## Full analysis

### Overview

This is an Italian corporate and product website for Industrie Ricreative, presenting the manufacture and sale of playground and leisure equipment, including trampolines, inflatable attractions, water-park products, minigolf installations, and spare parts for business and private customers.

### Scam/Impersonation Risk

No contradictions were observed: the available evidence shows no confirmed blacklist, phishing, impersonation, brand-matching, or malicious-behaviour pattern. The homepage has a coherent corporate/product presentation, no login or hidden sensitive form, and no cryptocurrency or wallet-connection functionality. One isolated external malicious classification is recorded, but it is explicitly unconfirmed and is not corroborated by the other evaluated reputation and abuse signals; it therefore does not establish a scam or impersonation finding.

#### EVIDENCE

- Homepage: presents a consistent manufacturer and seller profile, with no detected login form, hidden form, cloaking, wallet interaction, or clipboard-hijacking behaviour.
- External reputation checks: 1 malicious classification, 0 suspicious classifications, 0 abuse reports, and no external blacklist or Google Safe Browsing hit; the isolated classification is marked unconfirmed.
- Domain provenance: registered 2008-07-02 and approximately 18.15 years old; 124 archive snapshots spanning 2009–2025, covering 17 tracked years.

### Regulatory Verification Notes

The site content identifies an Italian commercial manufacturer and provides company contact details and legal identifiers, which is consistent with the stated business model. The available evidence does not independently verify the real-world operator identity, so the site should be described as apparently legitimate rather than identity-proven. No financial-regulatory license claim or license number is identified; given the site's described industrial and leisure-equipment business, this is a disclosure point for ordinary commercial verification, not evidence of a scam. The domain is registered through Server Plan s.r.l., and its transport encryption is valid, providing additional technical consistency with an established commercial website.

#### EVIDENCE

- Company and contact pages: identify Industrie Ricreative and provide company contact details and legal identifiers.
- Domain registration: registered through Server Plan s.r.l.; creation date 2008-07-02T11:42:34Z and expiration date 2026-11-16T00:00:00Z.
- Hosting telemetry: served from AS52030, SERVERPLAN-AS - Server Plan S.r.l., IT.
- TLS telemetry: certificate issued by YR2 with DV validation, valid to 2026-10-17T10:33:28+00:00.

### What to Verify Next

Before credential or payment interactions, an independent counterparty should match the company identifiers on the site against the relevant Italian business registry and confirm that the contracting entity is the same entity named in quotations, invoices, and payment instructions. Commercial terms should be checked for delivery, warranty, returns, spare-parts support, and applicable consumer or business-sales conditions. Payment should use a method offering appropriate transaction protection, and official contact channels should be confirmed through an independently sourced route before sensitive information is exchanged.

#### EVIDENCE

- About and contact pages: provide the identifiers and contact details to be matched against independent commercial records.
- Product and ordering content: describes direct sales to businesses and private customers, making quotation, warranty, delivery, and returns terms relevant to transaction review.
- No sensitive-form functionality was detected on the homepage, so any later credential or payment request should be assessed in the context of the separately selected transaction channel.

### Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. The conclusion is well grounded in the convergence of coherent business content, long registration continuity, stable technical behaviour, valid transport security, and the absence of corroborated scam or impersonation indicators. The operator’s real-world identity remains independently unverified.

### Infrastructure Integrity

The site resolves directly to two likely origin addresses, with no detected CDN or WAF layer and no edge-IP layer identified. This means the infrastructure has limited intermediary shielding, but it is a neutral technical characteristic and neither proves nor undermines the site’s legitimacy.

### Closing Assessment

Ordinary commercial engagement may proceed with proportionate independent checks of the counterparty, contractual terms, and payment protection completed before credentials or payment details are provided.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

### What the analysis found

No rule findings contributed to this verdict.

### Identity verification

|                                  |            |

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about [industriericreative.it](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
