

Is inews.id legit? TrustSniffer's high-trust assessment: 100/100

inews.id

Verdict

100

OUT OF 100

HIGH TRUST

inews.id appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

Established Indonesian news site (iNews) presenting national, international, sports, and regional stories; monetized via ads and app distribution; appears editorial and informational.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2017.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is an Indonesian digital news and media portal presenting national, international, regional, sports, finance, lifestyle, travel, automotive, and technology coverage, alongside live television, radio streaming, advertising, and distribution through a mobile application.

Scam/Impersonation Risk

No contradictions were observed: the available evidence shows no phishing, impersonation, blacklist, or malicious-content indicators. The homepage presents a conventional editorial publishing model, with news sections, advertising, app distribution, and a login/newsletter function rather than a solicitation for funds or sensitive financial credentials. A long-established domain, continuous archival presence, strong public traffic footprint, and clean external reputation are mutually consistent with an established site. The real-world operator identity is nevertheless not independently verified, so the legitimacy conclusion remains evidence-consistent rather than proven.

EVIDENCE

- Domain registered 2017-08-13 (~9 years old), through PT Digital Registra Indonesia; expiry recorded as 2028-08-13.
- Web archives contain 5,000 snapshots spanning 2017–2023, with 7 years tracked.
- The homepage is classified as News / Media, with no detected red flags, hidden forms, wallet activity, or brand-impersonation indicators.
- External reputation checks recorded 0 malicious and 0 suspicious detections; the domain is ranked 37140 and is within the top 1 million sites.

Regulatory Verification Notes

The site appears to operate as an ad-supported news publisher and media network, not as a financial or investment service. No regulated-finance license, registration number, or licensing authority is claimed in the available site content; this is a transparency item for confirmation rather than evidence of deception. The available identity signals support an apparently established publisher, but they do not independently establish the legal entity operating the website.

EVIDENCE

- The homepage describes editorial coverage, advertising, app distribution, and network media features rather than regulated financial products.
- The site does not display a license claim, license number, or named licensing authority in the available content.
- Hosted on AS13335 (CLOUDFLARENET - Cloudflare, Inc., US).
- TLS certificate issued by Sectigo Public Server Authentication CA DV R36 at DV validation level, valid to 2026-12-22.

What to Verify Next

Before credential or payment interactions, independently confirm the publisher's legal identity and the authenticity of the relevant contact or application channel through an established source outside the website. Review the site's terms, privacy, editorial, advertising, and app-distribution information, and confirm any applicable media registration or corporate details with the relevant public registry. Standard password hygiene and payment-protection controls should be retained for any account or transaction activity.

EVIDENCE

- Independent identity linkage is assessed as likely, but not verified.
- The available content does not identify a licensing authority or registration number.
- The site presents account and newsletter functionality, making ordinary credential-security and account-recovery checks relevant.

Summary Verdict

The website has a high-trust, low-risk posture and is apparently legitimate for its stated editorial purpose. The convergence of consistent site content, established provenance, clean reputation, and sound technical operation supports normal browsing and ordinary site use, while the publisher's real-world operator identity remains unproven.

Infrastructure Integrity

Cloudflare CDN/WAF protection fronts the website and provides a mitigating layer against direct infrastructure exposure. Resolution includes Cloudflare edge servers and potential origin candidates; this protective arrangement supports operational resilience but is not, by itself, proof of legitimacy.

EVIDENCE

- Observed Cloudflare edge addresses include 104.18.12.203, 104.18.13.203, 2606:4700::6812:ccb, and 2606:4700::6812:dcb.
- Infrastructure resolution identified 4 CDN edge IPs and 4 potential origin candidates.

Closing Assessment

Ordinary browsing is proportionate to the available risk posture; credential or payment use should follow independent publisher-identity, account-security, and payment-protection checks.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of inews.id.

- The request stayed on inews.id. It was not redirected to another domain. CLEAR
- Registration is published under PT Digital Registra Indonesia. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2028-08-13. CLEAR
- The earliest public archive of this site is from 2017-04-29. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about inews.id at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
