

Is imtoken-ai.com a scam? TrustSniffer's high-risk assessment: 0/100

imtoken-ai.com

Verdict

0

OUT OF 100

CRITICAL RISK

imtoken-ai.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 55%.

What this site appears to be

Page contains only the single text label 'imToken' with no forms, links, or explanatory content. Treated as a context-free login/brand stub.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

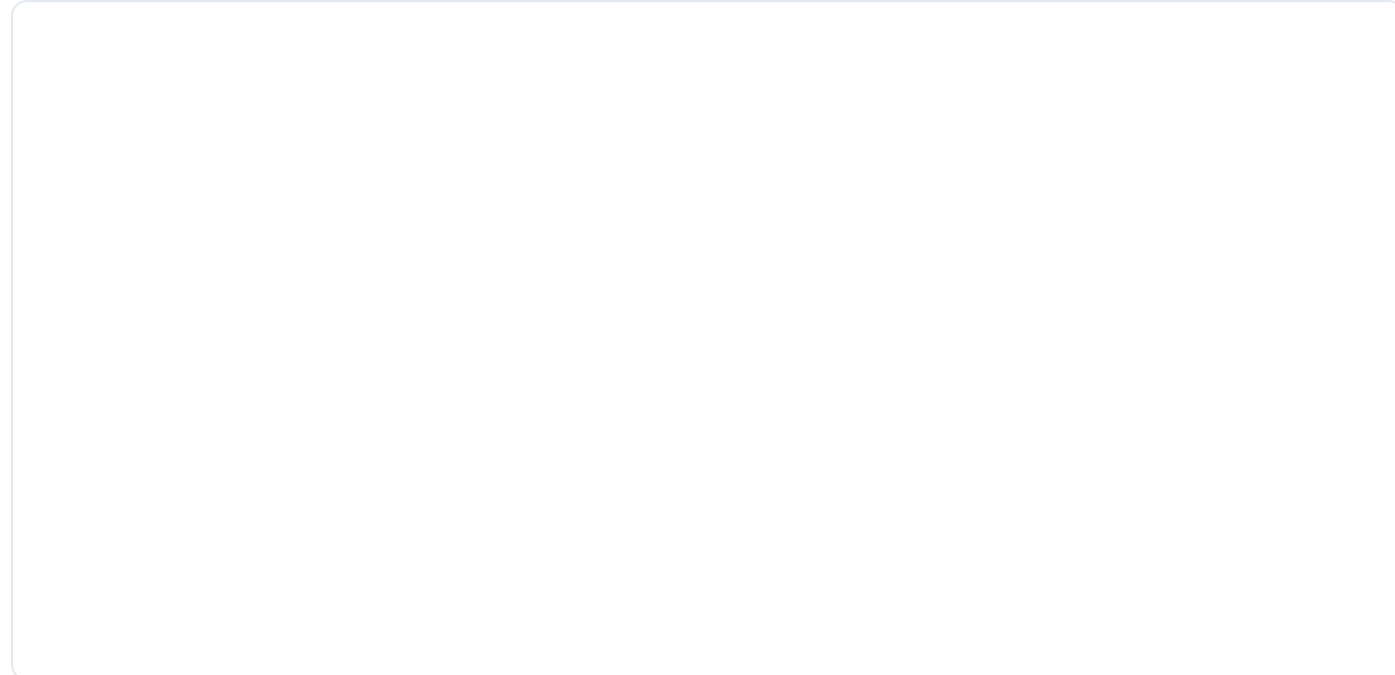

At a glance

The checks that decide most of this verdict.

Malware engines	19 flagged it VirusTotal	RISK

The page as captured

<https://imtoken-ai.com/>

What imtoken-ai.com served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2023.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

imtoken-ai.com presents only the single brand label “imToken” to visitors. It provides no explanatory content, navigation, product description, pricing, contact information, legal disclosure, or visible service context, and therefore appears to function as a context-free login or brand stub rather than a transparently described business website.

Scam/Impersonation Risk

The site presents a critical sensitive-interaction risk. A hard contradiction is present because the domain is blacklisted and has multiple malicious detections from external security assessments. The homepage's brand-only presentation, absence of explanatory context, and login-only/unknown characterization prevent the site from establishing that it is connected to a legitimate imToken service. No separate conflicting legal identities or confirmed brand-impersonation finding was observed, but the blacklist and malicious-detection signals are sufficient to require a strongly cautionary posture.

EVIDENCE

- The homepage contains only the text “imToken,” with no forms, links, explanatory material, or provenance information.
- External reputation assessment recorded 19 malicious detections and a confirmed blacklist status.
- Domain registration telemetry: created 2025-10-02T14:33:33Z; age 0.88 years; registrar Dominet (HK) Limited.
- Archive telemetry: 0 snapshots, first seen 2023-03-30T06:28:08Z, last seen 2026-02-06T09:42:10Z, spanning 4 years tracked.

Regulatory Verification Notes

No legal, corporate, licensing, or regulatory disclosure is presented on the available page. The operator’s real-world identity is unverified, and the absence of a stated business model means that no licensing requirement or regulatory status can be meaningfully assessed from the site itself. This is a material disclosure gap for any service that might request authentication, account access, or financial activity; it should be treated separately from the confirmed external reputation contradiction.

EVIDENCE

- The homepage provides no company name, registered address, license number, regulatory authority, terms, privacy notice, or contact channel.
- The site is hosted on AS134548, DXTL-HK - DXTL Tseung Kwan O Service, HK.
- TLS telemetry: DV certificate issued by YR2, valid through 2026-08-26T15:57:38+00:00, with 6 days remaining at collection.
- No match was recorded in the evaluated third-party broker dataset; this does not establish licensing or regulatory authorization.

What to Verify Next

No sensitive interaction should occur unless the service is independently confirmed through the official imToken organization’s established channels, application distribution records, or a relevant regulatory registry where applicable. Any proposed contact or support route should be confirmed through an independently sourced channel rather than through the site itself. If the domain cannot be independently tied to the legitimate service operator, investigation should remain limited to non-interactive, read-only observation.

EVIDENCE

- The homepage contains no internal links or external links through which an operator, legal entity, or official service relationship can be established.
- The page has no visible login form, sensitive form, wallet interaction, or explanatory service flow, leaving the intended interaction unresolved.
- Technical behavior recorded no external XHR or external POST activity, but this does not mitigate the site’s reputation findings or establish legitimacy.

Summary Verdict

The overall posture is critical, with sensitive interaction risk and governance risk materially outweighing the limited evidence of basic technical availability. Apparent legitimacy is not established, and the site should not be treated as an authenticated channel for the named brand.

Infrastructure Integrity

The site resolves to a single likely origin address, 45.199.64.194, hosted by DXTL-HK - DXTL Tseung Kwan O Service, HK, on AS134548. No CDN or WAF was detected, so there is no identified edge-protection layer providing meaningful mitigation; the valid transport encryption only protects the connection and does not validate the operator or content.

EVIDENCE

- Resolved hosting address: 45.199.64.194.
- Hosting provider and network: AS134548, DXTL-HK - DXTL Tseung Kwan O Service, HK.
- Infrastructure country field: SC; registry: AFRINIC.

Closing Assessment

Prospective users should not log in, submit credentials, connect accounts, or initiate financial activity through this site; any necessary assessment should remain read-only and rely on independently sourced official channels.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, page content, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE
- The page presents a sign-in form, and the operator behind it could not be independently verified.

Page content rule:PAGE_TYPE_LOGIN_UNVERIFIED

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of imtoken-ai.com.

- The request stayed on imtoken-ai.com. It was not redirected to another domain. CLEAR
- Registration is published under Dominet (HK) Limited. CLEAR
- DNS for this domain is served by domainnamedns.com, across 2 name servers. NOTED
- The registration is paid up to 2026-10-02. NOTED
- The earliest public archive of this site is from 2023-03-30. CLEAR
- It is hosted on DXTL-HK, from a server in SC. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about imtoken-ai.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
