

Is insstagams.com a scam? TrustSniffer's high-risk assessment: 0/100

insstagams.com

Verdict

0

OUT OF 100

CRITICAL RISK

insstagams.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 55%.

What this site appears to be

Default nginx welcome page indicating the web server is installed; no services, forms, or monetization present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	12 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	0 reports AbuseIPDB; shared hosting inflates this count	NOTED
Domain age	5 months old Most scam domains are under a year old	RISK
Web archive	Archived since 2021 Public history exists	CLEAR
Certificate	Encrypted connection Issued by YE2	NOTED

The page as captured

https://insstagams.com/

Welcome to nginx!

If you see this page, the nginx web server is successful working. Further configuration is required.

For online documentation and support please refer to [n](#)
Commercial support is available at nginx.com.

~~Thank you for using nginx.~~

What insstagams.com served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website at insstagams.com is a bare nginx server placeholder rather than an operating commercial or service website. Visitors see only the standard "Welcome to nginx!" installation page, which states that further configuration is required and provides links to nginx documentation and commercial support; no business purpose, services, payment flow, or user-facing application is presented.

Scam/Impersonation Risk

The site presents a **critical interaction risk** because external threat intelligence recorded twelve malicious detections and one suspicious detection, including a Sophos alert, and the domain is listed by external blacklist sources. These signals materially outweigh the benign appearance of the placeholder page. The available evidence does not establish an identity contradiction or a confirmed impersonation claim on the page itself; nevertheless, the domain's name resembles the Instagram brand while the site provides no legitimate brand context, making the combination of brand-like naming and confirmed external detections unsuitable for sensitive

interaction. The absence of forms, scripts, wallet activity, or payment requests on the captured page limits observed attack functionality but does not neutralize the external reputation findings.

EVIDENCE

- The homepage returns the default nginx welcome page and contains no login form, sensitive form, payment request, or service workflow.
- External reputation assessment recorded 12 malicious detections and 1 suspicious detection; Sophos was the identified tier-one reporting vendor.
- The domain was identified as present on external blacklist sources; Google Safe Browsing did not record a malicious result.
- WHOIS records creation date `2026-03-15T14:54:13Z` and domain age `0.43 years`.

Regulatory Verification Notes

No regulated service, legal entity, license, registration number, or governing jurisdiction is disclosed in the captured website content. Because the homepage is only an unconfigured server page, this is a disclosure and verification gap rather than evidence of a particular regulatory breach. The available identity connection remains unverified, and the site cannot presently be treated as an established regulated counterparty. No broker match was identified in the supplied third-party reputational context.

EVIDENCE

- The homepage title is "Welcome to nginx!" and its text states that further configuration is required; it contains no corporate, legal, or licensing disclosure.
- Archive records show 15 snapshots spanning `2021-12-06T22:55:26Z` through `2022-02-09T16:15:52Z`, covering 2 years.
- The site is served from `AS14061` operated by `DIGITALOCEAN-ASN - DigitalOcean, LLC, US`.
- The transport certificate is issued by `YE2`, uses DV validation, and is valid to `2026-11-12T13:36:01+00:00`.

What to Verify Next

Before any sensitive interaction, an organization should confirm that the intended domain is correct through an independently obtained corporate or brand communication, establish the responsible legal entity through authoritative records, and confirm any claimed authorization directly with the relevant regulator. If the domain is encountered in an email, advertisement, or redirect chain, the originating message and destination should be investigated separately rather than relying on the placeholder page as evidence of legitimacy.

EVIDENCE

- The homepage contains no operating business content from which an owner, service provider, or regulated activity can be independently identified.
- The captured page has no forms, login interface, external data submissions, wallet connection, or payment mechanism.
- The site's authority signal is classified as low, while its visible content is limited to 291 characters.

Summary Verdict

The available evidence supports a critical trust posture for sensitive interaction. The confirmed blacklist presence and multiple malicious detections are decisive, while the site itself provides no substantive identity or operating-business evidence to counter them. Identity verification remains unverified.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present, which is a mitigating control against direct exposure of the origin environment but is not proof of legitimacy. The observed edge address is `159.89.231.61`, associated with DigitalOcean's `AS14061`; the origin server was not observable in this analysis.

Closing Assessment

Interaction should be limited to passive observation, with no credential submission, account login, financial activity, or execution of downloaded content through this domain.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
 - The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of insstagams.com.

- The request stayed on insstagams.com. It was not redirected to another domain. CLEAR
- Registration is published under Cloudflare, Inc.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-03-15. NOTED
- The earliest public archive of this site is from 2021-12-06. CLEAR
- It is hosted on DIGITALOCEAN-ASN, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about insstagams.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
