Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 2001.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

This is an established Australian financial-services and investment-research website presenting stock research, Buy/Hold/Sell recommendations, market commentary, investment education, model portfolios, managed funds, portfolio tools, and paid memberships.

Scam/Impersonation Risk

No contradictions were observed. The site's investment-research identity is consistent across its homepage content and historical presence, while behavioral testing found no phishing, impersonation, cloaking, hidden forms, wallet activity, or suspicious external activity. The overall evidence supports normal interaction, including account login.

- Historical coverage: 5,000 archive snapshots spanning 2001–2026, tracked across 26 years; domain age 24.6652977412731 years.
- Homepage analysis identified no red flags or suspected brand impersonation.
- Behavioral testing recorded 2 successful runs, 0 external XHR requests, 0 hidden forms, and 0 wallet-provider detections.

Regulatory Verification Notes

The site presents a conventional investment-research and managed-funds business model, monetized through subscriptions and supported by disclosed fees and financial-product documentation. The available evidence does not independently verify a specific regulatory licence or registration number, so regulatory status remains an administrative verification point rather than an indicator of deception. The registered business identity and transport security provide additional evidence of an established operating entity.

- Domain registration records identify Melbourne IT as registrar and INVESTSMART FINANCIAL SERVICES PTY LTD as owner.
- The site is served from AS8075 (Microsoft Corporation, US).
- TLS uses issuer YR2 with DV validation and is valid to 2026-10-06T00:06:19+00:00.
- The homepage documents paid research, recommendations, managed funds, and investment-product information.

What to Verify Next

Before making a regulated investment decision, the prospective user should confirm the relevant licence or authorisation in the applicable Australian registry, reconcile the specific product documentation and fees with the intended service, and independently confirm official support and contact channels.

- The homepage provides an account-login pathway, making authentication-flow verification a relevant operational check.
- Investment-product and managed-fund documentation is presented as part of the site's service offering.

Summary Verdict

The website presents a high-trust posture consistent with a legitimate, established financial-services and investment-research entity. Its identity, operating model, historical continuity, technical environment, and observed behavior converge without contradictory risk signals.

Infrastructure Integrity

The site uses CDN/WAF protection, and all observed addresses belong to edge infrastructure; the origin server was not observable in this analysis. This reduces direct origin exposure and is a mitigating security control, but it is not proof of legitimacy.

- CDN/WAF protection was observed with 1 edge IP and 0 origin candidates.

Closing Assessment

Normal account login and standard use are appropriate, subject to ordinary institutional due diligence for investment decisions.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of [intelligentinvestor.com.au](#).

- The request stayed on [intelligentinvestor.com.au](#). It was not redirected to another domain. CLEAR
- Registration is published under Melbourne IT. CLEAR
- DNS for this domain is served by [digicertdns.com](#), across 4 name servers. NOTED

- The earliest public archive of this site is from 2001-11-30. CLEAR
- It is hosted on MICROSOFT-CORP-MSN-AS-BLOCK, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about intelligentinvestor.com.au at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
