- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1999.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the corporate presence of Intdev Internet Technologies, a South African managed IT services provider presenting hosting, cloud, licensing, connectivity, cybersecurity, support, and related enterprise technology services for businesses and institutions.

Scam/Impersonation Risk

No contradictions were observed across the website's identity, content, behavior, or external reputation signals. The site presents as a corporate B2B service provider, with no detected phishing, credential-harvesting, brand-impersonation, or malicious-content indicators. Normal interaction, including account login where applicable, is appropriate.

- The homepage identifies Intdev Internet Technologies as an established managed IT services provider with a corporate B2B model.
- The site contained no login form, sensitive form, hidden form, or untrusted form destination.
- The domain was registered in 1998 (~27.89 years old).
- The archive contains 196 snapshots spanning 1999–2026 (28 years tracked).

Regulatory Verification Notes

The About, Services, Partners, Legal Documents, and Contact pages present a coherent enterprise-services identity, including cybersecurity, Microsoft licensing, cloud infrastructure, connectivity, support, backup, and governance-related services. The website does not state a specific regulatory license or registration number; this is a transparency item for procurement or jurisdiction-specific review, not evidence of deception. The available third-party broker context contains no matching warning.

- The About page describes an award-winning South African managed service provider operating since 1998.
- The Services pages document hosting, licensing, connectivity, security, support, backup, and enterprise technology offerings.
- The site is hosted on AS327782, Metro Fibre Networx (Pty) Ltd, ZA.
- TLS is issued by YR2 at DV validation level and is valid to 2026-10-19.

What to Verify Next

For material procurement or regulated-sector engagement, confirm any applicable licensing, registration, contractual entity, and service certifications through the relevant official registries and independent business records. Validate the Legal Documents and Contact pages through standard vendor-onboarding procedures.

- The Legal Documents page is the appropriate source for reviewing contractual and disclosure terms.
- The Contact page provides the appropriate starting point for independent channel validation.

- The Partners and certifications presented on the site can be checked against the relevant providers where assurance is required.

Summary Verdict

The website merits a high-trust, established-entity posture. The evidence supports legitimacy and ordinary business engagement, with no observed contradiction requiring a heightened fraud response.

Infrastructure Integrity

The site resolves directly to Metro Fibre Networkx infrastructure in South Africa, with no CDN or WAF detected and one likely origin address. This is a straightforward hosting configuration; the absence of an edge-protection layer does not alter the site’s established legitimacy assessment.

Closing Assessment

Prospective users may proceed with normal interaction and standard business engagement, subject to ordinary procurement and vendor-onboarding controls for material commitments.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of intdev.co.za.

- The request stayed on intdev.co.za. It was not redirected to another domain. CLEAR
- Registration is published under DIAMATRIX C.C.. CLEAR
- DNS for this domain is served by co.za, across 2 name servers. NOTED
- The registration is paid up to 2026-09-18. NOTED
- The earliest public archive of this site is from 1999-10-03. CLEAR
- It is hosted on Metro Fibre Networkx (Pty) Ltd, from a server in ZA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about intdev.co.za at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
