- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Interactive Brokers Hong Kong Limited is a corporate brokerage website presenting global trading accounts, platforms, pricing, research, prediction-market services, regulatory information, and account opening for individuals and institutions. Its apparent business model is a regulated multi-asset brokerage earning revenue from commissions, spreads, margin lending, market data, and related trading services.

Scam/Impersonation Risk

No phishing, impersonation, confirmed blacklist, or malicious-reputation contradiction was observed. The site presents a consistent Interactive Brokers identity, and external reputation checks found no malicious or suspicious detections. A third-party broker profile provides supportive regulated-entity context while noting limited withdrawal-related exposure signals; this is contextual reputation information rather than evidence of fraud.

- The homepage identifies “Interactive Brokers Hong Kong Limited” and presents a consistent corporate brokerage identity.
- The domain was registered on 1999-01-20 and is approximately 27.55 years old.
- External checks recorded 0 malicious detections, 0 suspicious detections, and no confirmed phishing or blacklist finding.

Regulatory Verification Notes

The homepage provides substantial corporate, regulatory, pricing, risk, and investment disclosures, including regulatory reports and account-risk information. The business involves custody and control of customer funds, which makes licensing and account-protection terms material; the supplied page evidence does not establish a license number or regulator identifier directly on the site. A third-party broker profile identifies the entity as regulated and licensed, providing meaningful corroboration but not a substitute for confirmation with the relevant authority.

- The homepage links to regulatory reports, risk disclosures, pricing information, and corporate-history material.
- The homepage describes individual, institutional, margin, securities, and trading-account services.
- The site’s hosting infrastructure is served from AS20940 (Akamai International B.V., NL).
- TLS uses EV validation, is issued by DigiCert EV RSA CA G2, and is valid through 2027-02-13.

What to Verify Next

Confirm the applicable license and legal entity directly through the relevant Hong Kong regulatory registry, and reconcile that record with the entity named in the account-opening and customer-agreement materials. Independently confirm official support channels and review the applicable custody, funding, withdrawal, margin, and investor-protection terms before material transactions.

- The homepage provides links to account opening, support, pricing, margin rates, and regulatory reports.
- The site presents separate individual, institutional, advisor, and administrative account pathways.
- The legal and disclosure materials provide the appropriate locations for confirming entity and service terms.

Summary Verdict

The website has a high-trust posture consistent with an established and legitimate financial-services entity. Its long operating history, clean external reputation, substantial disclosure environment, strong page authority, and professionally maintained security controls converge to support normal interaction, including account login and standard use.

Infrastructure Integrity

The site is protected by Akamai CDN/WAF infrastructure, with observed traffic terminating on CDN edge servers rather than an exposed origin. This reduces direct origin exposure and is a mitigating security characteristic, although protective infrastructure alone does not establish legitimacy.

Closing Assessment

Normal account access and standard platform use are appropriate, subject to the ordinary licensing, contractual, and transaction-level checks expected for a financial intermediary.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of interactivebrokers.com.hk.

- The request stayed on interactivebrokers.com.hk. It was not redirected to another domain. CLEAR
- Registration is published under Hong Kong Domain Name Registration Company Limited. CLEAR
- DNS for this domain is served by akam.net. NOTED

- The registration is paid up to 2032-10-01. CLEAR
- It is hosted on AKAMAI-ASN1, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about interactivebrokers.com.hk at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
