Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is a local photography-studio website for i NOR Photo Lounge in Madurai, presenting a portfolio-led service business intended to convert visitors into photography bookings.

Scam/Impersonation Risk

No scam, phishing, impersonation, or identity-conflict contradictions were observed. The site's stated model is coherent with a local creative-services business: maternity, newborn, baby, and family photography, supported by galleries, testimonials, package information, a 50% booking deposit, and payment of the balance on the shoot day. The site has no login or password-collection form, no hidden sensitive forms, no wallet activity, and no detected brand-impersonation behavior. Available external reputation checks found no malicious or suspicious detections and no abuse reports. Interactive testing did record implementation-level console errors and page-content changes, but these did not expose credential capture, cloaking, or other abuse behavior.

EVIDENCE

- The homepage and services pages describe maternity, newborn, baby, and family photography, packages, galleries, testimonials, and the stated deposit-and-balance booking workflow.
- The contact page contains ordinary business contact channels and a contact/newsletter form; testing identified no login form, password submission, or hidden sensitive form.
- The site's domain was registered on 2019-11-28 and is 6.73 years old through GoDaddy.com, LLC.
- Historical coverage contains 375 snapshots from 2021-12-08 through 2026-05-20, spanning 6 years tracked, with no suspicious repurposing identified.

Regulatory Verification Notes

The available materials are consistent with a local photography service rather than a financial or otherwise clearly regulated offering. The site presents service, booking, FAQ, gallery, testimonial, About Us, and Contact Us content, but the reviewed materials do not establish an independently verified legal-entity identity or provide a corporate registration or professional licence number. This is a disclosure and verification point, not evidence of deception. The site's operator identity is therefore assessed as likely but not independently verified. No matched third-party broker-reputation record was identified.

EVIDENCE

- The About Us, services, FAQ, and contact materials identify i NOR Photo Lounge as a Madurai photography studio and describe its commercial service model.
- The hosting record shows the site served from AS13335 (CLOUDFLARENET - Cloudflare, Inc., US).
- The site's transport encryption uses a WE1-issued DV TLS certificate valid to 2026-10-02T12:59:23+00:00.
- The reviewed business pages do not state a corporate registration number or professional licence number.

What to Verify Next

Before credential or payment interactions, an independent merchant-identity check should match the studio's name and contact details against an offline or independently sourced business channel. The applicable cancellation, rescheduling, delivery, refund, and privacy terms should be confirmed in writing, and any advance payment should use a method providing appropriate payment protection. Where local registration or permissions are relevant to the engagement, the applicable registry should be checked directly.

EVIDENCE

- The site's About Us and Contact Us pages provide the primary identity and contact points for independent cross-checking.
- The services and FAQ materials provide the booking and payment information that should be reconciled with the final customer agreement.
- The site links to established social platforms, including Instagram, Facebook, YouTube, and WhatsApp, which can be compared with independently sourced business presence.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website. The overall posture is high trust and low risk, with no observed contradiction suggesting a scam or impersonation. The remaining qualification concerns confidence in connecting the website to a independently verified real-world operator, rather than evidence of malicious conduct.

Infrastructure Integrity

Cloudflare CDN and WAF protection provide a mitigating layer by placing observed traffic behind edge infrastructure rather than exposing a directly identified origin. This improves resistance to routine infrastructure abuse and origin exposure, but it is supportive technical hygiene rather than proof of business legitimacy.

EVIDENCE

- Infrastructure resolution identified 4 CDN edge addresses and 0 origin candidates.
- The observed edge address 104.21.47.146 is associated with Cloudflare's CDN infrastructure.

Closing Assessment

The site is suitable for ordinary browsing and service evaluation; account or payment engagement should proceed after the standard independent merchant-identity, contractual-terms, and payment-protection checks appropriate to a paid local service.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	39%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of inorphotolounge.com.

- The request stayed on inorphotolounge.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-11-28. NOTED
- The earliest public archive of this site is from 2021-12-08. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about inorphotolounge.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
