

Is insurgentesuin.mx legit? TrustSniffer's high-trust assessment: 100/100

insurgentesuin.mx

Verdict

100

OUT OF 100

HIGH TRUST

insurgentesuin.mx appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-10 by automated analysis. Classification confidence 70%.

What this site appears to be

University Moodle site (Universidad Insurgentes) presenting course listings, modalities (in-person/mixed/online) and institutional links. Contains a login form for students; no financial or fraud-related calls to action detected.

Evidence status and limitations

Evidence completeness: UNKNOWN

- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2024.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is an institutional Moodle learning-management portal for Universidad Insurgentes, presenting academic programs, course information, in-person, mixed, and online study modalities, and a student login facility for delivering educational materials and services.

Scam/Impersonation Risk

No contradictions were observed. The site's identity, educational content, and student-portal function are consistent, with no detected phishing, impersonation, malicious behavior, or fraud-related calls to action. External reputation checks recorded no malicious or suspicious detections, while the established traffic footprint and continuous historical presence provide additional support for a genuine institutional service. Normal account login and standard platform interaction are appropriate.

EVIDENCE

- The homepage identifies Universidad Insurgentes and presents Moodle-based academic content, with no red-flag or impersonation indicators.
- The domain was registered on 2023-06-07 and is 3.18 years old through GoDaddy.com.
- Web-archive coverage records 23 snapshots spanning 2024–2026, with 3 years tracked and no suspicious repurposing detected.

Regulatory Verification Notes

The reviewed content presents a coherent university LMS identity and an education-focused operating model rather than direct financial commerce. No license claim or registration number is displayed in the reviewed content; this is a limited disclosure point for institutional verification, not evidence of deception or identity conflict. The available third-party broker context produced no match and should not be interpreted as a licensing or accreditation determination.

EVIDENCE

- The homepage's stated purpose is delivery of university courses and materials through an educational platform.
- The site is served from AS136907, HWCLOUDS-AS-AP – HUAWEI CLOUDS, HK.
- Transport encryption uses a DV certificate issued by YR1, valid until 2026-10-31T20:54:40+00:00.

What to Verify Next

Before making consequential enrollment or tuition decisions, confirm the institution's current accreditation or licensing status through the relevant Mexican education authority or an independently obtained university administration channel. Official communications should also be used to confirm the correct student-portal and support channels before account recovery or enrollment-related actions.

EVIDENCE

- The reviewed homepage provides academic and student-portal functions but does not display a license or registration number.
- The platform's purpose is institutional education, making independent confirmation of accreditation and enrollment administration the appropriate remaining due-diligence step.

Summary Verdict

The website presents as a legitimate, established, and trustworthy university learning platform. The evidence converges on a genuine educational service with no observed contradiction or abuse pattern, and normal interaction—including login and standard account use—is appropriate.

Infrastructure Integrity

The site resolves to one likely origin address, with no CDN or WAF vendor detected and no edge-IP layer identified. This is a straightforward, attributable hosting posture rather than an observed integrity problem; infrastructure characteristics remain supportive context, not proof of legitimacy.

EVIDENCE

- Hosting infrastructure resolves to 1 unique IP, including 1 likely origin IP, with 0 edge IPs and no detected CDN.
- No infrastructure vendors were detected in the resolution data.
- The hosting network is registered through APNIC in Singapore.

Closing Assessment

Proceed with normal platform use and account login; apply ordinary independent institutional due diligence to any consequential enrollment, accreditation, or tuition commitment.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of insurgentesuin.mx.

- The request stayed on insurgentesuin.mx. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com. CLEAR
- DNS for this domain is served by azure-dns.com, across 4 name servers. NOTED
- The registration is paid up to 2027-06-07. NOTED
- The earliest public archive of this site is from 2024-05-10. CLEAR
- It is hosted on HWCLOUDS-AS-AP, from a server in SG. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about insurgentesuin.mx at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with

a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
