

Is integratedmetall.com a scam? TrustSniffer's high-risk assessment:
0/100

integratedmetall.com

Verdict

0

OUT OF 100

CRITICAL RISK

integratedmetall.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Integrated Metall Industries LLC is a UAE-based metalworks contractor (founded 2008) offering steel, aluminium, and glass/mirror fabrication and installation. The page contains company description, contact email and phone, divisions, and a request-a-quote call-to-action.

Evidence status and limitations

Evidence completeness: UNKNOWN

The real-world operator identity was not independently verified.

Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://integratedmetall.com/>

What integratedmetall.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2023.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Integrated Metall Industries LLC presents itself as a UAE-based commercial metalworks contractor offering structural and non-structural steelwork, aluminium fabrication, and glass and mirror services, with project-based revenue supported by contact details and a request-a-quote process.

Scam/Impersonation Risk

The site's corporate presentation is coherent and contains no observed brand-impersonation indicators, identity inconsistency, login form, or sensitive data-collection mechanism. However, this benign page appearance is materially outweighed by confirmed external threat detections and blacklist inclusion. The domain is reported as malicious by multiple security sources, including Kaspersky and Sophos, creating a clear risk that the site, its infrastructure, or its domain reputation could expose visitors to harmful interaction despite the absence of suspicious behavior in the captured page. No separate identity contradiction was observed; the principal adverse finding is the confirmed blacklist and associated malicious detections.

EVIDENCE

- The homepage describes Integrated Metall Industries LLC as a steel, aluminium, and glass-and-mirror contractor and provides a request-a-quote call to action; page analysis identified no phishing indicators or sensitive form.
- External reputation telemetry records 15 malicious detections, with Kaspersky and Sophos among the flagged vendors; the domain is also recorded as blacklisted by two external sources.
- Domain registration telemetry records creation on 2022-11-30, with an age of 3.72 years and registrar GoDaddy.com, LLC.
- Archive telemetry records 67 snapshots spanning 2023–2025, covering 3 years.

Regulatory Verification Notes

The available site content identifies the business as Integrated Metall Industries LLC and states that it was founded in 2008, but the real-world operator remains independently unverified. The supplied content does not present a regulatory licence claim or licence number; for a commercial fabrication contractor this is primarily a disclosure and verification matter rather than, by itself, evidence of deception. The site's missing structured metadata and limited independently verifiable corporate detail reduce the strength of its identity documentation. A separate broker-reputation dataset contained no matching record, which provides no adverse broker-specific signal but does not establish licensing or corporate legitimacy.

EVIDENCE

- The homepage names "Integrated Metall Industries LLC." and describes the company's stated 2008 founding and fabrication divisions.
- The homepage provides a telephone contact and a request-a-quote route but no licence authority or licence number is identified in the supplied content.
- The site is hosted on AS31898, ORACLE-BMC-31898 — Oracle Corporation, US.
- Its transport encryption uses a DV certificate issued by YR1, valid to 2026-10-11.

What to Verify Next

Before any quotation, contract, payment, site visit, or exchange of documents, the proposed counterparty should be independently matched to UAE commercial records and the relevant local business-licensing authority. Contact details should be confirmed through an independently sourced corporate record or offline channel, and any quotation should be validated against a verified business address, named representative, contractual terms, and payment account held in the contracting entity's name. Security teams should also confirm whether the blacklist detections relate to the current site content, hosting history, or a compromised domain before permitting business interaction.

EVIDENCE

- The site presents a commercial B2B service model based on client contracts and project quotations rather than an independently verified regulated service.
- Independent identity verification is recorded as unverified.
- The captured page contains no login form, password form, wallet connection, or sensitive form.
- The site's stated business identity and contact details are available for comparison with independent corporate and licensing records.

Summary Verdict

The overall posture is **critical trust risk**. Although the website presents a plausible corporate service profile and its captured behavior does not show abusive interaction mechanics, the confirmed external malicious detections and blacklist status are decisive contradictions that make sensitive interaction inappropriate without successful independent validation.

Infrastructure Integrity

The site resolves directly to Oracle Corporation hosting infrastructure, with no detected CDN or WAF edge layer and one identified hosting address. This provides a technically identifiable hosting path but offers no legitimacy assurance; infrastructure protections cannot offset the adverse reputation evidence.

EVIDENCE

- Hosting telemetry records one resolved address, 50.6.35.8, in the United States.
- The serving network is AS31898, ORACLE-BMC-31898 — Oracle Corporation, US; no CDN was detected.

Closing Assessment

Until the counterparty, business authority, and domain reputation are independently validated, the appropriate enterprise posture is to restrict interaction to non-sensitive review and withhold credentials, confidential documents, contractual commitments, and funds.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of integratedmetall.com.

- The request stayed on integratedmetall.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under GoDaddy.com, LLC. [CLEAR](#)
- DNS for this domain is served by domaincontrol.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2026-11-30. [NOTED](#)
- The earliest public archive of this site is from 2023-10-30. [CLEAR](#)
- It is hosted on ORACLE-BMC-31898, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about integratedmetall.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
