

Is insidethegames.biz legit? TrustSniffer's high-trust assessment: 100/100

insidethegames.biz

Verdict

100

OUT OF 100

HIGH TRUST

insidethegames.biz appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 75%.

What this site appears to be

Homepage of Inside The Games, a sports news publication covering the Olympics, Paralympics, Commonwealth Games, governing bodies, anti-doping, sports law and politics, and international competitions. It presents dated news stories, editorial analysis, a newsletter signup, a reader poll, organizational attribution, contact links, and legal policies.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2009.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is an established sports journalism publication providing dated news and analysis on the Olympic, Paralympic and Commonwealth Games, international competitions, governing bodies, anti-doping, sports law and sports politics, with a commercial model based on advertising, sponsorship, audience engagement and media partnerships.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behaviour or other scam indicators were observed. The publication's long-established domain, extensive historical continuity, substantial readership footprint and clean external reputation converge with its current editorial identity. Its homepage contains substantial topic-specific journalism and ordinary audience features rather than deposit requests, investment solicitations or misleading financial promises.

- The domain registration record shows registration on 12 July 2009 (~17 years old) through Mesh Digital Limited, with expiry on 11 July 2030.
- The domain's archival record contains 5,000 snapshots spanning 5 September 2009 to 9 November 2023 (15 years tracked), with no detected suspicious repurposing or semantic drift.
- The homepage identifies itself as "Inside The Games" and presents dated reporting across Olympic, Paralympic, anti-doping, sports-law and international-governance topics; no brand-impersonation indicator was detected.
- External reputation checks recorded zero malicious and zero suspicious detections, no malicious safe-browsing finding, no abuse reports and an established global traffic rank of 40,576.

Regulatory Verification Notes

The site operates as a news and analysis publisher, not as a financial, investment or brokerage service, and the reviewed content makes no claim to a regulated-service licence. Consequently, the absence of financial licensing information is consistent with the stated business model rather than an adverse regulatory signal. The homepage provides organizational attribution alongside About, Contact and legal-policy links, supporting an identifiable editorial operation. No matching broker profile was found in the supplied third-party broker context, but that result has no bearing on the publication's legal status.

- The homepage describes a sports-news service and does not request deposits, promise financial returns or advertise regulated financial products.

- The homepage exposes About, Contact and legal-policy navigation, together with a cookie-consent banner and advertising-personalization disclosure.
- The hosting infrastructure is served from AS13335 (Cloudflare, Inc., US).
- The site’s transport encryption uses a DV TLS certificate issued by YE2, valid until 4 October 2026.

What to Verify Next

For institutional reliance, due diligence should confirm the publisher’s current corporate particulars and editorial contacts against the information presented through its About, Contact and legal-policy pages. Any proposed advertising, sponsorship, content-syndication or data-sharing arrangement should additionally be governed by a written agreement identifying the contracting entity, commercial terms and applicable privacy obligations.

- The homepage provides organizational attribution and dedicated routes for corporate background, contact information and legal policies.
- The observed interactive functions consist of a newsletter subscription and reader poll; neither was identified as a sensitive form or as submitting to an untrusted destination.
- Behavioural testing found no hidden forms, external password forms, cloaking, clipboard manipulation, wallet interaction or suspicious inline scripts.

Summary Verdict

The website is a legitimate, established and trustworthy sports-news publication. Its identity, historical continuity, editorial substance, reputation and observed behaviour are mutually consistent, with no contradictory risk signals. Normal interaction, including account login and standard use where available, is appropriate.

Infrastructure Integrity

The site uses Cloudflare CDN and WAF protection, and all six observed addresses were edge servers; no origin candidate was exposed during the analysis. This reduces direct origin exposure and provides mainstream perimeter protection, although infrastructure controls are mitigating safeguards rather than independent proof of legitimacy.

Closing Assessment

Prospective users may engage with the publication normally, while organizations considering a formal commercial relationship should apply their standard counterparty and contracting controls.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of insidethegames.biz.

- The request stayed on insidethegames.biz. It was not redirected to another domain. CLEAR
- Registration is published under Mesh Digital Limited. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2030-07-11. CLEAR
- The earliest public archive of this site is from 2009-09-05. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about insidethegames.biz at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
