

Is interbanking.com.ar legit? TrustSniffer's high-trust assessment: 100/100

interbanking.com.ar

Verdict

100

OUT OF 100

HIGH TRUST

interbanking.com.ar appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-10 by automated analysis. Classification confidence 55%.

What this site appears to be

Interbanking is presented as an established Argentine B2B digital treasury platform offering banking aggregation, payments, and subscription plans for companies. Contact details, office address, and service descriptions are included; content emphasizes security and operation with many banks.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is an Argentine B2B digital treasury and banking-aggregation platform that presents centralized banking, payments, collections, and financial-management services for companies. Its apparent business model combines enterprise subscriptions and service fees with connectivity to multiple banks and related digital-finance functions.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent corporate profile across its homepage, solutions, company, and contact areas, with no detected phishing, brand-impersonation, credential-harvesting, hidden-form, or wallet-drainer indicators. A behavioral review did record some external requests and posts, including a preliminary suspicious-network classification; however, this activity was not accompanied by cloaking, sensitive external forms, clipboard manipulation, or other abuse patterns, and the overall evidence remains consistent with a low-risk established site. External reputation checks found no malicious or suspicious detections, no blacklist result, no abuse reports, and no broker-dataset match.

EVIDENCE

- Homepage and login pathway: no login form, hidden form, sensitive form, or untrusted submission destination was detected.
- Homepage behavior: cloaking, wallet-connection activity, wallet-drainer behavior, clipboard manipulation, and suspicious inline scripts were not detected.
- External reputation evidence: malicious detections, suspicious detections, blacklist results, and abuse reports were all recorded as zero or false.
- Domain registration: registered 2013-08-23 and approximately 12.97 years old.

Regulatory Verification Notes

The company, about, solutions, plans, and contact pages present a substantive B2B financial-services offering, including electronic banking, payments and collections, treasury centralization, connectivity with 58 banks, and paid enterprise plans. The website provides contact details and an office address, but no licensing authority or registration number is disclosed in the supplied content; this is a verification and transparency point rather than evidence of deception. The real-world operator identity remains independently unverified: the transport certificate names INTERBANKING S.A., which is consistent with the site presentation but does not by itself prove operational ownership. The long-established registration, reputable registrar, strong global traffic footprint,

clean external reputation, established page content, and valid organization-validated certificate collectively support an apparently legitimate and established presentation.

EVIDENCE

- Homepage and company pages: identify Interbanking as a digital B2B financial-services provider for Argentine businesses and describe its banking, payments, and treasury functions.
- Contact page: publishes contact details and an office address.
- Domain registration record: registrar is nicar; expiration date is 2027-08-22.
- TLS certificate: Sectigo Public Server Authentication CA OV R36, OV validation, subject organization INTERBANKING S.A., valid through 2027-04-06.

What to Verify Next

Before credential or payment interactions, the prospective customer should independently confirm the contracting entity and the applicable licensing or registration position with the relevant Argentine authority. The published office and contact details should be validated through an independently sourced corporate channel, and subscription terms, cancellation provisions, service responsibilities, and payment protections should be reviewed before commitment. Any application or login should be reached through an independently confirmed official channel rather than an unsolicited message or advertisement.

EVIDENCE

- Solutions and plans pages: describe paid tiers and enterprise financial-management services requiring commercial and contractual review.
- Company and contact pages: provide the identity and contact points suitable for independent confirmation.
- Login and subscription pathways: are presented as distinct site functions, supporting a separate review of access and contracting processes.

Summary Verdict

The overall posture is **high trust and low risk**, with available evidence consistent with an established, apparently legitimate website and no observed scam or impersonation contradictions. The principal residual uncertainty concerns independent confirmation of the real-world operator rather than indications of malicious website behavior.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, with observed traffic served through Cloudflare edge addresses and no origin candidate identified in the supplied resolution. This reduces direct exposure of the underlying service infrastructure and is a mitigating control, not proof of legitimacy.

EVIDENCE

- Hosting infrastructure: served from AS13335, CLOUDFLARENET — Cloudflare, Inc., US.
- Observed edge addresses: 104.18.6.218 and 104.18.7.218.
- Infrastructure posture: two CDN edge IPs were observed and zero likely origin IPs were identified.

Closing Assessment

Normal evaluation may proceed, subject to ordinary independent confirmation of the merchant identity, applicable regulatory position, contractual terms, and payment protections before credentials or funds are committed.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of interbanking.com.ar.

- The request stayed on interbanking.com.ar. It was not redirected to another domain. CLEAR
- Registration is published under nicar. CLEAR
- DNS for this domain is served by com.ar, across 3 name servers. NOTED
- The registration is paid up to 2027-08-22. NOTED
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about interbanking.com.ar at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
