Full analysis

Overview

Indotrade.co is an Indonesia-focused import/export B2B marketplace and trade-leads directory that presents product categories, company listings, buyer and seller inquiries, success stories, and member account functions to connect commercial counterparties.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent marketplace model rather than investment, lending, cryptocurrency, or financial-yield offers, and the available page content contains no phishing, impersonation, or other overt fraud indicators. The login function is consistent with the stated member-marketplace purpose, while behavioral testing found stable operation, no hidden forms, no external password-posting destination, and no wallet or clipboard-abuse activity. External reputation checks were clean, and the domain has an established registration history with no suspicious repurposing identified.

EVIDENCE

- The homepage identifies the service as an Indonesia import/export trade-leads marketplace and exposes product, seller, inquiry, and company categories.
- The homepage contains one member login form with no untrusted submission destination or hidden sensitive form.
- Registered 2010-07-21 (~16.07 years old); the archive records 19 snapshots spanning 2022-09-29 to 2026-04-19 (5 years tracked).
- External reputation checks recorded 0 malicious and 0 suspicious detections, with no phishing or blacklist contradiction observed.

Regulatory Verification Notes

The site should be understood as a commercial marketplace rather than a regulated financial service. The supplied site material does not state a financial license, regulatory authority, or license number; this is a limited disclosure gap relevant to confirming the marketplace's corporate and commercial status, but it is not evidence of impersonation or fraud. Registration through NAMECHEAP INC, a long-established domain, a substantial traffic footprint, clean external reputation, and valid transport encryption collectively support the conclusion that the website is an established operating service. Any privacy-service registration detail is an administrative matter rather than an identity contradiction.

EVIDENCE

- The homepage describes B2B trade leads, product and company listings, inquiries, and membership functions, with no financial-services license claim.
- Domain registration is through NAMECHEAP INC and is recorded through 2027-07-20.
- The site is served from AS51167 (CONTABO - Contabo GmbH, DE).
- TLS is issued by YE2 at DV validation level and is valid to 2026-09-05.

What to Verify Next

Before a material commercial engagement, the marketplace's membership, listing, advertising, and transaction terms should be reviewed and the selected counterparty's identity, trading history, goods, and payment instructions should be confirmed independently. Where a transaction falls within a regulated activity, the relevant jurisdictional registry should be checked for the counterparty rather than assuming marketplace presence constitutes regulatory authorization. Official contact channels should also be confirmed through an independent route before resolving disputes or changing payment details.

EVIDENCE

- The homepage provides product, company, seller, and inquiry search functions that support independent counterparty review.
- The member area exposes trade-mail, quotation, purchase-order, sales, and transaction functions, making account and transaction terms relevant to due diligence.
- The supplied content identifies a marketplace model but does not provide a stated financial license or license number.

Summary Verdict

Indotrade.co presents as a legitimate, established, and trustworthy B2B marketplace with no observed scam or impersonation contradictions. Normal interaction, including account login and standard marketplace use, is appropriate within ordinary commercial controls.

Infrastructure Integrity

The site resolves to hosting provided by CONTABO - Contabo GmbH in Germany on AS51167, with two likely origin addresses and no CDN edge identified. This is a conventional, directly hosted infrastructure posture; the identified provider and resolved network materially support technical attribution, while infrastructure alone is not proof of business legitimacy.

Closing Assessment

Normal account use and standard marketplace activity are appropriate, with ordinary counterparty, payment, and transaction controls applied to significant commercial engagements.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about indotrade.co at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
