

Is ingenieriadelagua.uy a scam? TrustSniffer's high-risk assessment:
0/100

ingenieriadelagua.uy

Verdict

0

OUT OF 100

CRITICAL RISK

ingenieriadelagua.uy shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

The page displays a hosting/provider 'Account Suspended' notice. No content, links, forms, or business information are present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2024.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This domain currently presents only a hosting-provider “Account Suspended” notice rather than an operating website. Visitors are shown no business description, products, pricing, contact information, links, forms, or other material establishing an active purpose or identifiable service.

Scam/Impersonation Risk

Confirmed external security contradictions materially elevate the risk of sensitive interaction. The domain is recorded as blacklisted by two external sources, with 15 malicious detections among the evaluated security engines; two major security vendors also flagged it. The captured page itself does not display a login form, payment mechanism, phishing form, or identifiable brand impersonation, but its suspended status prevents meaningful validation and does not offset the external detections. No suspicious contact-email anomaly was identified. Historical records do not show a repurposing conflict, but the available provenance remains limited to observations during the domain's relatively short recorded existence.

EVIDENCE

- The external reputation assessment recorded 15 malicious detections and confirmed blacklist status, with Kaspersky and Sophos among the flagged vendors.
- The homepage resolves to an “Account Suspended” notice and contains no operational business content or interactive service.
- Domain-age evidence records 2.25 years (823 days); archive observations run from 2024-05-19T04:31:06Z to 2025-03-22T15:27:38Z, covering 2 years.

Regulatory Verification Notes

The site provides no active legal, corporate, licensing, or regulatory disclosure because the only visible page is a hosting suspension placeholder. Operator identity therefore remains unverified, and the available content does not establish who would be responsible for any service or transaction. A valid domain-validated certificate and identifiable hosting infrastructure are technical properties, not evidence of licensing or legitimate operation. No matching broker profile was identified in the supplied third-party contextual dataset; this is neither a regulatory determination nor a positive identity verification.

EVIDENCE

- The captured page is titled “Account Suspended” and contains only a notice directing visitors to contact the hosting provider.
- The site's transport encryption uses a DV certificate issued by YR1, valid to 2026-09-13T13:24:44+00:00.
- The site is served from AS24940, HETZNER-AS – Hetzner Online GmbH, DE.

What to Verify Next

Any prospective engagement should first establish the responsible legal entity through an independently obtained corporate or regulatory record, rather than relying on material presented by the domain. The official support and contact channels should be confirmed through an independent offline route, and any future request for credentials, account access, payment, or financial transfer should be assessed only after the domain returns to an operating state and the responsible entity is independently validated.

EVIDENCE

- The current homepage provides no company name, license reference, terms, privacy notice, contact channel, or business explanation against which identity could be checked.
- The captured page contains no forms or login functionality, so there is presently no active interaction surface to validate.
- The available identity-verification status is unverified, with no independent identity signals supplied.

Summary Verdict

The website has a **critical trust posture** and should not be treated as an established or validated service for sensitive interaction. The combination of confirmed external security contradictions, an inactive presentation, and an unverified operator identity prevents a defensible legitimacy conclusion.

Infrastructure Integrity

The site is protected by a CDN/WAF layer, and the analysis observed only an edge address rather than an independently verifiable origin. This provides some exposure-mitigation value, but protective delivery infrastructure cannot counteract the external reputation findings or establish site legitimacy.

Closing Assessment

Interaction should remain suspended pending independent confirmation of the responsible entity and a materially changed, verifiable operating website; credentials, payments, and financial transfers should not be submitted in the interim.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ingenieriadelagua.uy.

- The request stayed on ingenieriadelagua.uy. It was not redirected to another domain. [CLEAR](#)

- The earliest public archive of this site is from 2024-05-19. CLEAR
- It is hosted on HETZNER-AS, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ingenieriadelagua.uy at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
