

Is inappstory.ru legit? TrustSniffer's high-trust assessment: 100/100

inappstory.ru

Verdict

100

OUT OF 100

HIGH TRUST

inappstory.ru appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 55%.

What this site appears to be

Company marketing site for InAppStory, an established in-app communications and gamification SaaS offering. Page contains product descriptions, formats, case studies, testimonials, links to legal docs, and a contact/demo form.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

ЕДИНАЯ ПЛАТФОРМА ДЛЯ IN-APP

What inappstory.ru served when TrustSniffer captured it on 2026-08-17. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

InAppStory is a commercial SaaS marketing website presenting a platform for in-app communications and gamification, including personalized interactive messages, promotional games, stories, pop-ups, and related engagement formats. Its apparent business model is enterprise lead generation through demonstrations, subscriptions or licensing, and customer contracts.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent commercial SaaS proposition with product descriptions, customer references, legal-document links, pricing and demonstration pathways; content analysis found no phishing indicators, brand-impersonation pattern, or other fraud markers. External reputation checks returned no malicious or suspicious detections, and the site's established traffic presence is consistent with a functioning commercial service rather than a disposable impersonation page. This supports an apparently legitimate, low-risk assessment, while not independently proving the real-world operator's identity.

EVIDENCE

- Homepage: coherent InAppStory product marketing, customer testimonials, product formats, pricing or documentation links, and a demo call to action; no red flags were identified.
- External reputation assessment: 0 malicious detections, 0 suspicious detections, and no phishing or blacklist finding.
- Traffic footprint: ranked 18882 and present in the top 1,000,000 websites globally.

Regulatory Verification Notes

The site operates as a software platform rather than presenting itself in the supplied content as a financial or otherwise regulated service. Its legal-document links and commercial presentation provide useful disclosure substance, but the available evidence does not independently verify the legal entity operating the domain. No license or registration number is presented in the supplied page findings; this is a transparency item for ordinary commercial due diligence, not evidence of a scam. The overall legitimacy picture is nevertheless supported by the site's substantive business content, established registration history, clean reputation findings, and valid transport security.

EVIDENCE

- Domain registration: created 2022-03-17T07:44:07Z, age 4.42 years, registered through RU-CENTER-RU, with expiry on 2027-03-17T07:44:07Z.
- Site legal area: legal-document links are available from the marketing site, while the supplied findings do not identify an independently verified operating entity or license number.
- TLS certificate: issued by GlobalSign GCC R3 DV TLS CA 2020, validation level DV, valid to 2026-10-26T13:20:08+00:00.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm the contracting entity, applicable commercial or sector-specific registration requirements, cancellation and return terms, and available payment-protection arrangements. Contact channels should be confirmed through an independent business record or offline route, and any account access should be initiated only through the institution's independently recorded official domain.

EVIDENCE

- Homepage form analysis: one contact form was identified, with no password field and no untrusted submission destination.
- Behavioral assessment: hidden forms, externally submitted password forms, wallet connections, clipboard manipulation, and cloaking were not detected.

Summary Verdict

The overall posture is **high trust and low risk**. Available evidence is consistent with an established, apparently legitimate website, although the real-world operator identity remains independently unverified.

Infrastructure Integrity

The site resolves through a directly exposed hosting address, with no CDN or WAF detected and no edge-IP layer identified. This is a neutral infrastructure characteristic rather than a fraud indicator; the identified hosting environment and valid TLS provide baseline operational and transport-security support, but protective infrastructure alone does not establish legitimacy.

EVIDENCE

- Hosting: served from AS200350, YandexCloud - Yandex.Cloud LLC, RU; hosting country RU.
- IP posture: 1 unique IP, 0 edge IPs, and 1 likely origin IP; CDN not detected.

Closing Assessment

Ordinary engagement may proceed with proportionate independent checks of the contracting party, commercial terms, and payment protections before sensitive or financially consequential actions.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of inappstory.ru.

- The request stayed on inappstory.ru. It was not redirected to another domain. CLEAR
- Registration is published under RU-CENTER-RU. CLEAR
- DNS for this domain is served by net., across 2 name servers. NOTED
- The registration is paid up to 2027-03-17. NOTED
- It is hosted on YandexCloud, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about inappstory.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
