Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website presents itself as a Singapore insurance brokerage and financial-advisory service, offering term insurance, critical-illness coverage, retirement planning, and estate-planning assistance through adviser consultations, partner-insurer comparisons, and appointment or contact requests.

Scam/Impersonation Risk

The site's presentation is consistent with a professional insurance-brokerage marketing operation, and the page analysis found no brand-impersonation indicator, login form, hidden form, or confirmed phishing mechanism. However, this positive page-level appearance is outweighed by a **confirmed blacklist signal** and corroborating external threat detections: the domain received multiple malicious classifications, including detections from Fortinet and Sophos. The available evidence therefore supports a critical risk posture for sensitive interaction, while not establishing an identity contradiction between two legal entities or proving that the site impersonates a named brand. The real-world operator also remains independently unverified.

EVIDENCE

- External reputation telemetry recorded 6 malicious and 1 suspicious detections, with Fortinet and Sophos among the flagged vendors.
- The domain was recorded on external blacklists; the Google Safe Browsing result was false, so the warning is not uniform across all sources.
- The homepage contains one appointment/contact form, with no login form, hidden form, or password-submission destination identified.

Regulatory Verification Notes

The homepage describes insurance and financial-advisory services, references the Monetary Authority of Singapore and Promiseland Financial Advisory, and states that the advertisement has not been reviewed by the Monetary Authority of Singapore. Those references are on-site assertions rather than independent proof of authorization. The site does not provide a license number that can be independently matched from the supplied evidence, leaving a material regulatory-disclosure gap for a service involving insurance placement and financial advice. The domain itself is established in registration terms, but that administrative fact does not verify the operator's identity or regulatory standing.

EVIDENCE

- Homepage copy advertises insurance coverage, partner-insurer comparisons, adviser credentials, testimonials, and appointment scheduling.
- Homepage disclaimer states that the advertisement has not been reviewed by the Monetary Authority of Singapore and references Promiseland Financial Advisory.
- Domain registration record: registered 2019-05-16T08:48:22Z, age_years 7.27, expiration 2028-05-16T08:48:22Z, registrar Dreamscape Networks International Pte Ltd.
- TLS certificate: issuer YR1, validation level DV, valid to 2026-09-28T12:03:50+00:00.

What to Verify Next

Before any sensitive engagement, an independent check should confirm that the named advisory firm and the specific adviser appear in the relevant Singapore regulatory register, and that the authorization covers the services advertised. Partner insurers should be contacted through contact details published on their own official websites to confirm that the adviser or brokerage relationship is genuine. Any appointment, document request, or payment instruction should be initiated only through independently confirmed channels, with no reliance on contact details presented solely by this website.

EVIDENCE

- The homepage supplies the regulatory references and adviser credentials that require independent register matching.
- The homepage offers appointment and contact functionality but does not, in the supplied evidence, provide an independently verified license number.
- The site's business description concerns insurance placement and advisory engagements, making authorization and intermediary-relationship checks directly relevant.

Summary Verdict

The overall posture is **critical risk for sensitive interaction**. The site’s coherent insurance-brokerage content and professional presentation do not overcome the confirmed external reputation contradiction, and the available evidence is insufficient to independently verify the operating entity.

Infrastructure Integrity

The site resolves directly to a single hosting address without a detected CDN or WAF, meaning the observed server is likely the hosting origin rather than a protected edge service. This provides limited infrastructure-based mitigation and should not be treated as evidence of legitimacy.

EVIDENCE

- Hosted on AS38719, DREAMSCAPE-AS-AP — Dreamscape Networks Limited, AU; resolved server IP 119.31.232.170 in Singapore.
- Infrastructure record: unique_ip_count 1, edge_ip_count 0, likely_origin_ip_count 1, has_cdn false.
- TLS transport uses issuer YR1 with DV validation and validity through 2026-09-28T12:03:50+00:00.

Closing Assessment

Sensitive actions such as credential submission, document exchange, payment, or financial engagement should remain suspended unless the operator and authorization are independently confirmed through official channels; activity should otherwise be limited to non-sensitive observation.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about insurancebrokerssingapore.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
