INSTITUTO DE NEUROLOGIA — DESDE 1966

What inerp.com.br served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2018.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website presents INERP — Instituto de Neurologia de Ribeirão Preto as a regional medical clinic providing neurological consultations, diagnostic examinations, specialist services, appointment scheduling, and information about accepted insurance arrangements. Its apparent business model is patient care and diagnostic-service delivery, with telephone, WhatsApp, and online appointment requests as the primary engagement channels.

Scam/Impersonation Risk

No contradictions were observed. The homepage consistently identifies the organization as a neurology institute, describes medical examinations and specialties, and presents a conventional healthcare-service model rather than investment, cryptocurrency, credential-harvesting, or other deceptive solicitation. Available external checks found no malicious or phishing indication, and the site's observed behavior showed no login form, hidden sensitive form, wallet interaction, clipboard manipulation, or suspicious inline script. The real-world operator remains independently unverified, so the site's apparent legitimacy should not be treated as proof of legal identity.

EVIDENCE

- The homepage identifies “INERP — Instituto de Neurologia de Ribeirão Preto” and describes consultations, EEG and neurodiagnostic services, sleep studies, neurophysiology, neuropsychology, and cognitive assessments.
- The homepage presents a contact and appointment form without a password field or untrusted submission destination.
- Observed browser behavior recorded 0 external XMLHttpRequest/fetch requests, 0 hidden forms, 0 wallet-connect runs, and 0 clipboard-write events.
- The domain's historical record shows first appearance on 2018-12-07 and last recorded appearance on 2026-05-21, with 9 years tracked.

Regulatory Verification Notes

The site provides substantive clinical-service information, contact details, appointment options, and accepted insurance information, which is consistent with an operating medical practice. However, the supplied content does not show a medical license, professional registration number, corporate registration number, or independently verified connection between the website and the named real-world operator. This is a verification and disclosure gap, not evidence of a scam. A registration record lists Eduardo Merino Mega, but that record alone does not independently establish the operator's relationship to INERP. No matching third-party broker or reputational signal was identified.

EVIDENCE

- The homepage states that the institute has operated since 1966 and describes “58 years” of specialization in neurology in Ribeirão Preto.
- The technical record shows the domain was registered on 2015-09-09 and is approximately 10.96 years old.
- Hosting is identified as AS10733 — DC MATRIX INTERNET S/A, BR; the site is registered through the LACNIC regional registry.
- The site uses a DV TLS certificate issued by YE1, valid through 2026-10-25.

What to Verify Next

Before credential or payment interactions, an independent source should confirm the clinic's legal identity, applicable medical registrations, practitioner credentials, and relationship to the domain. Appointment terms, accepted-insurance details, cancellation or refund conditions, and any payment instructions should be confirmed through contact information obtained independently of the website. Official support and contact channels should also be cross-checked through an offline or independently published source.

EVIDENCE

- The homepage provides the clinic name, address, telephone number, WhatsApp channel, opening hours, and appointment options for independent comparison.
- The examinations and specialties pages identify the services that should be matched against the clinic's professional and medical-registration records.
- The insurance or “Convênios” information identifies the payer relationships that can be confirmed directly with the named insurers.

Summary Verdict

The overall posture is **high trust and low risk**, with evidence consistent with an established, apparently legitimate healthcare website and no observed scam or impersonation contradiction. The classification supports ordinary informational use and appointment research, while the operator's real-world identity remains unverified.

Infrastructure Integrity

The site resolves to a single endpoint hosted in Brazil by DC MATRIX INTERNET S/A on AS10733, without a detected CDN or WAF layer. Direct hosting is not itself adverse; the identified network, resolved infrastructure, and valid transport encryption provide a coherent technical posture, although hosting protection should be treated as a mitigating signal rather than proof of legitimacy.

Closing Assessment

Routine browsing and appointment research are proportionate to the observed posture; any submission of credentials or payment should follow the independent identity, service-term, and payment-protection checks described above.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of inerp.com.br.

- The request stayed on inerp.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by com.br, across 2 name servers. NOTED

- The registration is paid up to 2026-09-09. NOTED
- The earliest public archive of this site is from 2018-12-07. CLEAR
- It is hosted on AS10733, from a server in BR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about inerp.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
