

Is institutobolivar.edu.pe a scam? TrustSniffer's high-risk assessment: 0/100

institutobolivar.edu.pe

Verdict

0

OUT OF 100

CRITICAL RISK

institutobolivar.edu.pe shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Official site for IESP Simón Bolívar (public higher-education institute). Contains programs of study, administrative notices, admissions and contact information (address, phone, email). Primarily informational and institutional.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://institutobolivar.edu.pe/>

What institutobolivar.edu.pe served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Public web-archive history exists since 2011.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website presents itself as the institutional online presence of IESP Simón Bolívar, a public higher-education institute offering academic programs, admissions information, administrative services, student enrollment functions, institutional notices, and contact information.

Scam/Impersonation Risk

The site's visible content is coherent with an educational institution: the homepage lists study programs, admissions, administrative notices, a transparency portal, and student services, while page analysis found no login form, sensitive form, wallet activity, or obvious deceptive behavior. However, this benign presentation is outweighed by a material external security contradiction: the domain has been classified as malicious by multiple evaluated detections and is confirmed as blacklisted by more than one source. The result is a **high-risk posture for sensitive interaction**, notwithstanding the absence of a separate page-level brand-impersonation finding. The apparent institutional identity remains unverified independently.

EVIDENCE

- The homepage identifies “IESP Simón Bolívar” and presents academic programs, admissions, institutional notices, and administrative services.
- Behavioral inspection recorded no login form, hidden form, external password form, wallet connection, clipboard hijack, or suspicious inline script.
- External reputation telemetry recorded 4 malicious detections and a confirmed blacklist designation.

Regulatory Verification Notes

The website’s content is institutionally oriented and includes a transparency portal, but the available evidence does not independently establish the operator’s legal identity or regulatory standing. The site does not present a license or registration number in the reviewed content; for an educational institution, this is a verification gap rather than proof of wrongdoing. The registration record lists NIC.PE as registrar and identifies “DIRECCION REGIONAL DE EDUCACION DEL CALLAO” as the registrant, while the website presents itself as IESP Simón Bolívar. These records should be reconciled through an authoritative education-sector source. No matching signal was returned from the reviewed broker-reputation dataset, which is contextual only and does not determine licensing or legitimacy.

EVIDENCE

- The homepage and institutional navigation provide a “Portal de Transparencia,” admissions information, and administrative-service references but no evidenced license or registration number.
- The registration record lists registrar NIC.PE and registrant “DIRECCION REGIONAL DE EDUCACION DEL CALLAO.”
- The site’s transport encryption uses a DV certificate issued by YR2, valid to 2026-10-17T03:45:39+00:00.
- The hosting record resolves to AS23470, operated by RELIABLESITE - ReliableSite.Net LLC, US.

What to Verify Next

Before any credential submission, payment, or other sensitive interaction, an institution or enterprise security team should confirm that the domain is listed as an official web property by the relevant Peruvian education authority or by an independently sourced institutional directory. The institutional name, registration record, and contact channels should be reconciled using an offline or independently obtained telephone number rather than relying solely on contact details displayed on the site. Any enrollment or administrative transaction should use an independently confirmed payment and document-submission process.

EVIDENCE

- The homepage provides institutional contact information and administrative-service links that can be compared with independently sourced records.
- The site includes a transparency portal and admissions pages suitable for cross-checking against an authoritative education registry.
- The site is presented under the academic “edu.pe” suffix, but the available evidence does not establish that this particular domain is an officially verified sovereign web property.

Summary Verdict

The overall posture is **critical and unsuitable for sensitive interaction**. The website's institutional presentation and technically stable behavior do not overcome the confirmed external malicious detections and blacklist status. Its apparent educational identity should therefore be treated as unverified rather than established.

Infrastructure Integrity

The site is served directly from a single apparent origin address through ReliableSite rather than through an identified CDN or WAF. This provides a technically resolved hosting path but no identified edge-protection layer that would materially mitigate the reputation concern.

Closing Assessment

Restrict activity to passive viewing until the domain, institutional affiliation, and transaction channels have been independently confirmed through authoritative sources.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

Analysis engine signal:direct_threat

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	55/100
Identity verification confidence	60%

- Identity verified on page

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of institutobolivar.edu.pe.

- The request stayed on institutobolivar.edu.pe. It was not redirected to another domain. CLEAR

- Registration is published under NIC.PE. CLEAR
- DNS for this domain is served by server-us.com, across 2 name servers. NOTED
- The earliest public archive of this site is from 2011-04-10. CLEAR
- It is hosted on RELIABLESITE, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about institutobolivar.edu.pe at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
