

Is interbank.pe legit? TrustSniffer's high-trust assessment: 90/100

interbank.pe

Verdict

90

OUT OF 100

HIGH TRUST

interbank.pe appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 55%.

What this site appears to be

Captured page appears to be the Spanish-language corporate site for Banco Internacional del Perú (Interbank). It lists retail and corporate banking products (accounts, cards, loans, investments), digital channels, promotions and contact/branch info. A form-like DNI entry and reCAPTCHA are present for promotions/lead capture. Legal identifiers and address are included.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

This Spanish-language website presents itself as the corporate banking portal for Banco Internacional del Perú (Interbank), offering retail and business accounts, credit and debit cards, loans, investments, digital banking channels, customer support, branches, and promotional lead-capture services.

Scam/Impersonation Risk

No contradictions were observed: the available evidence shows no phishing, impersonation, blacklist, or malicious-content indicators. The homepage content is coherent with a functioning banking institution, and the captured interaction did not expose a login form, hidden forms, external password submission, wallet activity, or cloaking. Some dynamic page changes and external network activity were observed during interaction, but these were treated as ordinary site behavior rather than evidence of an abuse pattern. The website is therefore apparently legitimate and low risk, while the real-world operator identity remains independently unverified.

EVIDENCE

- Homepage: Corporate banking content is present, with no detected brand-impersonation or phishing indicators.
- Interaction capture: No login form, hidden form, password submission, wallet connection, clipboard manipulation, or cloaking was detected.
- Reputation screening: 0 malicious detections, 0 suspicious detections, and 0 abuse reports were recorded; the domain is within the global top one million traffic footprint.

Regulatory Verification Notes

The legal and identity presentation is consistent with a corporate bank: the site identifies Banco Internacional del Perú and provides formal legal identifiers and an address. No banking license authority or license number is disclosed in the supplied page evidence, so regulatory authorization should be confirmed independently rather than inferred from the site's presentation. A third-party broker-intelligence check produced no match, which is contextual reputational support only and not a licensing determination. The organization-validated transport certificate is a positive technical corroboration, but it does not independently prove that the current site operator controls the represented institution.

EVIDENCE

- Legal/footer content: Banco Internacional del Perú, an RUC identifier, and an address are displayed.
- Site transport encryption: OV certificate issued by DigiCert Global G2 TLS RSA SHA256 2020 CA1 to BANCO INTERNACIONAL DEL PERU-INTERBANK SAA, valid to 2027-02-24.
- Domain registration: Registrar identified as NIC.PE; the registration record lists Jaime Arroyo Vilcara as owner.

What to Verify Next

Before credential or payment interactions, independently confirm that the legal entity presented on the site corresponds to the relevant banking authorization and registry entry. Confirm official contact and branch channels through an independently sourced route, and review the purpose, retention, and authorization basis for any personal-identification data requested in promotional or preapproval flows. Standard payment-protection and account-security controls should remain in force for transactions.

EVIDENCE

- Contact and branch pages: Official customer-support and branch information is available for independent callback verification.
- Promotional flow: A DNI entry and reCAPTCHA are used for lead capture, warranting confirmation of the data-collection purpose before submission.
- Account-access pages: Digital banking channels are presented separately from the captured promotional form.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate banking website. The conclusion supports normal website use, but it is not equivalent to independent proof of the real-world operator's identity.

Infrastructure Integrity

The site is protected by Cloudflare's CDN/WAF infrastructure, with observed traffic served through CDN edge addresses rather than a directly exposed origin. This reduces direct origin exposure and is a mitigating security control, but infrastructure protection alone is not proof of institutional legitimacy.

Closing Assessment

Ordinary browsing is proportionate; independent entity and authorization checks should be completed before submitting credentials, personal data, or payment information.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of interbank.pe.

- The request stayed on interbank.pe. It was not redirected to another domain. CLEAR
- Registration is published under NIC.PE. CLEAR
- DNS for this domain is served by azure-dns.com, across 4 name servers. NOTED
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about interbank.pe at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
