

Is insiderstore.com.br legit? TrustSniffer's high-trust assessment: 80/100

insiderstore.com.br

Verdict

80

OUT OF 100

HIGH TRUST

insiderstore.com.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

Ecommerce storefront (Insider) in Portuguese listing clothing products with detailed descriptions, prices, reviews, promotions (free shipping thresholds, PIX discounts), and calls to create account / login / add to cart. No obvious fraud or crypto/financial investment activity.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2017.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

Insiderstore.com.br is a Portuguese-language direct-to-consumer ecommerce storefront for apparel, underwear, accessories, and technical-textile products. It presents detailed product listings, prices, reviews, promotions such as free-shipping thresholds and PIX discounts, and standard account, login, cart, checkout, delivery, and returns functions.

Scam/Impersonation Risk

No contradictions were observed. The storefront presents a coherent retail model, with no detected brand-impersonation, phishing, cryptocurrency, wallet-drainer, or credential-harvesting indicators. Browser testing did identify suspicious inline scripts, substantial page changes after interaction, external network activity, and console errors; however, the same testing found no hidden forms, externally submitted password forms, cloaking, wallet connections, clipboard manipulation, or malicious wallet behavior. Two abuse reports were associated with shared content-delivery infrastructure rather than specifically attributed to the website, with zero confidence assigned to the reports; this is therefore a soft reputational signal, not evidence of site-level abuse.

EVIDENCE

- The homepage is classified as a retail product catalogue and contains no detected fraud indicators or impersonation markers.
- Interactive testing of the homepage found login and checkout forms without hidden sensitive forms or untrusted form destinations.
- External reputation checks recorded no malicious or suspicious detections and no confirmed blacklist or phishing hit.
- Two reports concern a shared Shopify content-delivery IP, not a confirmed incident involving the website.

Regulatory Verification Notes

The available evidence is consistent with an established commercial retailer, but the real-world operator identity is not independently verified. The registration record associates the domain with Yuri Gricheno, while the available evidence does not independently connect that individual to the storefront operator. No financial or other regulatory licence is claimed or verified in the available material; for an apparel retailer, this is a disclosure

and merchant-identity verification point rather than an indication of scam activity. The available broker-reputation context contains no match.

EVIDENCE

- The domain was registered in 2016 and is approximately 9.82 years old.
- Web archives contain 795 snapshots spanning 2017–2026, covering 10 tracked years.
- The site is served through AS13335, CLOUDFLARENET – Cloudflare, Inc., US.
- The transport certificate was issued by YE1 with Domain Validation (DV), valid through 2026-10-29.

What to Verify Next

Before credential or payment interactions, an independent check should confirm the merchant's legal identity, the entity responsible for fulfilment, and the applicable delivery, returns, refund, and payment-protection terms. Contact details should be authenticated through an independent channel, and any applicable consumer or commercial registration should be checked against the relevant Brazilian registry.

EVIDENCE

- The available evidence assigns the operator-identity status as unverified.
- The homepage presents account, login, and checkout workflows, making merchant-identity and payment-protection checks relevant before transaction use.
- The site describes standard delivery and returns arrangements, which should be reconciled with the applicable terms before purchase.

Summary Verdict

The site has a **high-trust, low-risk posture** and appears consistent with an established, apparently legitimate ecommerce business. No scam, phishing, impersonation, or other contradictory signal was observed, although the available evidence does not prove the real-world operator's identity.

Infrastructure Integrity

Cloudflare CDN and WAF protection are in place, and all observed addresses were CDN edge addresses rather than an identified origin server. This reduces direct exposure of the hosting origin and is a mitigating infrastructure signal, but it is not proof of merchant legitimacy.

Closing Assessment

Ordinary browsing is proportionate to the assessed posture; independent merchant-identity, returns, and payment-protection checks should be completed before submitting credentials or payment details.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 2 reports on hosting IP 2620:127:f00f:5:: (Shopify, Inc., Content Delivery Network), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of insiderstore.com.br.

- The request stayed on insiderstore.com.br. It was not redirected to another domain. [CLEAR](#)
- DNS for this domain is served by cloudflare.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2033-10-18. [CLEAR](#)
- The earliest public archive of this site is from 2017-03-11. [CLEAR](#)
- It is hosted on CLOUDFLARENET, from a server in CA. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about insiderstore.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
