Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2018.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

IndoCan Honey is a corporate product website for an Indian honey exporter and seller, presenting honey varieties, quality and certification information, bulk, retail and private-label packaging options, and contact details for domestic and international commercial enquiries.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence: there are no phishing indicators, suspected brand-impersonation findings, malicious-behavior findings, or confirmed threat detections. The site behaves as a conventional corporate product website rather than an account, payment, or credential-capture service; testing identified no login form, sensitive form, hidden form, wallet activity, suspicious scripts, cloaking, or external posting behavior. The domain and historical evidence are consistent with an established web presence, although historical archive coverage should be interpreted as incomplete rather than as a short operating history.

EVIDENCE

- Domain registration: 2015-07-29 (~11.07 years old), with registration through BigRock Solutions Ltd.
- Archive records spanning 2018–2025 (8 years tracked), with no suspicious repurposing or semantic-drift finding.
- The homepage is classified as a corporate/product site and contains no detected phishing or brand-impersonation indicators.
- Behavioral testing recorded 2 successful runs, 0 external XHR/fetch requests, 0 hidden forms, and 0 wallet-provider or wallet-drainer activity.

Regulatory Verification Notes

The site presents IndoCan Honey Pvt Ltd as the business, identifies a registered office in Delhi and a processing unit in Haryana, and lists certifications and accreditations including BRC, TSH, FSMA, HALAL, KOSHER, NON-GMO, ISO 22000, SMETA, organic certifications, EIC, USFDA, APEDA, FSSAI, and the National Bee Board. These are substantive on-site corporate and quality claims, but the available evidence does not independently verify the operating entity, the listed certifications, or a specific license or registration number. The apparent legitimacy of the business is therefore evidence-consistent rather than proven by independent operator verification. The absence of a matching third-party broker record is a contextual reputational signal only and is not a regulatory determination.

EVIDENCE

- The homepage identifies “Indocan Honey Pvt Ltd” and provides separate registered-office and processing-unit addresses.
- The product and quality sections list honey varieties, bulk, retail and private-label packaging, together with the stated certification and accreditation set.
- The site’s TLS certificate is issued by YR1 at DV validation level and is valid to 2026-10-12T23:22:53+00:00.
- External reputation checks reported 0 malicious detections, 0 suspicious detections, and no detected phishing or blacklist contradiction.

What to Verify Next

Before a commercial order or payment, an institution should independently confirm IndoCan Honey Pvt Ltd and its stated office and processing locations through authoritative corporate or trade records. Any certification relevant to procurement should be checked directly with the issuing certification or accreditation body, and the applicable food-export permissions should be confirmed with the relevant authority. Payment should use a method with documented buyer protection, while return, fulfilment, and dispute terms should be obtained and retained before transaction approval. Official contact channels should also be confirmed through an independent route.

EVIDENCE

- The contact content supplies named office locations, telephone details, and an email channel for orders and enquiries.
- The available site content describes B2B/B2C sales, exports, and private-label supply but does not show a specific independently verified license or registration number.
- The page analysis found no checkout, login, or sensitive-data form, so transaction arrangements appear to require contact-led coordination.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate, low-risk corporate website. The high-trust classification is supported by convergence across the site's substantive business content, stable technical behavior, long-running domain presence, and clean threat indicators, while the real-world operator remains independently unverified. Normal browsing is appropriate, with ordinary commercial due diligence required before credentials or payments are involved.

Infrastructure Integrity

The site resolves directly to infrastructure operated by Unified Layer in the United States, with no CDN or WAF identified and a likely origin address exposed. This is a conventional hosting posture rather than a threat indicator; the valid TLS deployment provides transport protection, but hosting infrastructure alone does not establish business legitimacy.

EVIDENCE

- Hosted on AS46606 (UNIFIEDLAYER-AS-1 — Unified Layer, US).
- The infrastructure record shows 1 unique IP, 0 edge IPs, and 1 likely origin IP.
- TLS validation level: DV; issuer: YR1; valid to 2026-10-12T23:22:53+00:00.

Closing Assessment

The site is suitable for ordinary informational use and can support prospective commercial engagement, provided the counterparty, certifications, fulfilment terms, and payment protections are independently confirmed before commitment.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of indocanhoney.com.

- The request stayed on indocanhoney.com. It was not redirected to another domain. CLEAR
- Registration is published under BigRock Solutions Ltd.. CLEAR
- DNS for this domain is served by bigrockservers.com, across 2 name servers. NOTED
- The registration is paid up to 2030-07-29. CLEAR
- The earliest public archive of this site is from 2018-06-27. CLEAR
- It is hosted on UNIFIEDLAYER-AS-1, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about indocanhoney.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
