It is hosted on CLOUDFLARESPECTRUM, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about impressum-generator.de at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
