

Is innovationsolutions.com legit? TrustSniffer's high-trust assessment: 100/100

innovationsolutions.com

Verdict

100

OUT OF 100

HIGH TRUST

innovationsolutions.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

Corporate website for Innovation Solutions, a Santa Ana, CA-based provider of warehouse management consulting, implementation, and custom supply-chain software. The site describes services, industries served, team, partners, contact phone and email, and includes a contact form.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What innovationsolutions.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2002.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

InnovationSolutions.com is a corporate website for Innovation Solutions, a Santa Ana, California–based provider of warehouse-management consulting, workflow analysis, warehouse performance measurement, implementation services, and custom supply-chain software. Its apparent business model is to generate consulting, implementation, and software-development engagements with commercial organizations across industries including retail, food and beverage, electronics, aerospace, automotive, and third-party logistics.

Scam/Impersonation Risk

No contradictions were observed across the available evidence: there are no detected phishing, impersonation, malicious-content, or conflicting-identity indicators. The homepage presents a coherent business-services model, includes substantive descriptions of warehouse-management work, and provides a standard contact form without login, payment, cryptocurrency, or credential-harvesting functionality. A reputational signal consists of abuse reports associated with an IP address attributed to shared infrastructure; because the reports apply to the hosting environment rather than being linked specifically to this website, they do not establish site-level

abuse. The website is therefore apparently legitimate and established on the available evidence, while the real-world operator identity remains independently unverified.

EVIDENCE

- The homepage describes Warehouse Management Consulting Services, Workflow Analysis, Warehouse Performance and Financial Measures, and supply-chain software implementation.
- The homepage contains one contact form and no login form, hidden sensitive form, wallet-connect function, or password-submission workflow.
- The domain was registered in 2003 and is approximately 23.19 years old; the historical record contains 94 snapshots spanning 2002–2026, with 25 years tracked.
- Thirteen abuse reports were recorded against the shared hosting IP 141.193.213.20, attributed to WPEngine, Inc., with a confidence score of 23 and shared-infrastructure attribution.

Regulatory Verification Notes

The About, Services, Partners, Team, and Contact pages present Innovation Solutions as a commercial consulting and software provider rather than as a financial, investment, or otherwise visibly regulated service. No license or registration number is claimed on the reviewed pages; this is a disclosure item for ordinary business due diligence, not evidence of a scam. The domain is registered through GoDaddy.com, LLC, while the registration record uses a private-registration service, an administrative arrangement that does not itself create an identity contradiction. A matched broker-dataset record was not identified, and the site's identity claims should remain treated as apparent rather than independently verified.

EVIDENCE

- The About and Contact pages identify Innovation Solutions and provide a Santa Ana, California business location and contact channels.
- The Services and Partners pages describe consulting, implementation, and custom software engagements without presenting a regulated financial product or licensing claim.
- The domain's registrar is GoDaddy.com, LLC, with registration extending to 2031-06-17.
- Hosting telemetry identifies AS209242, CLOUDFLARESPECTRUM – Cloudflare London, LLC, US; the site's TLS certificate is issued by WE1 at DV validation level and is valid to 2026-11-11.

What to Verify Next

Before a commercial engagement, the prospective counterparty should independently match the business name, location, telephone number, and contracting entity against an authoritative corporate record obtained outside the website. The proposed statement of work should identify the legal contracting party, deliverables, fees, data-handling responsibilities, support obligations, and termination rights. Payment arrangements should use documented business invoicing and payment-protection controls, and contact channels should be confirmed through an independently sourced route before credentials or payment information are exchanged.

EVIDENCE

- The Contact page supplies the primary business contact route and a contact form suitable for an independent callback or entity check.
- The Services and Partners pages provide the stated business scope against which a contract and vendor due-diligence record can be compared.
- The homepage exposes a standard service inquiry workflow rather than an account, payment, or credential-collection workflow.

Summary Verdict

The available evidence supports a high-trust, low-risk posture for an established, apparently legitimate corporate services website. Its substantive business content, stable technical presentation, and absence of contradictory abuse or impersonation signals support normal business consideration, although the operator's real-world identity is not independently verified.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, which is a meaningful mitigating control against direct origin exposure and common delivery-layer abuse. All observed addressing was associated with the CDN edge, and the origin server was not observable in this analysis; this protection supports infrastructure resilience but is not, by itself, proof of business legitimacy.

Closing Assessment

Normal professional due diligence remains appropriate before entering a binding engagement, submitting credentials, or making a payment, with particular attention to independently confirming the contracting entity and using payment arrangements that preserve commercial recourse.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 13 reports on hosting IP 141.193.213.20 (WPEngine, Inc., Content Delivery Network), 23% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of innovationsolutions.com.

- The request stayed on innovationsolutions.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by microsoftonline.com, across 4 name servers. NOTED
- The registration is paid up to 2031-06-17. CLEAR
- The earliest public archive of this site is from 2002-05-30. CLEAR
- It is hosted on CLOUDFLARESPECTRUM, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about innovationsolutions.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
