Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Inmobiliaria CTT is a corporate real-estate website presenting itself as a local developer and broker that develops, markets, sells, and rents residential and other properties, with company information, mission, vision, values, and contact details intended to generate property inquiries.

Scam/Impersonation Risk

The website's visible content is consistent with a conventional real-estate business: it describes development and property sales and rentals, and the reviewed page contained no login form, credential-collection flow, payment interface, crypto content, or other page-level phishing mechanism. However, this benign presentation is outweighed by confirmed external contradictions: the domain is recorded on an external blacklist, and malware-reputation telemetry identified it as malicious, including detections from multiple major security vendors. No direct brand-impersonation or phishing mechanism was identified in the rendered page, but the confirmed blacklist status and malicious detections require a clearly cautionary posture for sensitive interaction.

EVIDENCE

- The homepage presents Inmobiliaria CTT as a real-estate developer and broker and contains no forms or transactional workflow.
- The homepage was assessed as having no visible login form, hidden form, credential-harvesting behavior, or crypto-related content.
- External reputation telemetry recorded 12 malicious detections from 17 effective evaluations and identified Fortinet, Kaspersky, and Sophos among the detecting vendors.
- The domain was identified on an external blacklist; a separate Google Safe Browsing result was not malicious.

Regulatory Verification Notes

The site provides corporate descriptions, mission, vision, values, and contact information, but the supplied page evidence does not show a claimed licence, licence number, or regulatory authority. That is a regulatory-disclosure gap requiring independent verification before any property transaction or financial commitment; it is not, by itself, proof of a scam. The operator's real-world identity remains unverified, so the on-site company presentation should not be treated as independently established. The domain's registration through GoDaddy and its long-established registration history provide administrative continuity, but they do not validate the business or resolve the adverse external reputation evidence. No broker match was identified in the available third-party broker context.

EVIDENCE

- The "Nosotros," mission, vision, values, and contact sections identify the business as Inmobiliaria CTT but do not display a licence or registration number.
- Registered 2020-08-28 (~5.98 years old); registrar: GoDaddy.com, LLC.
- Served from AS14061 (DigitalOcean, LLC, US).
- TLS certificate issued by YR2, DV validation, valid to 2026-09-26.

What to Verify Next

Before any engagement, an independent property, corporate, and regulatory check should confirm that Inmobiliaria CTT is authorised to market the specific properties and that the advertised developments, ownership interests, permits, and contractual counterparties exist. Contact details should be validated through an independently sourced business record or offline channel rather than relying solely on the website. Any proposed payment, deposit, document upload, or account-registration process should be reviewed for a named legal counterparty, enforceable terms, protected payment arrangements, and a traceable beneficiary. Security teams should also treat the confirmed adverse reputation findings as a reason to obtain a fresh endpoint and malware assessment before permitting sensitive interaction.

EVIDENCE

- The homepage states that the company develops and commercialises projects and also handles property rentals and sales.
- The site supplies phone, email, and physical-address contact details for follow-up verification.
- The reviewed page contains no payment, login, or sensitive-data submission form, so any later request for such interaction would represent a separate transaction-stage risk.

Summary Verdict

The overall posture is **critical risk for sensitive interaction**. The site has a plausible real-estate presentation and stable technical characteristics, but those positive attributes do not overcome the confirmed adverse reputation contradictions. The operator's identity is not independently verified, and the website should not be treated as trustworthy for credentials, payments, document submission, or other consequential activity.

Infrastructure Integrity

The site is protected by a CDN/WAF layer, and the observed edge address was 137.184.91.230 on AS14061, operated by DigitalOcean, LLC in the United States; the origin server was not observable in this analysis. This infrastructure provides some exposure mitigation, but it is not evidence of business legitimacy and cannot offset the external threat detections.

Closing Assessment

Restrict interaction to passive viewing while independent business, property, regulatory, and security checks are completed; credentials, sensitive documents, deposits, and other financial actions should not be submitted through the site in the interim.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

About this assessment

A trust score summarises the evidence TrustSniffer could collect about inmobiliariactt.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
