

Is infracure.com a scam? TrustSniffer's high-risk assessment: 5/100

infracure.com

Verdict

5
OUT OF 100

CRITICAL RISK

infracure.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-22 by automated analysis. Classification confidence 55%.

What this site appears to be

A professional consultancy/personal site for 'Infracure' describing Tim's background, services in supply-chain and procurement, and professional achievements. The page reads like an informational corporate biography and contact landing page.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://infracure.com/>

What infracure.com served when TrustSniffer captured it on 2026-08-22. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2012.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

This website is an informational consultancy and professional biography for “Infracure,” presenting Tim's experience in supply-chain management, procurement, logistics, programme and project assurance, contract oversight, and probity. Its apparent business model is the provision of contract consulting and professional services to government and industry clients.

Scam/Impersonation Risk

The site's visible content is coherent with a professional consultancy and does not display a login form, payment workflow, wallet connection, or obvious deceptive page mechanics. However, this benign presentation is materially outweighed by external threat detections: the domain is **blacklisted** by two external sources, including eight malicious detections, creating a confirmed reputation contradiction and a high risk for sensitive interaction. No separate legal-entity conflict or direct site-level impersonation indicator was identified, but the available evidence does not establish that the website is safely connected to the real-world individual or consultancy it describes.

EVIDENCE

- External reputation records: 8 malicious detections were recorded, with a confirmed blacklist indication from two sources.
- Homepage: the site presents a consultancy biography and contains no login form, sensitive form, wallet interaction, or suspicious external submission destination.
- Historical records: 18 archive snapshots spanning 2012–2025, with 14 years tracked.

Regulatory Verification Notes

The homepage describes professional experience, awards, memberships, academic qualifications, and services supplied to government and industry. It does not present a license claim or license number, and the available material does not independently verify the operator's identity; this is a regulatory and identity-verification gap rather than proof of fraud. The domain's long registration history and valid transport encryption are positive technical indicators, but they do not overcome the confirmed external reputation warning or establish regulatory standing.

EVIDENCE

- Domain registration: created 2010-01-26T01:39:42Z, recorded age 16.58 years, expires 2027-01-26T01:39:42Z, and is registered through Key-Systems GmbH.
- Transport encryption: TLS certificate issued by YR1, validation level DV, valid to 2026-09-28T22:14:49+00:00.
- Hosting telemetry: served from AS133104, INSTRACORPORATION-AS-AP — Instra Corporation Pty Ltd, AU.
- Homepage: professional credentials and service descriptions are presented, but no license authority or license number is stated.

What to Verify Next

Before any sensitive engagement, an independent party should validate the named professional credentials and claimed institutional affiliations through the institutions' official directories, confirm the contracting legal entity and payment beneficiary through independently sourced records, and obtain written contractual terms before exchanging confidential information. Any contact channel used for engagement should be confirmed through an independently obtained route rather than relying solely on the website.

EVIDENCE

- Homepage: verify the stated professional history, memberships, awards, and academic claims against the relevant institutions.
- Proposed engagement documentation: confirm that the contracting party, invoice recipient, and payment beneficiary are the same independently verified entity.
- Independent contact route: validate the business relationship through an official directory or offline channel before sharing credentials, confidential data, or funds.

Summary Verdict

The overall posture is **critical trust risk**. Although the website appears professionally structured and its technical presentation includes some established-site characteristics, the confirmed external reputation contradiction means the site should not be treated as trustworthy for sensitive interaction, financial activity, or credential use.

Infrastructure Integrity

CDN/WAF protection is present and is a mitigating control against routine exposure, not proof of legitimacy. Observed edge infrastructure includes 13.248.169.48 and 76.223.54.146 on AS16509, alongside a resolved origin candidate; the fragmented infrastructure warrants treating the protective layer as limited assurance rather than an identity signal.

Closing Assessment

Prospective users should restrict activity to passive review and refrain from login, credential submission, confidential information exchange, or financial transactions until the operator and intended engagement have been independently confirmed.

Written analysis generated 2026-08-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%
No on-site identity signals detected	

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of [infracure.com](#).

- The request stayed on [infracure.com](#). It was not redirected to another domain. CLEAR
- Registration is published under Key-Systems GmbH. CLEAR
- DNS for this domain is served by [partnerconsole.net](#), across 3 name servers. NOTED
- The registration is paid up to 2027-01-26. NOTED
- The earliest public archive of this site is from 2012-12-31. CLEAR
- It is hosted on INSTRACORPORATION-AS-AP, from a server in AU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [infracure.com](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
