Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2020.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Gaurės baidarės is a local recreational rental website serving the Tauragė region, presenting kayak and paddleboard rental services, river and lake routes, pricing, camping availability, and a telephone contact for customers seeking equipment hire or organized trips.

Scam/Impersonation Risk

No contradictions were observed, including no phishing, impersonation, blacklist, or conflicting-identity indicators. The site presents a coherent local-service model rather than a deceptive financial or credential-collection scheme: it describes kayak trips on the Šešuvis, Šaltuona, and Ančia rivers, paddleboard rental at Draudenių Lake, route selection, pricing, and camping. The pages contain no login form, sensitive-data form, wallet connection, hidden form, or suspicious browser behavior. Available external reputation checks recorded no malicious or suspicious result, although coverage was partial. The site name and service presentation are consistent with a small recreational business, while the available evidence does not independently verify the real-world operator behind the domain.

EVIDENCE

- The homepage and service content describe kayak and paddleboard rentals, organized river trips, route options, prices, and camping.
- The page-behavior review recorded 0 external XMLHttpRequests, 0 hidden forms, 0 password forms submitted externally, and 0 wallet-provider detections across 2 successful runs.
- Domain registration: 2019-01-04; age 7.63 years.
- Historical records show 71 archive snapshots spanning 2019–2026, with 7 years tracked and first seen on 2020-08-04.

Regulatory Verification Notes

This is presented as a recreational rental service rather than a regulated financial or investment provider. The About, Prices, and Routes pages explain the commercial offering, but the supplied content does not state a licensing authority, registration number, or formal legal-entity identifier. That is a transparency and verification point for a prospective customer, not evidence of a scam. The available third-party broker dataset contains no matching record, and the external reputation signals are broadly clean. The site's modest search-authority signal and limited metadata are quality considerations rather than legitimacy contradictions.

EVIDENCE

- The About page identifies the operating name "Gaurès baidarès" and provides the service description and regional operating area.
- The Prices and Routes pages provide the commercial information needed to evaluate the proposed rental service.
- The site's transport encryption uses a DV certificate issued by YR2, valid to 2026-10-17.
- The hosting infrastructure resolves through AS212531, operated by Interneto-vizija – UAB Interneto vizija, LT.

What to Verify Next

Before a credential or payment interaction, an independent check should confirm the merchant identity associated with the service, the applicable booking or cancellation terms, and the payment method's consumer-protection arrangements. For a higher-value booking, the contact and business details should also be confirmed through an independently obtained channel rather than relying solely on information displayed on the website.

EVIDENCE

- The About page is the appropriate location for matching the trading name and operating-area details against an independent business record.
- The Prices and Routes pages provide the basis for confirming the selected service, route, duration, and quoted charge.
- The site contains no sensitive submission form, so any later request for credentials or payment should be evaluated separately from the current page behavior.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate local service. Clean reputation signals, stable behavior, coherent business content, and sustained domain provenance support that assessment. The operator’s real-world identity remains unverified, so the trust classification should not be treated as proof of ownership.

Infrastructure Integrity

The site is hosted directly through Interneto-vizija – UAB Interneto vizija, LT, on AS212531, with one resolved address and no CDN or WAF identified. This is a technically coherent direct-hosting arrangement for a small local website, although hosting infrastructure by itself is a mitigating technical signal rather than proof of legitimacy.

EVIDENCE

- Hosting provider: Interneto-vizija – UAB Interneto vizija, LT.
- Hosting ASN: AS212531; registry: RIPE NCC; hosting country: LT.
- Infrastructure resolution identified 1 unique IP, 0 edge IPs, and 1 likely origin address.

Closing Assessment

Normal browsing and ordinary rental enquiries are proportionate to the assessed posture; before submitting credentials or making a payment, standard independent merchant-identity, booking-terms, and payment-protection checks should be completed.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of indrema.lt.

- The request stayed on indrema.lt. It was not redirected to another domain. CLEAR
- The registration is paid up to 2028-01-05. CLEAR
- The earliest public archive of this site is from 2020-08-04. CLEAR
- It is hosted on Interneto-vizija, from a server in LT. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about indrema.lt at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
