What interna.lt served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2009.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

A Lithuanian corporate-services website presenting accounting, legal and financial assistance, company-formation support, contact facilities, and newsletter subscription for business clients.

Scam/Impersonation Risk

The site presents a conventional professional-services profile and its public forms do not request passwords or other sensitive information; no page-level phishing, brand-impersonation, wallet, or malware behavior was identified. However, this benign presentation is outweighed by confirmed external reputation contradictions, including two malicious detections and blacklist status. The current registration record is dated 29 June 2026, while historical captures show the domain in use from 2009 onward; although no suspicious repurposing or semantic drift was identified, that discrepancy means historical continuity should not be treated as independent proof of the current operator's identity. No identity contradiction involving multiple legal-entity names was observed.

EVIDENCE

- The homepage presents accounting, legal analysis, financial analysis, and company-formation assistance as the stated business model.
- External reputation evaluation recorded 2 malicious detections and a confirmed blacklist status; general malware and phishing-page indicators were otherwise not identified.
- Historical web captures record 63 snapshots spanning 2009–2026, representing 18 years tracked.
- The current registration record lists creation on 2026-06-29 and an age of approximately 0.15 years.

Regulatory Verification Notes

The site's disclosure posture is unclear for a business offering accounting, legal, financial-analysis, and company-formation services. No license, registration number, or licensing authority is claimed in the supplied site content, and the real-world operator remains unverified; this is a material verification gap, but it is not by itself proof of fraud. The site's professional presentation and valid transport encryption provide limited supporting context, while the confirmed external reputation findings remain the controlling concern for sensitive engagement.

EVIDENCE

- The service and contact content identifies the business as "UAB INTERNA GRUPĖ" but supplies no claimed license number or licensing authority.
- The site uses a DV TLS certificate issued by YR2, valid through 2026-11-01T06:11:09+00:00.

What to Verify Next

Before any engagement, independently confirm the claimed company's legal existence and the authority of the individuals offering legal or financial services through the relevant Lithuanian corporate and professional registries. Confirm the official contact channels and engagement documents through an independently sourced route, and require a written scope of work, fee schedule, data-handling terms, and payment-protection arrangements before sharing business records or authorizing funds.

EVIDENCE

- Independent registry confirmation is warranted because the site does not state a licensing authority or registration number.
- The contact and service pages provide the basis for validating the operator and engagement terms through an offline or independently sourced channel.

Summary Verdict

The overall posture is low trust with elevated risk for sensitive interaction. The website's corporate presentation is not sufficient to overcome the confirmed reputation contradictions and the lack of independently verified operator identity. Public informational viewing may be possible, but the available evidence does not support treating the site as reliable for credentials, confidential business information, or financial activity.

Infrastructure Integrity

The site resolves directly to a single hosting endpoint, with no CDN or WAF detected and no separate edge/origin layer identified. This reduces the protective value of the hosting arrangement and does not offset the reputation concerns. The infrastructure is hosted by Interneto-vizija – UAB “Interneto vizija” in Lithuania.

EVIDENCE

- Hosted on AS212531, Interneto-vizija – UAB “Interneto vizija”, LT; resolved IP 79.98.24.3.
- Infrastructure analysis recorded 1 unique IP, 0 edge IPs, and 1 likely origin IP.

Closing Assessment

Restrict interaction to public information and do not submit credentials, confidential records, or payment instructions unless the operator and engagement are independently validated through authoritative channels.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of interna.lt.

- The request stayed on interna.lt. It was not redirected to another domain.

CLEAR
- The registration is paid up to 2031-06-30.

CLEAR
- The earliest public archive of this site is from 2009-02-13.

CLEAR

- It is hosted on Interneto-vizija, from a server in LT. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about interna.lt at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
